

109TH CONGRESS
1ST SESSION

S. 760

To amend the Public Health Service Act to provide a means for continued improvement in emergency medical services for children.

IN THE SENATE OF THE UNITED STATES

APRIL 11, 2005

Mr. INOUE (for himself, Mr. HATCH, Mr. KENNEDY, Mr. DODD, Mr. DEWINE, and Mr. CONRAD) introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

A BILL

To amend the Public Health Service Act to provide a means for continued improvement in emergency medical services for children.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Wakefield Act”.

5 **SEC. 2. FINDINGS AND PURPOSE.**

6 (a) FINDINGS.—Congress makes the following find-
7 ings:

8 (1) There are 31,000,000 child and adolescent
9 visits to the nation’s emergency departments every

1 year, with children under the age of 3 years account-
2 ing for most of these visits.

3 (2) Ninety percent of children requiring emer-
4 gency care are seen in general hospitals, not in free-
5 standing children's hospitals, with one-quarter to
6 one-third of the patients being children in the typical
7 general hospital emergency department.

8 (3) Severe asthma and respiratory distress are
9 the most common emergencies for pediatric patients,
10 representing nearly one-third of all hospitalizations
11 among children under the age of 15 years, while sei-
12 zures, shock, and airway obstruction are other com-
13 mon pediatric emergencies, followed by cardiac ar-
14 rest and severe trauma.

15 (4) Up to 20 percent of children needing emer-
16 gency care have underlying medical conditions such
17 as asthma, diabetes, sickle-cell disease, low birth-
18 weight, and bronchopulmonary dysplasia.

19 (5) Significant gaps remain in emergency med-
20 ical care delivered to children, with 43 percent of
21 hospitals lacking cervical collars (used to stabilize
22 spinal injuries) for infants, less than half (47 per-
23 cent) of hospitals with no pediatric intensive care
24 unit having a written transfer agreement with a hos-
25 pital that does have such a unit, one-third of States

1 lacking a physician available on-call 24 hours a day
2 to provide medical direction to emergency medical
3 technicians or other non-physician emergency care
4 providers, and even those States with such avail-
5 ability lacking full State coverage.

6 (6) Providers must be educated and trained to
7 manage children's unique physical and psychological
8 needs in emergency situations, and emergency sys-
9 tems must be equipped with the resources needed to
10 care for this especially vulnerable population.

11 (7) The Emergency Medical Services for Chil-
12 dren (EMSC) Program under section 1910 of the
13 Public Health Service Act (42 U.S.C. 300w-9) is
14 the only Federal program that focuses specifically on
15 improving the pediatric components of emergency
16 medical care.

17 (8) The EMSC Program promotes the nation-
18 wide exchange of pediatric emergency medical care
19 knowledge and collaboration by those with an inter-
20 est in such care and is depended upon by Federal
21 agencies and national organizations to ensure that
22 this exchange of knowledge and collaboration takes
23 place.

24 (9) The EMSC Program also supports a multi-
25 institutional network for research in pediatric emer-

1 agency medicine, thus allowing providers to rely on
2 evidence rather than anecdotal experience when
3 treating ill or injured children.

4 (10) States are better equipped to handle occur-
5 rences of critical or traumatic injury due to ad-
6 vances fostered by the EMSC program, with—

7 (A) forty-eight States identifying and re-
8 quiring all EMSC-recommended pediatric equip-
9 ment on Advanced Life Support ambulances;

10 (B) forty-four States employing pediatric
11 protocols for medical direction;

12 (C) forty-one States utilizing pediatric
13 guidelines for acute care facility identification,
14 ensuring that children get to the right hospital
15 in a timely manner; and

16 (D) thirty-six of the forty-two States hav-
17 ing statewide computerized data collection sys-
18 tems now producing reports on pediatric emer-
19 gency medical services using statewide data.

20 (11) Systems of care must be continually main-
21 tained, updated, and improved to ensure that re-
22 search is translated into practice, best practices are
23 adopted, training is current, and standards and pro-
24 tocols are appropriate.

1 (12) Now celebrating its twentieth anniversary,
2 the EMSC Program has proven effective over two
3 decades in driving key improvements in emergency
4 medical services to children, and should continue its
5 mission to reduce child and youth morbidity and
6 mortality by supporting improvements in the quality
7 of all emergency medical and emergency surgical
8 care children receive.

9 (b) PURPOSE.—It is the purpose of this Act to reduce
10 child and youth morbidity and mortality by supporting im-
11 provements in the quality of all emergency medical care
12 children receive.

13 **SEC. 3. REAUTHORIZATION OF EMERGENCY MEDICAL**
14 **SERVICES FOR CHILDREN PROGRAM.**

15 Section 1910 of the Public Health Service Act (42
16 U.S.C. 300w–9) is amended—

17 (1) in subsection (a), by striking “3-year period
18 (with an optional 4th year” and inserting “4-year
19 period (with an optional 5th year”;

20 (2) in subsection (d)—

21 (A) by striking “and such sums” and in-
22 serting “such sums”; and

23 (B) by inserting before the period the fol-
24 lowing: “\$23,000,000 for fiscal year 2006, and

1 such sums as may be necessary for each of fis-
2 cal years 2007 through 2010”;

3 (3) by redesignating subsections (b) through (d)
4 as subsections (c) through (e), respectively; and

5 (4) by inserting after subsection (a) the fol-
6 lowing:

7 “(b)(1) The purpose of the program established
8 under this section is to reduce child and youth morbidity
9 and mortality by supporting improvements in the quality
10 of all emergency medical care children receive, through the
11 promotion of projects focused on the expansion and im-
12 provement of such services, including those in rural areas
13 and those for children with special healthcare needs. In
14 carrying out this purpose, the Secretary shall support
15 emergency medical services for children by supporting
16 projects that—

17 “(A) develop and present scientific evidence;

18 “(B) promote existing and innovative tech-
19 nologies appropriate for the care of children: or

20 “(C) provide information on health outcomes
21 and effectiveness and cost-effectiveness.

22 “(2) The program established under this section
23 shall—

1 “(A) strive to enhance the pediatric capability
2 of emergency medical service systems originally de-
3 signed primarily for adults; and

4 “(B) in order to avoid duplication and ensure
5 that Federal resources are used efficiently and effec-
6 tively, be coordinated with all research, evaluations,
7 and awards related to emergency medical services
8 for children undertaken and supported by the Fed-
9 eral Government.”.
