

111TH CONGRESS
2D SESSION

S. 3005

To create an independent research institute, to be known as the “National Institute of Finance”, that will oversee the collection and standardization of data on financial entities and activities, and conduct monitoring and other research and analytical activities to support the work of the Federal financial regulatory agencies and the Congress.

IN THE SENATE OF THE UNITED STATES

FEBRUARY 4, 2010

Mr. REED introduced the following bill; which was read twice and referred to the Committee on Banking, Housing, and Urban Affairs

A BILL

To create an independent research institute, to be known as the “National Institute of Finance”, that will oversee the collection and standardization of data on financial entities and activities, and conduct monitoring and other research and analytical activities to support the work of the Federal financial regulatory agencies and the Congress.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) SHORT TITLE.—This Act may be cited as the
5 “National Institute of Finance Act of 2010”.

1 (b) TABLE OF CONTENTS.—The table of contents for
2 this Act is as follows:

3 **SEC. 2. FINDINGS AND PURPOSES.**

4 (a) FINDINGS.—Congress finds the following:

5 (1) The United States is experiencing the worst
6 economic and financial crisis since the Great Depres-
7 sion. The nature of the current crisis is systemic. It
8 was set in motion not by the actions of any single
9 entity, but by a loss of confidence throughout the fi-
10 nancial system as a whole.

11 (2) Such catastrophic events revealed signifi-
12 cant shortcomings in the legal tools available to fi-
13 nancial policymakers. The scale and systemic nature
14 of the crisis calls for a thorough review of the
15 United States' system of financial regulation, to as-
16 sess its capacity to understand, monitor, and re-
17 spond to systemic threats. It is critical that financial
18 regulators have the legal tools they need to act
19 quickly, decisively, effectively, and when appropriate,
20 preemptively, to prevent systemic financial crises in
21 the future and to mitigate their negative impact,
22 should they recur.

23 (3) The recent catastrophic events in financial
24 markets also revealed significant gaps in the infor-
25 mation and analytic tools available to regulators and

1 policymakers charged with ensuring the health of the
2 financial system.

3 (4) Systemic risk involves interactions among
4 financial entities in addition to features of individual
5 firms. Therefore, to understand and monitor the
6 buildup of systemic risk in the financial system re-
7 quires information about such interactions among
8 institutions.

9 (5) Operational methods do not exist by which
10 to measure systemic risks in the United States fi-
11 nancial system. Nor do proven operational tech-
12 niques exist by which regulators can identify the
13 buildup of systemic risks in the United States finan-
14 cial system.

15 (6) Regulators do not have effective methodolo-
16 gies for assessing the effects of particular regulatory
17 actions or approaches on the overall health of the fi-
18 nancial system.

19 (7) Financial regulators do not have the data
20 needed to map the networks of counterparty rela-
21 tionships through which systemic contagion could
22 spread. Nor do they have the analytic tools required
23 to translate such data into useful, actionable infor-
24 mation.

1 (8) Notwithstanding noteworthy efforts from
2 the research community, sustained, large-scale pro-
3 grams of applied research and development nec-
4 essary to create operational systems for under-
5 standing, measuring, and monitoring systemic risk
6 in financial systems have not emerged.

7 (9) There is a substantial amount of high-qual-
8 ity research in academia in relevant disciplines, in-
9 cluding financial economics, statistics, and oper-
10 ations research, but such research tends to focus on
11 theoretical or conceptual innovations that are not
12 immediately reducible to operational practice.

13 (10) The incentives confronting academic re-
14 searchers work against the production of research
15 that does not yield novel theoretical insights or com-
16 putational techniques.

17 (11) The challenges of gaining access to data
18 and obtaining funding from government and indus-
19 try for academic research severely restrict the num-
20 ber of academics working on understanding and
21 monitoring systemic risk in the financial markets.

22 (12) Some of the largest commercial firms
23 make substantial investments in research and devel-
24 opment in the area of quantitative finance, but such
25 commercial research programs are targeted almost

1 exclusively at applications that create commercial
2 value for the firms undertaking the substantial in-
3 vestments necessary to support the programs, and
4 focus primarily on techniques for pricing particular
5 financial instruments and managing firm-specific
6 risks.

7 (13) Financial institutions that sponsor re-
8 search programs usually protect the results of inves-
9 tigations as commercial trade secrets. Even those re-
10 sults that might be useful in application to the anal-
11 ysis of systemic risk are generally not available to
12 the public.

