

110TH CONGRESS
1ST SESSION

H. R. 1713

To require the President and the Office of the Global AIDS Coordinator to establish a comprehensive and integrated HIV prevention strategy to address the vulnerabilities of women and girls in countries for which the United States provides assistance to combat HIV/AIDS, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

MARCH 27, 2007

Ms. LEE (for herself and Mr. SHAYS) introduced the following bill; which was referred to the Committee on Foreign Affairs

A BILL

To require the President and the Office of the Global AIDS Coordinator to establish a comprehensive and integrated HIV prevention strategy to address the vulnerabilities of women and girls in countries for which the United States provides assistance to combat HIV/AIDS, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Protection Against
5 Transmission of HIV for Women and Youth Act of 2007”.

1 **SEC. 2. FINDINGS.**

2 Congress finds the following:

3 (1) Globally, the United Nations Joint Program
4 on AIDS (UNAIDS) estimates that at the end of
5 2006 there were more than 39,500,000 people in-
6 fected with HIV/AIDS, the vast majority of whom
7 are living in the developing world.

8 (2) According to the World Health Organiza-
9 tion (WHO) unprotected heterosexual sex is now the
10 single most important factor in the spread of HIV
11 infections worldwide, representing 80 percent of new
12 infections in sub-Saharan Africa.

13 (3) According to UNAIDS, women and adoles-
14 cent girls account for about half of all HIV infec-
15 tions worldwide. In sub-Saharan Africa, women and
16 girls make up 60 percent of all infections and 76
17 percent of infections among those aged 15–24.

18 (4) Women and girls are biologically, socially,
19 and economically more vulnerable to HIV infection.
20 Gender disparities in the rate of HIV infection are
21 the result of a number of factors, including the fol-
22 lowing:

23 (A) Cross generational sex with older men
24 who are more likely to be infected with HIV,
25 and a lack of choice regarding when and whom
26 to marry, leading to early marriages and high

1 rates of child marriages with older men. About
2 half of all adolescent females in Africa and two-
3 thirds of adolescent females in Asia are married
4 by age 18.

5 (B) High rates of infection within mar-
6 riage. Research shows that married girls are
7 more likely to have unprotected sex and have
8 far more frequent sex than their unmarried
9 peers, indicating that marriage cannot be con-
10 sidered a protective factor against HIV infec-
11 tion.

12 (C) An inability to negotiate safe sex in
13 marriage or with regular partners. Studies show
14 that married women and married and unmar-
15 ried adolescent females often are unable to ne-
16 gotiate the frequency and timing of sexual
17 intercourse, ensure their partner's faithfulness,
18 or insist on condom use. Women often run the
19 risk of being infected by husbands or male part-
20 ners in societies where it is common or accepted
21 for men to have more than one partner.

22 (D) Social and economic inequalities based
23 largely on gender which limit access for women
24 and girls to education and employment opportu-
25 nities and which prevent them from asserting

1 their inheritance and property rights. For many
2 women, a lack of independent economic means
3 sustains their fear of abandonment, eviction, or
4 ostracism from their homes and communities,
5 and can leave many more of them trapped with-
6 in relationships where they are vulnerable to
7 HIV infection.

8 (E) A lack of educational opportunities for
9 women and girls which are linked to delayed
10 intercourse, increased age-at-marriage, delayed
11 childbearing, increased child survival, improved
12 nutrition, and reduced risk of HIV infection,
13 among other positive outcomes.

14 (F) High rates of gender-based violence,
15 rape, and sexual coercion within and outside of
16 marriage. According to the WHO, between one-
17 sixth and three-quarters of women in various
18 countries and settings have experienced some
19 form of physical or sexual violence since age 15.

20 (G) Fear of domestic violence and the con-
21 tinuing stigma and discrimination associated
22 with HIV/AIDS prevents many women from ac-
23 cessing information about HIV/AIDS, getting
24 tested, disclosing their HIV status, accessing
25 services to prevent mother-to-child trans-

1 mission, or receiving treatment and counseling
2 even when they already know they have been in-
3 fected with HIV.

4 (H) An increase in commercial sex for sur-
5 vival, due to pervasive poverty, social disloca-
6 tion, war and internal conflicts, and other fac-
7 tors. According to UNAIDS, the vulnerability
8 of sex workers to HIV infection is heightened
9 by stigmatization and marginalization, limited
10 economic options, limited access to health, so-
11 cial, and legal services, limited access to infor-
12 mation and prevention means, gender-related
13 differences and inequalities, sexual exploitation
14 and trafficking, harmful or nonprotective legis-
15 lation and policies, and exposure to risks associ-
16 ated with commercial sex such as violence, sub-
17 stance use, and increased mobility.

