1 **SEC. 2. FINDINGS AND PURPOSES.**

2 (a) FINDINGS.—Congress finds the following:

3 (1) Cruise vessels carry millions of people
 4 through North American waters each year, showcase
 5 some of the most beautiful ocean areas in the United
 6 States, and provide opportunities for passengers to
 7 relax and enjoy the oceans and marine ecosystems.

8 (2) A single cruise vessel generates a tremen-
 9 dous amount of waste each week, including an esti-
 10 mated 140,000 to 210,000 gallons of blackwater
 11 (sewage) and 1,000,000 gallons of graywater (in-
 12 cluding wastewater from dishwashers, showers, laun-
 13 dry, baths, and washbasins). Onboard amenities
 14 such as photo-processing, dry-cleaning, and hair-
 15 dressing also generate hazardous waste streams.

16 (3) In its final report, “An Ocean Blueprint for
 17 the 21st Century”, released in 2004, the United
 18 States Commission on Ocean Policy found that these
 19 waste streams and the cumulative impacts caused
 20 when cruise vessels repeatedly visit the same envi-

1 ronmentally sensitive areas, “if not properly dis-
2 posed of and treated, can be a significant source of
3 pathogens and nutrients with the potential to threat-
4 en human health and damage shellfish beds, coral
5 reefs, and other aquatic life,” thus threatening the
6 very environments cruise vessel passengers seek to
7 explore.

8 (4) The cruise industry has grown by more
9 than 6 percent annually since 2003 and is projected
10 to continue growing. Cruise vessel capacity is also
11 expanding dramatically; today cruise vessels can
12 transport 5,000 passengers and crew members, but
13 the next generation of cruise vessels is expected to
14 carry 7,000 passengers and crew members. As the
15 total number of passengers increases and the num-
16 ber of passengers per ship increases, the volume of
17 waste entering these ocean ecosystems and the im-
18 pact of that waste on ocean ecosystems will also in-
19 crease.

20 (5) In a 2005 report requested by the Inter-
21 national Council of Cruise Lines, the Ocean Con-
22 servation and Tourism Alliance (OCTA) Science
23 Panel recommended that “[a]ll blackwater should be
24 treated”, that discharging treated blackwater should
25 be “avoided in ports, close to bathing beaches or

1 water bodies with restricted circulation, flushing or
2 inflow”, and that blackwater should not be dis-
3 charged within 4 nautical miles of shellfish beds,
4 coral reefs, or other sensitive habitats.

5 (6) The OCTA Science Panel further rec-
6 ommended that graywater be treated in the same
7 manner as blackwater and that sewage sludge be off-
8 loaded to approved land-based facilities.

9 (7) The United States lacks a comprehensive
10 wastewater management policy for large passenger
11 vessels, and a new statutory regime for managing
12 wastewater discharges from large passenger vessels
13 that applies throughout the United States is needed
14 to protect coastal and ocean areas from pollution
15 generated by cruise vessels, to reduce and better reg-
16 ulate discharges from cruise vessels, and to improve
17 monitoring, reporting, and enforcement of standards
18 regarding discharges.

19 (b) PURPOSE.—The purpose of this Act is to protect
20 the health and beauty of the marine and coastal eco-
21 systems that cruise passengers enjoy, by—

22 (1) prohibiting the discharge of any untreated
23 sewage, graywater, or bilge water from a cruise ves-
24 sel calling on a port of the United States into the
25 waters of the United States;

1 (2) prohibiting the discharge of any sewage
2 sludge, incinerator ash, or hazardous waste from a
3 cruise vessel calling on a port of the United States
4 into the waters of the United States;

5 (3) establishing new national effluent limits for
6 the discharge of treated sewage, treated graywater,
7 and treated bilge water from cruise vessels not less
8 than 12 miles from shore in any case in which the
9 discharge is not within an area in which discharges
10 are prohibited; and

11 (4) ensuring that cruise vessels calling on ports
12 of the United States comply with all applicable envi-
13 ronmental laws.