13 (14) No organization anywhere has access to
14 the comprehensive transaction-level data that are
15 necessary to map the network of counterparty rela-
16 tionships in the financial system. Absent such data,
17 it is not possible to evaluate the primary
18 counterparty risks, the extent to which any given
19 firm is vulnerable to the failure of one of its counter-
20 parties, or broader counterparty network risks.

21 (15) It is not possible to understand, assess, or
22 predict how the collapse of one or more institutions
23 might set off a cascade of failure that destabilizes
24 the entire financial system.

1 (16) Without intelligence about the network of
2 counterparty relationships and the liquidity provided
3 by the members of the counterparty network, it is
4 difficult even to identify reliably the set of institu-
5 tions that regulators should deem to be systemically
6 important.

7 (17) Notwithstanding statutory mandates that
8 call for sharing of information among regulatory
9 agencies, United States financial regulators do not
10 require that firms report data in a uniform standard
11 format. The lack of compatibility in the data for-
12 mats used by different agencies implies in practice
13 that agencies find it difficult and expensive to inte-
14 grate data from multiple sources.

15 (18) In periods of financial crisis such as that
16 experienced in the 2 years preceding the date of en-
17 actment of this Act, absence of data comparability
18 becomes a critical handicap, in that dispersed infor-
19 mation cannot quickly be integrated into a com-
20 prehensive framework that could help reveal the con-
21 dition of the financial system as a whole. Without a
22 capacity quickly to compare and integrate financial
23 data of diverse types from multiple sources, regu-
24 lators are unable to analyze the state of the financial
25 system accurately and comprehensively. Nor are they

1 able to foresee, and potentially head off, the onset
2 of a financial crisis.

3 (19) The events of September 2008 offer a so-
4 bering example of the consequences that can flow
5 from an inability quickly to integrate financial data
6 from diverse sources. During several critical days in
7 that month, senior Government officials con-
8 templated the possible consequences of allowing the
9 failure of Lehman Brothers Holdings, Inc. Insofar
10 as the content of their deliberations is accessible in
11 the public record, there is little evidence that such
12 officials had at their disposal an intelligence system
13 that could illuminate the potential consequences of
14 alternative choices. Notwithstanding that the United
15 States Government, through its several agencies, col-
16 lects a broad range of information from financial
17 firms, the events of September 2008 revealed that,
18 at this most critical juncture, these data and accom-
19 panying analytics could not provide financial officials
20 with the information they needed.

21 (20) The creation of a system for collecting and
22 organizing a comprehensive financial transaction
23 database that employs standardized formats is fea-
24 sible.

1 (21) The Enterprise Data Management Coun-
2 cil, an industry consortium, is on record as advo-
3 cating both the feasibility and desirability of bring-
4 ing uniform standards to the collection, reporting,
5 and management of financial transaction data.

6 (22) A leading financial firm has developed for
7 its internal use a system that incorporates com-
8 prehensive reference databases of all legal entities in
9 its counterparty network and of all of the many
10 types of financial instruments in which it transacts.
11 Using the system, the firm can compute its exposure
12 to many of their counterparties within an hour.

13 (23) A leading information technology firm has
14 developed a prototype of an operational system that
15 would support a comprehensive database of financial
16 instruments and transactions across the entire econ-
17 omy, and in collaboration with other private sector
18 firms and public sector entities, is in the process of
19 developing a prototype system for maintaining the
20 needed system-wide reference databases.

21 (24) The community of financial regulators can
22 realize substantial benefits by consolidating into one
23 entity the highly technical tasks of establishing and
24 maintaining uniform standards for reporting finan-
25 cial data, organizing and managing high-volume

1 flows of financial data, providing analytic and high
2 performance computational services, performing ap-
3 plied research and development activities, and con-
4 ducting, coordinating, and sponsoring essential long
5 term, fundamental research in the field of financial
6 analysis and regulatory intelligence.

7 (25) Such technical tasks benefit from increas-
8 ing economies of scale, the total cost of providing
9 such services to the regulatory community promises
10 to be lower if one agency is tasked to provide all of
11 such data, instead of creating redundant and less ef-
12 fective units in each of the several financial regu-
13 latory agencies.

14 (26) An entity that provides access to data and
15 analytic tools to all regulatory agencies on a common
16 basis would help to ensure that all agencies are re-
17 ceiving accurate, consistent, comparable data and
18 analytic tools that can be modified for agency-spe-
19 cific needs.

