111TH CONGRESS 1ST SESSION

H. R. 2206

To amend the Safe Drinking Water Act to reauthorize the technical assistance to small public water systems, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

April 30, 2009

Mr. Etheridge (for himself, Mr. Dicks, Mr. Butterfield, Mr. Rodriguez, Mr. Skelton, Mr. Teague, Ms. Markey of Colorado, Mr. Ortiz, Mr. Ross, Ms. Bordallo, Mr. Carney, Mr. Jones, Mr. Heinrich, Mr. Hare, Mr. Shimkus, Mr. Cleaver, Mr. McIntyre, Mr. Pierluisi, Mr. Perriello, Mr. Filner, Mrs. Halvorson, and Mr. Tonko) introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To amend the Safe Drinking Water Act to reauthorize the technical assistance to small public water systems, and for other purposes.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,
- 3 SECTION 1. SHORT TITLE.
- 4 This Act may be cited as the "Grassroots Rural
- 5 Water Systems Act".
- 6 SEC. 2. FINDINGS.
- 7 (a) FINDINGS.—Congress finds the following:

- (1) The 1996 Amendments to the Safe Drinking Water Act authorized technical assistance for small and rural communities to assist them with compliance with rules and regulations promulgated under the Act. Technical assistance and compliance training ensures that Federal regulations do not overwhelm small and rural communities' resources. It also allows small communities lacking technical resources access to assistance necessary to improve and protect their water resources.
 - (2) Under this authorization, locally supported technical assistance initiatives have been operating nationwide for the past three decades and have been the main source of compliance and assistance for small and rural communities to meet federal standards. Without these initiatives, effective implementation of the Safe Drinking Water Act and Clean Water Act in rural areas would be nearly impossible.
 - (3) Across the States, over 90 percent of the community water systems serve a population less than 10,000. Small communities have the greatest difficulty providing safe, affordable public drinking water and wastewater services due to limited economies of scale and less technical expertise.

1 (4) In addition to being the main source of 2 compliance assistance, rural water technical assistance has been the main source of assistance in emer-3 gency response in small and rural communities. Rural water technicians were the lead assistance in 6 Greensburg, Kansas, in restoring the drinking water 7 and sanitary sewer service to that tornado-stricken 8 small community (providing water to the temporary 9 hospital, housing units, and to the community in 10 time). This was also the case in the response to the 11 hurricanes in the gulf coast where the hundreds of 12 small and rural communities relied on assistance 13 from the local and surrounding State rural water as-14 sociations for immediate assistance in restoring 15 drinking water and sanitation service.

16 SEC. 3. SENSE OF CONGRESS.

- 17 It is the sense of the Congress that—
- 18 (1) to most effectively assist small communities, 19 the Environmental Protection Agency should 20 prioritize the type of technical assistance that small 21 communities find is the most beneficial;
 - (2) it is essential for the agency to consider and prioritize the type and manner of technical assistance that has the most support of each State's local communities; and

24

25

1 (3) local support is the fundamental key to 2 making the Federal funding (the Federal assistance 3 initiatives) work in small and rural communities to 4 the maximum benefit.

5 SEC. 4. FUNDING PRIORITIES.

- Section 1442(e) of the Safe Drinking Water Act (42
 U.S.C. 300j-1(e)) is amended as follows:
- 8 (1) In the fifth sentence by striking 9 "15,000,000" and inserting "20,000,000" and by 10 striking "1997 through 2003" and inserting "2010 11 through 2015".
- 12 (2) By inserting "(1)" immediately before the 13 first sentence.
- 14 (3) By adding the following new paragraph at 15 the end thereof:
 - "(2) The Administrator may provide technical assistance, with funds under this subsection, to non-profit organizations providing on-site technical assistance, circuit-rider technical assistance programs, on-site and regional training, assistance with implementing source water protection plans, and assistance with implementation monitoring plans, rules, regulations, and water security enhancements. To assure technical assistance funding under this subsection is used in a manner most beneficial to small

communities in each State, the Administrator shall give preference to nonprofit organizations that, as determined by the Administrator, are most qualified and most effective, and have the majority of support from small community water systems in the States.".
