

109TH CONGRESS
1ST SESSION

S. 943

To assist in the conservation of cranes by supporting and providing, through projects of persons and organizations with expertise in crane conservation, financial resources for the conservation programs of countries the activities of which directly or indirectly affect cranes and the ecosystems of cranes.

IN THE SENATE OF THE UNITED STATES

APRIL 28, 2005

Mr. FEINGOLD (for himself, Mr. CRAPO, Mr. MARTINEZ, Mr. SARBANES, and Mr. KOHL) introduced the following bill; which was read twice and referred to the Committee on Environment and Public Works

A BILL

To assist in the conservation of cranes by supporting and providing, through projects of persons and organizations with expertise in crane conservation, financial resources for the conservation programs of countries the activities of which directly or indirectly affect cranes and the ecosystems of cranes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Crane Conservation
5 Act of 2005”.

1 **SEC. 2. FINDINGS.**

2 Congress finds that—

3 (1) crane populations in many countries have
4 experienced serious decline in recent decades, a
5 trend that, if continued at the current rate, threat-
6 ens the long-term survival of the species in the wild
7 in Africa, Asia, and Europe;

8 (2) 5 species of Asian crane are listed as endan-
9 gered species under section 4 of the Endangered
10 Species Act of 1973 (16 U.S.C. 1533) and appendix
11 I of the Convention, which species are—

12 (A) the Siberian crane (*Grus*
13 *leucogeranus*);

14 (B) the red-crowned crane (*Grus*
15 *japonensis*);

16 (C) the white-naped crane (*Grus vipio*);

17 (D) the black-necked crane (*Grus*
18 *nigricollis*); and

19 (E) the hooded crane (*Grus monacha*);

20 (3) the Crane Action Plan of the International
21 Union for the Conservation of Nature considers 4
22 species of cranes from Africa and 1 additional spe-
23 cies of crane from Asia to be seriously threatened,
24 which species are—

25 (A) the wattled crane (*Buggeranus*
26 *carunculatus*);

1 (B) the blue crane (*Anthropoides*
2 *paradisea*);

3 (C) the grey-crowned crane (*Balearica*
4 *regulorum*);

5 (D) the black-crowned crane (*Balearica*
6 *pavonina*); and

7 (E) the sarus crane (*Grus antigone*);

8 (4)(A) the whooping crane (*Grus americana*)
9 and the Mississippi sandhill crane (*Grus canadensis*
10 *pulla*) are listed as endangered species under section
11 4 of the Endangered Species Act of 1973 (16 U.S.C.
12 1533); and

13 (B) with approximately 200 whooping cranes in
14 the only self-sustaining flock that migrates between
15 Canada and the United States, and approximately
16 100 Mississippi sandhill cranes in the wild, both spe-
17 cies remain vulnerable to extinction;

18 (5) conservation resources have not been suffi-
19 cient to cope with the continued diminution of crane
20 populations from causes that include hunting and
21 the continued loss of habitat;

22 (6)(A) cranes are flagship species for the con-
23 servation of wetland, grassland, and agricultural
24 landscapes that border wetland and grassland; and

1 (B) the establishment of crane conservation
2 programs would result in the provision of conserva-
3 tion benefits to numerous other species of plants and
4 animals, including many endangered species;

5 (7) other threats to cranes include—

6 (A) the collection of eggs and juveniles;

7 (B) poisoning from pesticides applied to
8 crops;

9 (C) collisions with power lines;

10 (D) disturbance from warfare and human
11 settlement; and

12 (E) the trapping of live birds for sale;

13 (8) to reduce, remove, and otherwise effectively
14 address those threats to cranes in the wild, the joint
15 commitment and effort of countries in Africa, Asia,
16 and North America, other countries, and the private
17 sector, are required;

18 (9) cranes are excellent ambassadors to pro-
19 mote goodwill among countries because they are well
20 known and migrate across continents;

21 (10) because the threats facing cranes and the
22 ecosystems on which cranes depend are similar on
23 all 5 continents on which cranes occur, conservation
24 successes and methods developed in 1 region have
25 wide applicability in other regions; and

1 (11) conservationists in the United States have
2 much to teach and much to learn from colleagues
3 working in other countries in which, as in the
4 United States, government and private agencies co-
5 operate to conserve threatened cranes.

6 **SEC. 3. PURPOSES.**

7 The purposes of this Act are—

8 (1) to perpetuate healthy populations of cranes;

9 (2) to assist in the conservation and protection
10 of cranes by supporting—

11 (A) conservation programs in countries in
12 which endangered and threatened cranes occur;
13 and

14 (B) the efforts of private organizations
15 committed to helping cranes; and

16 (3) to provide financial resources for those pro-
17 grams and efforts.