20 (27) The creation of an entity that creates
21 shared data and analytic services will provide a nat-
22 ural and regular vehicle for the exchange of research
23 and collaboration between regulatory agencies.

24 (28) The emergence of uniform standards for
25 referencing and reporting financial transactions

1 would generate substantial benefits for the financial
2 services industry. There is, at present, no consistent,
3 comprehensive, and universal system for coding,
4 transmitting, and storing financial transaction data.
5 Data reside typically in unconnected databases and
6 spreadsheets, using multiple formats and incon-
7 sistent definitions. The routine conduct of business
8 obliges firms to incur substantial costs to translate
9 and transfer data among otherwise incompatible sys-
10 tems. In addition, this data incomparability impedes
11 the ability of companies to assess their risks accu-
12 rately. The adoption of a common language for data
13 coding and handling would dramatically reduce costs
14 for processing transactions and carrying out other
15 administrative tasks. Standardized reporting would
16 also enable firms to map their counterparty relation-
17 ships more clearly and more easily understand their
18 credit exposures to other firms, a development that
19 promises improvements in risk management prac-
20 tices across the industry.

21 (29) In August 2008, the Counterparty Risk
22 Management Policy Group called for the financial
23 industry to move rapidly toward real-time reconcili-
24 ation and confirmation of financial transactions. In-
25 dustry experts believe that this change would yield

1 substantial benefits to firms individually, to the fi-
2 nancial services industry, and to the economy as a
3 whole. Achieving this goal would not be possible,
4 however, without industry-wide adoption of common
5 standards for coding and handling financial trans-
6 action data. Despite the clear benefits of data stand-
7 ardization and despite years of effort by the indus-
8 try, through consortia such as the Enterprise Data
9 Management Council, the financial services industry
10 has not been able to make meaningful progress to-
11 wards the goal of universal adoption of uniform,
12 consistent standards for data handling.

13 (30) Efforts to see a common set of standards
14 for financial data adopted universally are impeded
15 by so-called “network effects”. The benefits of adop-
16 tion for any one firm depend on the extent to which
17 other firms adopt the same common language. For
18 any one institution, the full benefits are distinctly
19 limited until a critical number of participants in the
20 industry adopt the same standards. In light of these
21 network effects, the adoption of a single data han-
22 dling standard by all industry participants presents
23 a daunting coordination challenge. Each individual
24 firm is discouraged from making the substantial in-
25 vestments required to upgrade its own systems, un-

1 less and until they receive assurance that others in
2 the industry will follow suit. Many firms are defer-
3 ring significant upgrades to their systems until well-
4 defined industry-wide standards are accepted.

5 (31) The financial services industry's historical
6 experience strongly suggests that the industry is un-
7 likely to achieve universal adoption of a single data-
8 handling standard on its own initiative, through ei-
9 ther the decentralized actions of industry partici-
10 pants or through voluntary coordination at the urg-
11 ing of industry consortia or trade associations.
12 Standardization of financial data will require an ex-
13 ternal mandate.

14 (32) The new data standards promulgated for
15 reporting by firms will emerge as the de facto stand-
16 ard for data management in the finance industry, a
17 standard on which firms could converge. Firms
18 could then be confident of realizing a significant re-
19 turn on the investment needed to update their inter-
20 nal systems, knowing that other industry partici-
21 pants were doing likewise.

22 (33) The establishment of Federal requirements
23 for the maintenance and provision of reference data-
24 bases and reporting of transactions and position
25 data to a central repository would assure individual

1 institutions of a significant return on the investment
2 needed to update their internal systems. Firms
3 would benefit from not having to maintain their own
4 unique reference databases, standardized reporting
5 would greatly reduce the cost of reconciling trades
6 and other back office activities, and it would give
7 firms a clear map of their counterparty relation-
8 ships, which would facilitate better risk management
9 across the industry.

10 (34) Once achieved, the universal adoption of
11 standard protocols for handling financial transaction
12 data promises to generate significant and sustained
13 improvements in the efficiency and productivity of
14 the financial services industry in the United States.
15 Such improvements will help to secure and maintain
16 the international leadership position of United
17 States capital markets.

18 (35) United States regulators must never again
19 find themselves confronting a financial crisis without
20 the full set of legal, data, and analytic tools they
21 need to understand, measure, monitor, and respond
22 intelligently to systemic risks that threaten the sta-
23 bility of the United States financial system.

