

110TH CONGRESS  
2D SESSION

# H. CON. RES. 302

---

IN THE SENATE OF THE UNITED STATES

APRIL 1 (legislative day, MARCH 13), 2008

Received and referred to the Committee on Health, Education, Labor, and  
Pensions

---

## CONCURRENT RESOLUTION

Supporting the observance of Colorectal Cancer Awareness  
Month, and for other purposes.

Whereas colorectal cancer is the second most common cause  
of cancer deaths for men and women in the United  
States;

Whereas colorectal cancer affects men and women equally;

Whereas more than 148,810 people in the United States will  
be diagnosed with colon cancer this year;

Whereas over 49,960 people in the United States will die from colon cancer this year;

Whereas every 3.5 minutes, someone is diagnosed with colorectal cancer and every 9 minutes someone dies from colorectal cancer;

Whereas every 5 seconds someone who should be screened for colorectal cancer is not;

Whereas the vast majority of colon cancer deaths can be prevented through proper screening and early detection;

Whereas the survival rate of individuals who have colorectal cancer is 90 percent when detected in the early stages versus only a 10 percent survival rate when colorectal cancer is diagnosed after it has spread to distant organs;

Whereas only 39 percent of colorectal cancer patients have their cancers detected at an early stage;

Whereas uninsured Americans are more likely to be diagnosed with late stage colon cancer than patients with private insurance;

Whereas only 18.8 percent of those without health coverage in the United States have currently been properly screened for colorectal cancer;

Whereas if the majority of Americans age 50 or older were screened regularly for colorectal cancer, the death rate from this disease could plummet by up to 80 percent;

Whereas regular colorectal cancer screening has been ranked as one of the most cost effective screening interventions available, with the potential to save more than 30,000 lives a year;

Whereas treatment costs for colorectal cancer are extremely high, estimated at \$8,400,000,000 for 2004;

Whereas increasing the number of people between the ages of 50 years and 64 years of age who are regularly screened in the United States, would provide significant savings in billions of dollars to the Medicare program from cancer prevention and treatment costs;

Whereas the Blue Star, developed by the Members of the National Colorectal Cancer Roundtable, the American Cancer Society, the Colon Cancer Alliance, and C3: Colorectal Cancer Coalition represents the collective fight against colon cancer, the eternal memory of the people whose lives have already been lost to the disease, and the shining hope for a future free of colon cancer;

Whereas Coaches vs. Cancer (a partnership between the American Cancer Society and the National Association of Basketball Coaches), the Colon Cancer Alliance, and Ethicon Endo-Surgery have created “Earn a Blue Star Day” as a means for individuals and corporations to raise awareness of the importance of screening for colon cancer;

Whereas greater awareness of this cancer and the means to prevent it will save the lives of tens of thousands of Americans each year; and

Whereas observing a Colorectal Cancer Awareness Month during the month of March would provide a special opportunity to offer education on the importance of early detection and screening: Now, therefore, be it

1        *Resolved by the House of Representatives (the Senate*

2   *concurring*), That the Congress—

3            (1) supports the observance of Colorectal Can-

4        cer Awareness Month in order to provide a special

1 opportunity to offer education on the importance of  
2 early detection and screening;

3 (2) recognizes and applauds the national and  
4 community organizations for their work in pro-  
5 moting awareness about colorectal cancer, providing  
6 information on the importance of prevention and  
7 early detection through regular screening, and facili-  
8 tating access to treatment for its sufferers; and

9 (3) urges organizations and health practitioners  
10 to “earn a Blue Star” by using this opportunity to  
11 promote awareness about colorectal cancer and to  
12 support early identification and removal of pre-can-  
13 cerous polyps, detectable only through colorectal  
14 cancer screenings.

Passed the House of Representatives March 31,  
2008.

Attest: LORRAINE C. MILLER,  
*Clerk.*
