 17 Atomic Energy Defense Act (50 U.S.C. 2521) to deter-
 18 mine if the program was functioning, as of December
 19 2008, as envisioned when the program was established.

20 (b) ELEMENTS.—The study required by subsection
 21 (a) shall include the following:

22 (1) An assessment of whether the capabilities
 23 determined to be necessary to maintain the nuclear
 24 weapons stockpile without nuclear testing have been

1 implemented and the extent to which such capabili-
2 ties are functioning.

3 (2) A review and description of the agreements
4 governing use, management, and support of the ca-

12 **SEC. 3138. SENSE OF THE SENATE ON PRODUCTION OF MO-**
 13 **LYBDENUM-99.**

14 (a) FINDINGS.—The Senate makes the following
 15 findings:

16 (1) There are fewer than five reactors around
 17 the world currently capable of producing molyb-
 18 denum-99 (Mo-99) and there are no such reactors
 19 in the United States that can provide a reliable sup-
 20 ply of Mo-99 to meet medical needs.

21 (2) Since November 2007, there have been
 22 major disruptions in the global availability of Mo-
 23 99, including at facilities in Canada and the Nether-
 24 lands, which have led to shortages of Mo-99-based

1 medical products in the United States and around
2 the world.

3 (3) Ensuring a reliable supply of medical
4 radioisotopes, including Mo-99, is of great impor-
5 tance to the public health.

6 (4) It is also a national security priority of the
7 United States, and specifically of the Department of
8 Energy, to encourage the production of low-enriched
9 uranium-based radioisotopes in order to promote a
10 more peaceful international nuclear order.

11 (5) The National Academy of Sciences has
12 identified a need to establish a reliable capability in
13 the United States for the production of Mo-99 and
14 its derivatives for medical purposes using low-en-
15 riched uranium.

16 (6) There also exists a capable industrial base
17 in the United States that can support the develop-
18 ment of Mo-99 production facilities and can conduct
19 the processing and distribution of radiopharma-
20 ceutical products for use in medical tests worldwide.

21 (b) SENSE OF THE SENATE.—It is the sense of the
22 Senate that—

23 (1) radioisotopes and radiopharmaceuticals, in-
24 cluding Mo-99 and its derivatives, are essential com-
25 ponents of medical tests that help diagnose and

1 treat life-threatening diseases affecting millions of
 2 people each year; and

3 (2) the Secretary of Energy should continue
 4 and expand a program to meet the need identified
 5 by the National Academy of Sciences to ensure a
 6 source of Mo-99 and its derivatives for use in med-
 7 ical tests to help ensure the health security of the
 8 United States and around the world and promote
 9 peaceful nuclear industries through the use of low-
 10 enriched uranium.

15 relating to the Maritime Administration, not more than
16 five officers of the armed forces may be detailed to the
17 Secretary at any one time, in addition to details author-
18 ized by any other law. During the period of a detail, the
19 Secretary shall pay the officer an amount that, when
20 added to the officer’s pay and allowances as an officer in
21 the armed forces, make the officer’s total pay and allow-
22 ances equal to the amount that would be paid to an indi-
23 vidual performing work the Secretary considers to be of
24 similar importance, difficulty, and responsibility as that
25 performed by the officer during the detail.

2 “(1) CONTRACTS.—In the same manner that a