24 (b) PURPOSES.—The purposes of this Act are—

1 (1) to ensure that the financial regulatory com-
2 munity is equipped fully with the data and analytic
3 tools it needs to fulfill its responsibility to safeguard
4 the United States financial system;

5 (2) to reduce the likelihood of another systemic
6 financial crisis occurring;

7 (3) to restore integrity and confidence to the fi-
8 nancial markets of the United States;

9 (4) to provide for the security of the United
10 States economy from potential external threats to
11 the United States financial system;

12 (5) to improve the efficiency of the financial
13 markets in the United States;

14 (6) to reduce the cost and increase the effec-
15 tiveness of coordinated financial regulation in the
16 United States;

17 (7) to help maintain the leadership position of
18 the United States as home to the most efficient,
19 competitive, and productive capital markets in the
20 world; and

21 (8) to help restore and maintain conditions in
22 the United States financial system that will support
23 the creation of wealth and prosperity in the United
24 States.

1 **SEC. 3. DEFINITIONS.**

2 In this Act, the following definitions shall apply:

3 (1) FINANCIAL REGULATORY AGENCY.—The
4 term “financial regulatory agency” means any Fed-
5 eral regulatory agency or body charged with regu-
6 lating, examining, or supervising a financial entity
7 or activity, including any financial systemic risk
8 council or agency established by Congress.

9 (2) INSTITUTE; DIRECTOR; BOARD OF DIREC-
10 TORS.—The terms “Institute”, “Director”, and
11 “Board of Directors” mean the National Institute of
12 Finance, the Director thereof, and the Board of Di-
13 rectors thereof, respectively.

14 (3) FINANCIAL ENTITY.—

15 (A) IN GENERAL.—The term “financial en-
16 tity” means any corporation, partnership, indi-
17 vidual, or other organizational form, whether
18 public or private, used to engage in any type of
19 financial activity that may contribute to sys-
20 temic risk, including any bank, savings associa-
21 tion, credit union, industrial loan company,
22 trust, pension fund, holding company, lender,
23 finance company, mortgage broker, broker-deal-
24 er, mutual fund or other investment company,
25 investment adviser, hedge fund, insurance com-
26 pany, clearinghouse or other central

1 counterparty, exchange, and any other entity or
2 institution that the Director determines, at the
3 formation of the Institute, are necessary for the
4 Institute to complete its duties under this Act.

5 (B) DIRECTOR AUTHORITY.—The Director
6 may, by rule, add new types of entities or insti-
7 tutions to be treated as financial entities for
8 purposes of this Act.

9 (4) SYSTEMIC RISK.—The term “systemic risk”
10 means the risk that a failure or default by a finan-
11 cial entity or entities, or exposures to a financial
12 product or products or activity will produce—

13 (A) significant disruptions to the oper-
14 ations of financial markets;

15 (B) the spreading of financial losses and
16 failures through the financial system; or

17 (C) significant disruption to the broader
18 economy.

19 (5) FINANCIAL CONTRACT.—The term “finan-
20 cial contract” mean a legally binding agreement be-
21 tween 2 or more counterparties, describing rights,
22 and obligations relating to the future delivery of
23 items of intrinsic or extrinsic value among the
24 counterparties.

1 (6) FINANCIAL INSTRUMENT.—The term “fi-
2 nancial instrument” means a financial contract in
3 which the terms and conditions are publicly avail-
4 able, and the roles of 1 or more of the counterpar-
5 ties are assignable without the consent of any of the
6 other counterparties, including common stock of a
7 publicly traded company, government bonds, and ex-
8 change traded futures and options contracts.

9 (7) FINANCIAL ENTITY REFERENCE DATA-
10 BASE.—The term “financial entity reference data-
11 base” means a comprehensive list of financial enti-
12 ties that may be counterparties to financial trans-
13 actions or referenced in the contractual structure of
14 a financial instrument. For each financial entity, the
15 database shall include, but not be limited to a
16 unique identifier, and sufficient information to dif-
17 ferentiate the entity from every other entity, includ-
18 ing an exact legal name and an address for each
19 company, and an exact legal name and a social secu-
20 rity number for each American citizen. For financial
21 entities that are legally owned by or otherwise con-
22 tained within other financial entities, the database
23 shall include such information.

