

110TH CONGRESS
1ST SESSION

H. R. 1881

To improve support and services for individuals with autism and their families.

IN THE HOUSE OF REPRESENTATIVES

APRIL 17, 2007

Mr. DOYLE (for himself, Mr. SMITH of New Jersey, Mr. ENGEL, and Mr. PICKERING) introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To improve support and services for individuals with autism and their families.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Expanding the Prom-
5 ise for Individuals With Autism Act of 2007”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) Autism is a complex developmental dis-
9 ability that affects the functioning of the brain and
10 lasts through a person’s lifetime.

1 (2) Individuals living with autism have the
2 same rights as other individuals to exert control and
3 choice over their own lives, to live independently,
4 and to fully participate in and contribute to their
5 communities through full integration and inclusion
6 in the economic, political, social, cultural, and edu-
7 cational mainstream of society.

8 (3) The prevalence of autism appears to be
9 growing. The Centers for Disease Control and Pre-
10 vention report that in 2007, autism affects 1 in
11 every 150 children and 1,500,000 Americans have
12 autism.

13 (4) Both children and adults with autism typi-
14 cally show difficulties in verbal and nonverbal com-
15 munication, social interactions, and sensory proc-
16 essing. Individuals with autism exhibit different
17 symptoms or behaviors, which may range from mild
18 to significant, and require varying degrees of sup-
19 port from their friends, families, and communities.

20 (5) Although the overall incidence of autism is
21 consistent around the globe, it is 4 times more prev-
22 alent in boys than in girls. Autism knows no racial,
23 ethnic, or social boundaries, or differences in family
24 income, lifestyle, or educational levels and can affect
25 any family and any child.

1 (6) Individuals with autism often need assist-
2 ance in the areas of early intervention, education,
3 employment, transportation, housing, health, and
4 recreation. With access to these types of services and
5 supports, individuals with autism can live full, rich,
6 productive lives. Greater coordination within the
7 service delivery system will enable individuals and
8 families to access assistance from all sectors
9 throughout the lifespan, thus facilitating the appro-
10 prium delivery of information, education, and serv-
11 ices.

12 (7) There is strong consensus within the re-
13 search community that intensive intervention started
14 as soon as possible following diagnosis yields the
15 most positive outcomes for children with autism.

16 (8) The limited amount of credible evidence-
17 based research on services to children and adults
18 with autism is a major impediment to the develop-
19 ment of quality services. Without this base of re-
20 search, many services and supports for individuals
21 with autism are not covered by private or public
22 health insurance programs, nor are certain interven-
23 tions provided as part of a child's special education
24 individualized education plan. As a result, individ-
25 uals and families who wish to access services are

1 often only able to do so through incurring significant
2 nonreimbursable costs.

3 (9) Workforce shortages contribute to the lim-
4 ited availability of treatments, interventions, and
5 supports. There is a need for more professionals who
6 can appropriately provide employment, residential,
7 and other community-based services to adults with
8 autism, as well as a need for professionals who can
9 appropriately diagnose autism in very young chil-
10 dren, and those who can develop appropriate evi-
11 dence-based treatments, interventions, and supports
12 across the lifespan of individuals with autism.

13 (10) The combined characteristics of an indi-
14 vidual with autism, a lack of or limited verbal com-
15 munication, the inability to gauge social cues, and
16 challenging behaviors, has resulted in a growing
17 need for community-based individual and family sup-
18 port services and increased monitoring for abuse, ne-
19 glect, and rights violations.

20 (11) Preliminary numbers on 20 States indicate
21 that in 2006, almost a quarter of individuals served
22 under protection and advocacy programs for individ-
23 uals with developmental disabilities were individuals
24 with autism, a 6 percent increase from the previous

1 year, yet thousands of individuals with autism were
2 unable to access services due to a lack of resources.

3 (12) Whatever their individual needs, children
4 and adults with autism should receive the treat-
5 ments, interventions, services, and programs that
6 will enable them to fully participate in and enjoy a
7 good quality of life in their communities.

8 **SEC. 3. AMENDMENT TO THE PUBLIC HEALTH SERVICE**