18 (I) Lack of access to basic HIV prevention
19 information, education, and services, and lack
20 of coordination with existing reproductive
21 health services to reduce stigma and maximize
22 coverage.

23 (J) Lack of access to currently available
24 female-controlled HIV prevention methods, such

1 as the female condom, and lack of training on
2 proper use of either male or female condoms.

3 (K) High rates of other sexually trans-
4 mitted infections, unintended pregnancy, and
5 complications during pregnancy and childbirth.

6 (L) An absence of legal frameworks de-
7 signed to protect the rights of women and girls
8 and the lack of accountable and effective en-
9 forcement of such frameworks, where they exist.

10 (5) Efforts to increase women's access to com-
11 prehensive prevention information and services, ad-
12 dress gender violence, increase women's economic
13 and social status, and foster equitable partnerships
14 between women and men are all central to reducing
15 the spread of HIV/AIDS worldwide and to enhanc-
16 ing the success of effective treatment and care pro-
17 grams supported by the United States.

18 (6) The comprehensive, integrated, five-year
19 strategy to combat global HIV/AIDS submitted to
20 Congress on February 23, 2004, as required by sec-
21 tion 101 of the United States Leadership Against
22 HIV/AIDS, Tuberculosis, and Malaria Act of 2003
23 (Public Law 108-25; 22 U.S.C. 7611), does not
24 adequately focus or provide sufficient details on how
25 the United States Government plans to address the

1 factors that lead to gender disparities in the rate of
2 HIV infection in order to successfully prevent HIV
3 infection among both married and unmarried women
4 and girls.

5 **SEC. 3. STRATEGY TO PREVENT HIV INFECTIONS AMONG**
6 **MARRIED AND UNMARRIED WOMEN AND**
7 **GIRLS.**

8 (a) STATEMENT OF POLICY.—In order to meet the
9 stated goal of preventing 7,000,000 new HIV infections
10 worldwide, as announced by President George W. Bush
11 in his address to Congress on January 28, 2003, it shall
12 be the policy of the United States to pursue a global HIV
13 prevention strategy that emphasizes the immediate and
14 ongoing needs of married and unmarried women and girls
15 and addresses the factors that lead to gender disparities
16 in the rate of HIV infection.

17 (b) STRATEGY.—Not later than 180 days after the
18 date of the enactment of this Act, the President shall for-
19 mulate and submit to the appropriate congressional com-
20 mittees, and make available to the public, a comprehen-
21 sive, integrated, and culturally relevant global HIV pre-
22 vention strategy that addresses the vulnerabilities of mar-
23 ried and unmarried women and girls to HIV infection and
24 seeks to reduce the factors that lead to gender disparities
25 in the rate of HIV infection. The strategy shall encompass

1 comprehensive health and HIV prevention education at
2 the individual and population level beyond the ABC model
3 (“Abstain, Be faithful, use Condoms”) as a means to re-
4 duce HIV infections and shall include the following strate-
5 gies:

6 (1) Empowering women and girls to avoid
7 cross-generational sex and to decide when and whom
8 to marry in order to reduce the incidence of early-
9 or child-marriage.

10 (2) Dramatically increasing access to currently
11 available female-controlled prevention methods and
12 including investments in training to increase the ef-
13 fective and consistent use of both male and female
14 condoms.

15 (3) Accelerating the destigmatization of HIV/
16 AIDS, as women are generally at a disadvantage in
17 combating stigma.

18 (4) Addressing and preventing the consequences
19 of gender based violence and rape against women
20 and girls.

21 (5) Promoting male attitudes and behavior that
22 respect the human rights of women and girls and
23 that support and foster gender equality.

24 (6) Supporting the development of micro-enter-
25 prise initiatives, job training programs, and other

1 such efforts to assist women in developing and re-
2 taining independent economic means.

3 (7) Supporting expanded educational opportuni-
4 ties for women and girls.

5 (8) Protecting the property and inheritance
6 rights of women.

7 (9) Coordinating HIV prevention information
8 and education services and programs for people liv-
9 ing with HIV/AIDS with existing health care serv-
10 ices targeted to women and girls, such as family
11 planning, comprehensive reproductive health serv-
12 ices, and programs to reduce the transmission of
13 HIV between parents and children, and expanding
14 the reach of such health services.

15 (10) Promoting gender equality by supporting
16 the development of civil society organizations focused
17 on the needs of women and utilizing such organiza-
18 tions that are already empowering women and girls
19 at the community level.