24 (8) FINANCIAL INSTRUMENT REFERENCE
25 DATABASE.—The term “financial instrument ref-

1 erence database” means a comprehensive list of
2 unique financial instruments. For each financial in-
3 strument, the database shall include a unique identi-
4 fier and a comprehensive description of the contrac-
5 tual structure of the instrument as well as all ex-
6 press terms governing the interpretation and imple-
7 mentation of the contract, including jurisdiction,
8 force majeure, and dispute resolution. The contrac-
9 tual structure shall include the financial and eco-
10 nomic obligations and rights, both express and im-
11 plied, and including through legal agreements such
12 as netting agreements, established among all of the
13 counterparties having identified roles in the contract,
14 including advisors, principals, trustees, custodians,
15 guarantors, prime brokers, executing brokers, clear-
16 ing brokers, and issuers of securities. An electronic
17 copy of the prospectus for each financial instrument
18 for which a prospectus was created or distributed
19 shall also be contained in the database.

20 (9) FINANCIAL TRANSACTION DATA.—The term
21 “financial transaction” means the explicit or implicit
22 creation of a financial contract where at least one of
23 the counterparties is required to report to the Insti-
24 tute. The data describing the transaction shall in-
25 clude the structure of the contract created in the

1 transaction, as well as all express terms governing
2 the interpretation and implementation of the con-
3 tract, including jurisdiction, force majeure, and dis-
4 pute resolution. The contractual structure shall in-
5 clude clearly identified counterparties, clearly identi-
6 fied financial instruments (when used as part of the
7 structure of the contract), and the financial and eco-
8 nomic obligations and rights, both express and im-
9 plied, established among all of the counterparties
10 with identified roles in the contract.

11 (10) POSITION DATA.—The term “position”
12 means a financial asset or liability held on the bal-
13 ance sheet of a financial entity. A new position is
14 created, or the quantity of an existing position is
15 changed, by the execution of a financial transaction
16 involving the financial entity as a counterparty. Po-
17 sition data include—

18 (A) the counterparty identifier;

19 (B) a contract identifier;

20 (C) the role of the counterparty on the
21 transaction;

22 (D) a quantity, if applicable;

23 (E) a location, if applicable; and

1 (F) the valuation of the position for the
2 purposes of the books and records of the finan-
3 cial entity.

4 **SEC. 4. ESTABLISHMENT OF NATIONAL INSTITUTE OF FI-**
5 **NANCE; ADMINISTRATIVE MATTERS.**

6 (a) IN GENERAL.—

7 (1) ESTABLISHMENT.—There is established the
8 National Institute of Finance, which shall be an
9 independent establishment, as that term is defined
10 in section 104 of title 5, United States Code.

11 (2) MISSION.—The mission of the Institute is
12 to support the Federal financial regulatory agencies,
13 including any systemic risk council or agency estab-
14 lished by Congress, by—

15 (A) collecting and providing data;

16 (B) standardizing the types and formats of
17 data reported and collected;

18 (C) performing applied research and essen-
19 tial long-term research;

20 (D) developing tools for risk measurement
21 and monitoring;

22 (E) performing other related services; and

23 (F) making the results of its activities
24 available to financial regulatory agencies.

25 (b) DIRECTOR.—

1 (1) APPOINTMENT.—The Institute shall be
2 headed by a Director, who shall be appointed by the
3 President, by and with the advice and consent of the
4 Senate.

5 (2) TERM OF SERVICE.—The Director shall
6 serve for a term of 15 years.

7 (3) EXECUTIVE LEVEL AND PENSION.—The po-
8 sition of the Director shall be at level II of the Exec-
9 utive Schedule, and a Director who serves a full
10 term, or becomes disabled and unable to fulfill the
11 responsibilities of the Director after serving at least
12 10 years, shall receive a pension at retirement equal
13 to the salary of that person in the last year of the
14 term, and that pension shall increase in subsequent
15 years with the increase in the cost of living.

16 (4) VACANCY.—In the event that a successor is
17 not nominated and confirmed by the end of the term
18 of service of a Director, the Director may continue
19 to serve until such time as the new Director is ap-
20 pointed and confirmed.

21 (5) PROHIBITION ON DUAL SERVICE.—The in-
22 dividual serving in the position of Director may not,
23 during such service, also serve as the head of any fi-
24 nancial regulatory agency.

1 (6) RESPONSIBILITIES, DUTIES AND AUTHOR-
2 ITY.—The Director shall have sole discretion to ful-
3 fill the responsibilities and duties and exercise the
4 authorities described in this Act, except in cases
5 where specific authorities have been given to the
6 Board of Directors.

