To improve public awareness in the United States among older individuals and their families and caregivers about the impending Digital Television Transition through the establishment of a Federal interagency taskforce between the Federal Communications Commission, the Administration on Aging, the National Telecommunications and Information Administration, and the outside advice of appropriate members of the aging network and industry groups.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

2 (a) SHORT TITLE.—This Act may be cited as the  
3 “Preparing America’s Seniors for the Digital Transition  
4 Act of 2007”.

5 (b) TABLE OF CONTENTS.—The table of contents for  
6 this Act is as follows:

- Sec. 1. Short title; table of contents.
- Sec. 2. Findings.
- Sec. 3. DTV educational partnership to benefit older individuals.
- Sec. 4. Provisions relating to forfeitures.
- Sec. 5. Digital television transition public education outreach and installation assistance grants program.
- Sec. 6. Modification of the digital-to-analog converter box program.
- Sec. 7. Reporting requirements.

7 **SEC. 2. FINDINGS.**

8 Congress finds that—

9 (1) on February 17, 2009, television stations  
10 will cease broadcasting analog signals and tradi-  
11 tional analog televisions will stop working unless  
12 they are connected to a digital-to-analog converter  
13 box, cable, or satellite;

14 (2) a study conducted by the National Associa-  
15 tion of Broadcasters revealed that over half of the  
16 respondents had “seen, read, or heard nothing”  
17 about the transition to digital television, and only 10  
18 percent were able to guess that the transition would  
19 occur in 2009;

20 (3) according to a July 2007 study released by  
21 the Association of Public Television Stations, older  
22 individuals—

1 (A) over the age of 65 are more likely to  
2 be found in over-the-air households and are,  
3 therefore, a much more vulnerable group with  
4 respect to maintaining television service as the  
5 digital transition is completed;

6 (B) as a group, are less likely to have pur-  
7 chased a new television in the past 3 years, are  
8 less likely to have HDTV capabilities in their  
9 households, and are less likely to own a digital  
10 television;

11 (C) will not have the same exposure to dig-  
12 ital television transition messages from elec-  
13 tronic retailers as will younger members of the  
14 population; and

15 (D) will need special focus in efforts to  
16 educate the public with respect to the transition  
17 from analog to digital television;

18 (4) according to a Nielsen Media Research re-  
19 port, approximately 20,000,000 households rely ex-  
20 clusively on analog or free over-the-air broadcasts;

21 (5) of these 20,000,000 households, approxi-  
22 mately 8,000,000 include at least 1 person over the  
23 age of 50, according to the Nielsen Media Research  
24 TV Household Estimates;

1           (6) according to the General Accountability Of-  
2           fice, about 48 percent of over-the-air households  
3           have incomes under \$30,000;

4           (7) frail, homebound, rural, minority, disabled,  
5           limited English proficient, and low-income older in-  
6           dividuals will need specific guidance and assistance  
7           in order to purchase and properly install a digital-  
8           to-analog converter box;

9           (8) without a targeted outreach program resi-  
10          dents in nursing homes and assisted living facilities  
11          represent a segment of the population at risk for los-  
12          ing television service as a result of the digital transi-  
13          tion;

14          (9) failure to seamlessly transition from analog  
15          to digital television will restrict or eliminate the ac-  
16          cess of older individuals to essential preparedness  
17          and safety information in the event of an emergency  
18          or disaster, as such individuals will be unable to re-  
19          ceive national and local alerts aired over television;

20          (10) it is now 6 years after the communication  
21          failures of September 11, 2001, which spurred Fed-  
22          eral Government adoption of a firm digital television  
23          transition date;

24          (11) unfortunately the Department of Com-  
25          merce and the Federal Communications Commission

1 have not adequately assured Congress that vulner-  
2 able households will be properly educated and pre-  
3 pared for such transition; and

4 (12) older individuals, their families, caregivers,  
5 and aging support networks will need targeted out-  
6 reach to inform them of steps to take in order to en-  
7 sure uninterrupted television service and to help  
8 mitigate potential digital television transition scams  
9 that may target the elderly.

10 **SEC. 3. DTV EDUCATIONAL PARTNERSHIP TO BENEFIT**  
11 **OLDER INDIVIDUALS.**

12 Part I of title III of the Communications Act of 1934  
13 (47 U.S.C. 301 et seq.) is amended by adding at the end  
14 the following:
