2 **SEC. 101. FINDINGS.**

3 Congress makes the following findings:

4 (1) The Bureau of the Census and other re-

5 ports highlight the increased demand for acute and

6 chronic health care services among both the general

7 population and a rapidly growing aging portion of

8 the population.

1 (2) The calls for reduction in medical errors, in-
2 creased patient safety, and increased quality of care
3 have resulted in an amplified call for allied health
4 professionals to provide health care services.

5 (3) Several allied health professions are charac-
6 terized by workforce shortages, declining enrollments
7 in allied health education programs, or a combina-
8 tion of both factors, and hospital officials have re-
9 ported vacancy rates in positions occupied by allied
10 health professionals.

11 (4) Many allied health education programs are
12 facing significant economic pressure that could force
13 their closure due to an insufficient number of stu-
14 dents.

15 **SEC. 102. PURPOSES.**

16 The purpose of this title is to ensure that the United
17 States health care industry will have a supply of allied
18 health professionals needed to support the Nation's health
19 care system in this decade and beyond by—

20 (1) providing incentives for members of the
21 United States population to seek and complete high-
22 quality allied health education and training; and

23 (2) providing additional funding to ensure that
24 such education and training can be provided to allied
25 health students.