7 (c) BOARD OF DIRECTORS.—The Board of Directors
8 of the Institute shall be comprised of the Director, the
9 Secretary of the Treasury, and the head of each financial
10 regulatory agency.

11 (d) MEMBERSHIP OF THE DIRECTOR ON THE BOARD
12 OF DIRECTORS.—The Director shall serve as a voting
13 member of the Board of Directors and as a member of
14 any financial systemic risk regulatory council or agency
15 established by Congress.

16 (e) FUNDING.—

17 (1) ANNUAL BUDGET.—The Director, in con-
18 sultation with the Board of Directors shall establish
19 the initial annual budget. For all other annual budg-
20 ets, the Director shall submit an annual budget for
21 the Institute to the Board of Directors not later
22 than April 30 of each year. The Board of Directors
23 may, without amendment, reject the budget with a
24 two-thirds majority vote. Each time a budget is re-
25 jected, the Director shall submit a revised budget to

1 the Board of Directors within 60 days, and the
2 Board of Directors may, without amendment, reject
3 the budget with a two-thirds majority vote. If the
4 Board of Directors fails to reject the budget within
5 60 days of submission by the Director, the budget
6 shall be automatically approved. If a new budget is
7 not approved before the existing budget expires, the
8 most recent approved budget shall continue on a pro
9 rata basis. Each submitted budget and all votes by
10 the Board of Directors on each budget shall be part
11 of the public record of the Board of Directors.

12 (2) ASSESSMENTS.—The Institute shall be
13 funded through assessments on the financial entities
14 required to report data to the Institute. The formula
15 by which the budgetary costs are allocated among
16 the reporting entities shall be determined by the
17 Board of Directors. If the Board of Directors fails
18 to establish the formula within 60 days of submis-
19 sion of a budget by the Director, the Director shall
20 determine the formula by which the budgetary costs
21 are allocated among the reporting entities for that
22 year.

23 (3) INITIAL FUNDING AND START UP.—During
24 the first 4 years of the operation of the Institute,
25 the Institute shall have authority to borrow against

1 future assessment revenue from the Federal Finance-
2 ing Bank. Such borrowed funds shall be paid back
3 to the Federal Financing Bank over a term not to
4 exceed 20 years. The Secretary of the Treasury, and
5 any financial regulatory agency, may second per-
6 sonnel to the Institute to assist the operations of the
7 Institute.

8 (f) EXCEPTED SERVICE AGENCY.—The Institute
9 shall be an excepted service agency.

10 (g) PERSONNEL.—The Board of Directors may fix
11 the compensation of Institute personnel, without regard
12 to the provisions of chapter 51 and subchapter III of chap-
13 ter 53 of title 5, United States Code, relating to classifica-
14 tion of positions and General Schedule pay rates. The
15 rates of pay and benefits shall be competitive with and
16 comparable to the rates of pay and benefits at Federal
17 financial regulatory agencies that are not covered by title
18 5, United States Code.

19 (h) NON-COMPETE.—The Director and staff of the
20 Institute, who have had access to the transaction or posi-
21 tion data maintained by the Data Center or other business
22 confidential information about financial entities required
23 to report to the Institute, may not, for a period of 1 year
24 after last having access to such transaction or position
25 data or business confidential information, be employed by

1 or provide advice or consulting services to a financial enti-
2 ty, regardless of whether it is required to report to the
3 Institute. Individual staff members who notify the Direc-
4 tor of their intention to terminate their employment with
5 the Institute and to seek employment with a prohibited
6 employer or in a prohibited activity, shall be transferred
7 for a period of 12 months to a position that does not pro-
8 vide access to transaction or position data or other busi-
9 ness confidential information. For staff whose access to
10 business confidential information was limited, the Board
11 of Directors may provide, on a case-by-case basis, for a
12 shorter period of post-employment prohibition, provided
13 that the shorter period does not compromise business con-
14 fidential information.

15 (i) ADVISORY BOARDS.—The Institute shall maintain
16 any advisory boards that the Director determines are
17 needed to complete the mission of the Institute.

18 (j) FELLOWSHIP PROGRAM.—The Institute may es-
19 tablish and maintain an academic and professional fellow-
20 ship program, under which qualified academics and pro-
21 fessionals shall be invited to spend not longer than 2 years
22 at the Institute, to perform research and to provide ad-
23 vanced training for Institute personnel.

