

110TH CONGRESS
2D SESSION

S. 3530

To establish the Stephanie Tubbs Jones Gift of Life Medal for organ donors
and the family of organ donors.

IN THE SENATE OF THE UNITED STATES

SEPTEMBER 22 (legislative day, SEPTEMBER 17), 2008

Mr. BROWN introduced the following bill; which was read twice and referred
to the Committee on Banking, Housing, and Urban Affairs

A BILL

To establish the Stephanie Tubbs Jones Gift of Life Medal
for organ donors and the family of organ donors.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; FINDINGS.**

4 (a) SHORT TITLE.—This Act may be cited as the
5 “Stephanie Tubbs Jones Gift of Life Medal Act of 2008”.

6 (b) FINDINGS.—The Congress makes the following
7 findings:

8 (1) Congresswoman Stephanie Tubbs Jones was
9 dedicated to eliminating health disparities and pro-
10 tecting vulnerable populations.

5 (3) Congresswoman Stephanie Tubbs Jones'
6 concern for others was demonstrated by the decision
7 to donate her organs, so that as her life ended, the
8 lives of others continued.

14 (5) Minority populations account for nearly 50
15 percent of those on the national transplant waiting
16 list.

17 (6) Diseases that can lead to organ failure,
18 such as hypertension and diabetes, are found more
19 frequently in ethnic minority populations than in the
20 general population.

21 (7) While minorities donate organs in proportion
22 to their population, the rate of organ donations
23 fails to keep pace with the need for transplants in
24 the population. African-Americans, for example, rep-
25 resent about 13 percent of the population and 12

1 percent of organ donors, but comprise roughly 23
2 percent of individuals on national transplant waiting
3 list for kidney transplants.

4 (8) Transplantation success rates are higher
5 when organs are matched between people sharing
6 the same racial and ethnic background.

7 (9) Because of the disparities in the need for
8 organs, minorities are more likely to wait longer to
9 find a successful match and are more likely to be
10 sicker when an organ is found.

11 (10) An increase in minority organ donations
12 would decrease the waiting time and increase the
13 likelihood of successful transplantations for minori-
14 ties.