20 (11) Encouraging the creation and effective en-
21 forcement of legal frameworks that guarantee
22 women equal rights and equal protection under the
23 law.

24 (12) Encouraging the participation and involve-
25 ment of women in drafting, coordinating, and imple-

1 menting the national HIV/AIDS strategic plans of
2 their countries.

3 (13) Responding to other economic and social
4 factors that increase the vulnerability of women and
5 girls to HIV infection.

6 (c) COORDINATION.—In formulating and imple-
7 menting the global HIV prevention strategy pursuant to
8 subsection (b), the President shall ensure that the United
9 States coordinates its overall HIV/AIDS policy and pro-
10 grams with the national governments of the countries for
11 which the United States provides assistance to combat
12 HIV/AIDS and with international organizations, other
13 donor countries, and indigenous organizations, including,
14 specifically, organizations focused on or providing services
15 to expanding and enforcing women’s rights, improving
16 women’s health, and expanding education for women and
17 girls, and organizations providing services to and advo-
18 cating on behalf of individuals living with and affected by
19 HIV/AIDS.

20 (d) GUIDANCE.—The President shall provide clear
21 guidance to field missions of the United States Govern-
22 ment in countries for which the United States provides
23 assistance to combat HIV/AIDS, based on the strategies
24 specified under subsection (b), and shall submit to the ap-

1 appropriate congressional committees and make available to
2 the public such guidance.

3 (e) REPORT.—Not later than one year after the date
4 of the enactment of this Act and annually thereafter as
5 part of the annual report required under section 104A(e)
6 of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b–
7 2(e)), the President shall submit to the appropriate con-
8 gressional committees and make available to the public a
9 report on the implementation of this Act for the prior fis-
10 cal year. The report shall include the following informa-
11 tion:

12 (1) A description of the prevention programs
13 designed to address the vulnerabilities to HIV/AIDS
14 of married and unmarried women and girls.

15 (2) A list of all nongovernmental organizations
16 in each country that receive assistance from the
17 United States to carry out HIV prevention activities,
18 including the amount and the source of funding re-
19 ceived.

20 **SEC. 4. BALANCING FUNDING FOR HIV PREVENTION METH-**
21 **ODS.**

22 (a) FINDINGS.—Congress finds the following:

23 (1) While effective evidence-based and measur-
24 able strategies for delaying sexual debut are critical
25 components of comprehensive HIV prevention pro-

1 grams, current United States funded HIV preven-
2 tion programs based on the ABC model of “Abstain,
3 Be faithful, use Condoms” are too narrow in scope
4 and do not respond to the specific vulnerabilities of
5 women and girls.

6 (2) In order to maximize the impact of United
7 States foreign assistance to combat HIV/AIDS, all
8 sexually active persons in each country must be
9 equipped with all the skills and tools necessary to
10 avoid infection, including information and training
11 on delay of sexual debut and the practice of safer
12 sex, whether sexual activity begins within or outside
13 of marriage.

14 (3) Under section 403(a) of the United States
15 Leadership Against HIV/AIDS, Tuberculosis, and
16 Malaria Act of 2003 (Public Law 108–25; 22 U.S.C.
17 7673), 33 percent of all United States foreign assist-
18 ance provided for preventing the spread of HIV
19 must be spent on abstinence-until-marriage pro-
20 grams. Based on operational guidance to field mis-
21 sions of the United States Government, in order to
22 meet this requirement, 50 percent of all United
23 States foreign assistance provided for preventing the
24 spread of HIV at the country level must be spent on
25 prevention of sexual transmission and 66 percent of

1 all such funding for sexual transmission must be
2 spent on the Abstinence and Be faithful components
3 of the ABC model.

4 (4) A recent report by the Government Ac-
5 countability Office (Global Health: Spending Re-
6 quirement Presents Challenges for Allocating Pre-
7 vention Funding under the President’s Emergency
8 Plan for AIDS Relief, GAO–06–395, April 4, 2006)
9 found the following:

10 (A) Because it requires country teams to
11 segregate the Abstinence and Be faithful com-
12 ponents of the ABC model from funding for
13 “other prevention”, the abstinence-until-mar-
14 riage spending requirement can undermine the
15 team’s ability to design and implement pro-
16 grams that integrate the components of the
17 ABC model, one of the guiding principles of the
18 President’s Emergency Plan for AIDS Relief
19 (PEPFAR) sexual transmission prevention
20 strategy. Eight of the 15 focus country teams
21 indicated that segregating the Abstinence and
22 Be faithful components of the ABC model from
23 “other prevention” funding compromised the in-
24 tegration of their programs. Examples of the
25 problems they cited include the following:

1 (i) Segregating program funding com-
2 promises the integration of ABC activities,
3 especially for at-risk groups that need com-
4 prehensive messages.