1 (k) EXECUTIVE SCHEDULE MATTERS.—Section
 2 5312 of title 5, United States Code, is amended by adding
 3 at the end the following new item:

“Director of the National Institute of Finance.”.

4 **SEC. 5. ORGANIZATIONAL STRUCTURE; RESPONSIBILITIES**
 5 **OF PRIMARY PROGRAMMATIC UNITS.**

6 (a) IN GENERAL.—The Institute shall carry out its
 7 programmatic responsibilities through—

8 (1) the Federal Financial Data Center (in this
 9 Act referred to as the “Data Center”); and

10 (2) the Federal Financial Research and Anal-
 11 ysis Center (in this Act referred to as the “Research
 12 Center”).

13 (b) FEDERAL FINANCIAL DATA CENTER.—

14 (1) GENERAL DUTIES.—The Data Center shall
 15 collect, validate, and maintain all data necessary to
 16 carry out its duties, as described in this Act.

17 (2) RESPONSIBILITIES.—The Data Center shall
 18 prepare and publish, in a manner that is easily ac-
 19 cessible to the public—

20 (A) a financial entity reference database;

21 (B) a financial instrument reference data-
 22 base; and

23 (C) formats and standards for reporting fi-
 24 nancial transaction and position data to the In-
 25 stitute.

1 (3) DATA TO BE COLLECTED.—Data referred to
2 in paragraph (1)—

3 (A) shall include for each financial enti-
4 ty—

5 (i) comprehensive financial trans-
6 action data on a schedule determined by
7 the Director;

8 (ii) comprehensive position data on a
9 schedule determined by the Director;

10 (iii) for each financial instrument in
11 the financial instrument reference database
12 or for any other obligation of a financial
13 entity that is contingent on the value of an
14 observable event, where the observable
15 event is not widely available to the public,
16 the level and changes in the level of these
17 observable events, on a schedule deter-
18 mined by the Director; and

19 (iv) any other data that are consid-
20 ered by the Director to be important for
21 measuring and monitoring systemic risk,
22 or for determining the soundness of indi-
23 vidual financial entities; and

24 (B) may include data regarding policies
25 and procedures, governance, incentives, com-

1 pensation practices, contractual relationships,
2 and any other information deemed by the Di-
3 rector to be necessary in order for the Institute
4 to carry out its responsibilities under this Act;
5 and

6 (C) the Board of Directors may, by a two-
7 thirds vote, exclude financial entities, which, as
8 a group, will not contribute to systemic risk for
9 reasons such as size, nature of their assets and
10 liabilities, volume of transactions, or other rea-
11 sonable purposes, from reporting data. Notwith-
12 standing such exclusions, financial entities shall
13 comply with all reporting requirements or en-
14 sure that reporting requirements are met for
15 any assets or part of their balance sheets that
16 are sold to create a financial instrument or obli-
17 gation, as described in subparagraph (A)(iii).

18 (4) INFORMATION SECURITY.—The Director
19 and the Board of Directors shall ensure that data
20 collected and maintained by the Data Center are
21 kept secure and protected against unauthorized dis-
22 closure.

23 (5) CATALOGUE OF FINANCIAL ENTITIES AND
24 INSTRUMENTS.—The Data Center shall maintain a

1 catalogue of the financial entities and instruments
2 reported to the Institute.

3 (6) AVAILABILITY TO THE FINANCIAL REGU-
4 LATORY AGENCIES.—The Data Center shall make
5 data collected and maintained by the Data Center
6 available to any financial regulatory agency rep-
7 resented on the Board of Directors, as needed to
8 support the regulatory responsibilities of such agen-
9 cy.

10 (7) OTHER RESPONSIBILITIES.—The Data Cen-
11 ter shall oversee the management of the data supply
12 chain, from the point of issuance, in order to ensure
13 the quality of all data required to be submitted to
14 the Institute.

15 (8) OTHER AUTHORITY.—The Institute shall,
16 after consultation with the Board of Directors pro-
17 vide certain data to financial industry participants
18 and the general public to increase market trans-
19 parency and facilitate research on the financial sys-
20 tem, so long as intellectual property rights are not
21 violated, business confidential information is prop-
22 erly protected, and the sharing of such information
23 poses no significant threats to the financial system.

