A BILL

To authorize the Secretary of Agriculture to acquire and manage lands in the Commonwealth of Puerto Rico to provide for the protection of critical aquifers and watersheds that serve as a principal water supply for Puerto Rico, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Puerto Rico Karst
5 Conservation Act of 2001”.

1 **SEC. 2. FINDINGS, PURPOSES, AND DEFINITIONS.**

2 (a) FINDINGS.—Congress finds the following:

3 (1) The Karst Region of Puerto Rico is a
4 unique geological formation that is critical to the
5 maintenance of aquifers and watersheds which con-
6 stitute a principal water supply for much of Puerto
7 Rico.

8 (2) The Karst Region is threatened by develop-
9 ment, which, if unchecked, could permanently dam-
10 age aquifers supplying fresh water and cause irrep-
11 arable damage to natural and environmental assets
12 that are unique to the United States and Puerto
13 Rico.

14 (3) Puerto Rico has one of the highest popu-
15 lation densities in the United States, which further
16 makes the protection of the Karst Region an impera-
17 tive for the maintenance of the public health and
18 welfare of the citizens of Puerto Rico.

19 (4) The Karst Region possesses extraordinary
20 ecological diversity, including the habitats of several
21 endangered and threatened species and tropical mi-
22 grants and is, therefore, an area of critical value to
23 research in tropical forest management.

24 (5) Coordinated efforts at land protection by
25 the Federal Government and the Commonwealth of

1 Puerto Rico will be necessary to conserve the envi-
2 ronmentally critical Karst Region.

3 (b) PURPOSES.—The purposes of this Act are to au-
4 thorize the Secretary of Agriculture, in cooperation with
5 the Commonwealth of Puerto Rico, to undertake a pro-
6 gram of land conservation, acquisition, and research to
7 protect and manage the geological and ecological values
8 of the Karst Region, with particular emphasis on the