5 (ii) Segregating program funding lim-
6 its some country teams' ability to shift pro-
7 gram focuses to meet changing prevention
8 needs.

9 (B) A large majority of the 20 PEPFAR
10 country teams required to meet the abstinence-
11 until-marriage spending requirement or obtain
12 exemptions reported that the requirement pre-
13 sented challenges to their efforts to respond to
14 local prevention needs. Seventeen of these
15 teams reported, either through documents sub-
16 mitted to the Office of the Global AIDS Coordi-
17 nator (OGAC) or through structured interviews,
18 that meeting the spending requirement, includ-
19 ing OGAC's 50 percent and 66 percent policies
20 implementing it, challenged their ability to de-
21 velop interventions that are responsive to local
22 epidemiology and social norms.

23 (C) Between September 2005 and January
24 2006, ten of these teams submitted documents
25 to OGAC requesting exemption from the spend-

1 ing requirement as it was defined in OGAC's
2 August 2005 guidance. These documents high-
3 light various challenges that the country teams
4 associated with meeting the spending require-
5 ment, including the following:

6 (i) Reduced spending for Prevention
7 of Mother to Child Transmission
8 (PMTCT).

9 (ii) Limited funding to deliver appro-
10 priate prevention messaging to high-risk
11 groups.

12 (iii) Lack of responsiveness to cultural
13 and social norms.

14 (iv) Cuts in medical and blood safety
15 activities.

16 (v) Elimination of care programs.

17 (D) In addition, seven teams that did not
18 submit documents requesting exemption from
19 the spending requirement (they did not meet
20 OGAC's proposed criteria for requesting exemp-
21 tions) identified, in structured interviews, spe-
22 cific program constraints related to meeting the
23 abstinence-until-marriage spending requirement.
24 These constraints included the following:

1 (i) Difficulty reaching certain popu-
2 lations with comprehensive ABC messages.

3 (ii) Limited or reduced funding for
4 programs targeted at high-risk groups.

5 (iii) Reduced funding for PMTCT
6 services.

7 (iv) Difficulty funding programs for
8 condom procurement and condom social
9 marketing.

10 (b) STATEMENT OF POLICY.—In carrying out the ac-
11 tivities required by the United States Leadership Against
12 HIV/AIDS, Tuberculosis, and Malaria Act of 2003 (Public
13 Law 108–25; 22 U.S.C. 7601 et seq.) and the amend-
14 ments made by that Act, it shall be the policy of the
15 United States—

16 (1) to provide flexibility to support the imple-
17 mentation of culturally relevant HIV prevention pro-
18 grams that are carried out in accordance with the
19 global HIV prevention strategy established pursuant
20 to section 3 of this Act;

21 (2) to ensure that onerous requirements are not
22 imposed with respect to how funds made available
23 for such programs can be obligated and expended;
24 and

1 (3) to prevent the unnecessary reduction in
2 funding for effective HIV programs in order to meet
3 any such onerous requirements.

4 (c) AMENDMENTS TO FUNDING PROVISIONS OF THE
5 UNITED STATES LEADERSHIP AGAINST HIV/AIDS, TU-
6 BERCULOSIS, AND MALARIA ACT OF 2003.—

7 (1) SENSE OF CONGRESS.—Section 402(b)(3)
8 of the United States Leadership Against HIV/AIDS,
9 Tuberculosis, and Malaria Act of 2003 (22 U.S.C.
10 7672(b)(3)) is amended by striking “, of which such
11 amount at least 33 percent should be expended for
12 abstinence-until-marriage programs”.

13 (2) ALLOCATION OF FUNDS.—Section 403(a) of
14 such Act (22 U.S.C. 7673(a)) is amended by strik-
15 ing the second sentence.

16 **SEC. 5. DEFINITIONS.**

17 In this Act:

18 (1) AIDS.—The term “AIDS” means the ac-
19 quired immune deficiency syndrome.

20 (2) APPROPRIATE CONGRESSIONAL COMMIT-
21 TEES.—The term “appropriate congressional com-
22 mittees” means the Committee on Foreign Affairs of
23 the House of Representatives and the Committee on
24 Foreign Relations of the Senate.

1 (3) HIV.—The term “HIV” means the human
2 immunodeficiency virus, the pathogen that causes
3 AIDS.

4 (4) HIV/AIDS.—The term “HIV/AIDS”
5 means, with respect to an individual, an individual
6 who is infected with HIV or living with AIDS.

○