24 (c) FEDERAL FINANCIAL RESEARCH AND ANALYSIS
25 CENTER.—

1 (1) GENERAL DUTIES.—The Research Center
2 shall develop and maintain the independent analyt-
3 ical capabilities and computing resources—

4 (A) to measure and monitor systemic risk;

5 (B) to perform independent risk assess-
6 ments of individual financial entities and mar-
7 kets;

8 (C) to analyze and investigate relationships
9 between the soundness of individual financial
10 entities and markets and the soundness of the
11 financial system together as a whole; and

12 (D) to provide advice on the financial sys-
13 tem.

14 (2) RESPONSIBILITIES.—The Research Center
15 shall—

16 (A) develop and maintain metrics and risk
17 reporting systems for system-wide risk;

18 (B) develop and maintain metrics and risk
19 reporting systems for determining the sound-
20 ness of financial entities;

21 (C) monitor, investigate, and report
22 changes in system-wide risk levels and patterns
23 to the Board of Directors and Congress, includ-
24 ing through the collection of additional informa-

1 tion that the Director deems necessary to un-
2 derstand such changes;

3 (D) conduct, coordinate, and sponsor re-
4 search to support and improve regulation of fi-
5 nancial entities and markets;

6 (E) benchmark financial risk management
7 practices and promote best practices for finan-
8 cial risk management;

9 (F) at the direction of the Board of Direc-
10 tors, or any member of the Board of Directors,
11 for firms under that member's purview, develop,
12 oversee, and report on stress tests or other tests
13 of the valuation and risk management systems
14 of any of the financial entities required to re-
15 port to the Institute;

16 (G) maintain expertise in such areas as
17 may be necessary to support specific requests
18 for advice and assistance from financial regu-
19 lators;

20 (H) at the direction of the Board of Direc-
21 tors or at the request of Congress, conduct
22 studies and provide advice on financial markets
23 and products, including advice regarding risks
24 to consumers posed by financial products and
25 practices;

(I) at the direction of the Director, at the discretion of the Board of Directors, or at the request of Congress, investigate disruptions and failures in the financial markets, report findings, and make recommendations to the Board of Directors and Congress; and

(J) at the direction of the Board of Directors or at the request of Congress, conduct studies and provide advice on the impact of policies related to systemic risk.

(d) REPORTING RESPONSIBILITIES.—

(1) REQUIRED REPORT.—Commencing 2 years after the date of the establishment of the Institute, the Institute shall prepare and submit an annual report to Congress, not later than 120 days after the end of each fiscal year.

(2) CONTENT.—The report required by this subsection shall assess the state of the financial system, including an analysis of any threats to the financial system, the status of the Institute's efforts in meeting its mission, and key findings from its research and analysis of the financial system.

(3) ADDITIONAL REPORTS.—At the sole discretion of the Director, the Director may initiate and provide additional reports to Congress regarding the

1 state of the financial system. The Director shall no-
2 tify the Board of Directors of any additional reports
3 provided to Congress.

4 **SEC. 6. ADMINISTRATIVE AUTHORITIES OF THE INSTITUTE.**

5 The Institute may—

6 (1) require financial entities to report all data
7 and information in conformance with reporting
8 standards, as determined by the Institute, that are
9 necessary to fulfill the responsibilities of the Insti-
10 tute under this Act;

11 (2) require reporting on a worldwide basis from
12 the financial entities and affiliates thereof that are
13 organized in the United States;

14 (3) require reporting of United States-based ac-
15 tivities by financial entities that are not organized in
16 the United States;

17 (4) enforce and apply sanctions on all financial
18 entities required to report to the Institute that fail
19 to report data requested by and in standards, fre-
20 quency, and time frames, as determined by rule or
21 regulation by the Institute;

22 (5) share data and information, as well as soft-
23 ware developed by the Institute, with other financial
24 regulatory agencies, as determined appropriate by
25 the Board of Directors, where the shared data and

1 software shall be maintained with at least the same
2 level of security as is used by the Institute, and may
3 not be shared with any individuals or entities with-
4 out the permission of the Board of Directors;

5 (6) purchase and lease software;

6 (7) sponsor and conduct research projects; and

7 (8) assist, on a reimbursable basis, with finan-
8 cial analyses undertaken at the request of govern-
9 mental agencies, other than financial regulatory
10 agencies.

11 **SEC. 7. CIVIL PENALTIES.**

12 Any person or entity that violates this Act or fails
13 to comply with a rule, regulation, or order of the Institute
14 issued under this Act shall be subject to a civil penalty
15 in an amount established by the Institute and published
16 in the Code of Federal Regulations. Each such violation
17 or failure shall constitute a separate civil offense.

○
