To establish an Online Voter Registration grant program.

IN THE SENATE OF THE UNITED STATES

MAY 4, 2010

Mr. WYDEN (for himself and Mr. KERRY) introduced the following bill; which  
was read twice and referred to the Committee on Rules and Administration

---

## A BILL

To establish an Online Voter Registration grant program.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Online Voter Registra-  
5       tion Act of 2010”.

6       **SEC. 2. FINDINGS.**

7       Congress makes the following findings:

8               (1) Americans have become increasingly com-  
9       fortable with using the Internet for a wide range of  
10      purposes, including gathering information, pur-  
11      chasing items, performing financial transactions,

1 and obtaining information and services from the  
2 Government.

3 (2) In 2008, 74 percent of adults in the United  
4 States reported using the Internet, according to the  
5 Pew Internet and American Life Project. Of those  
6 adults, 89 percent reported using the Internet to  
7 find information, 71 percent made purchases over  
8 the Internet, 70 percent read news online, 56 per-  
9 cent looked up campaign or political information, 55  
10 percent utilized online banking, and 59 percent vis-  
11 ited Government Internet Web sites.

12 (3) The Internet is well-suited to allow individ-  
13 uals to provide and update personal information.  
14 Completing such tasks online saves time, reduces  
15 paper, increases efficiency, and lowers costs.

16 (4) Many States already allow citizens to access  
17 Government services online, including renewing driv-  
18 er's licenses and registering cars.

19 (5) Two States, Arizona and Washington, have  
20 already implemented online voter registration sys-  
21 tems, and a number of other States are in the proc-  
22 ess of adopting online voter registration systems.

23 (6) Although 2008 was the first election cycle  
24 that the online voter registration system was in  
25 place in Washington State, in the month prior to the

1        general election, voter use of the online voter reg-  
2        istration system exceeded that of mail-in registration  
3        cards by more than 20 percent.

4            (7) Younger adults who are registering to vote  
5        for the first time are the most adept Internet users  
6        and expect to be able to accomplish most tasks on-  
7        line. In 2008, 87 percent of adults age 18 to 29  
8        used the Internet. In Washington State, voters age  
9        18 to 24 had the highest rate of use of its online  
10       voter registration system.

11           (8) During the 2008 election cycle, Washington  
12       State processed about 130,000 online voter registra-  
13       tion transactions.

14           (9) Implementing an online voter registration  
15       requires an initial investment to purchase the needed  
16       technology and to input existing voter information  
17       into the registration database. Washington State, for  
18       example, spent \$278,000 to establish its online voter  
19       registration system.

20           (10) Once in place, online voter registration  
21       systems allow the processing of new voter registra-  
22       tions, changes of address or party, and requests for  
23       absentee ballots.

24           (11) Washington State reports that it costs ap-  
25       proximately 25 cents to process paper voter registra-

1        tion cards and 43 cents to process those submitted  
2        via the department of motor vehicles in compliance  
3        with the National Voter Registration Act of 1993  
4        (42 U.S.C. 1973gg et seq.). Voters must also pay  
5        postage costs for registration cards sent through the  
6        mail. Once in place, the online voter registration sys-  
7        tem requires no processing by staff in order to com-  
8        plete a transaction, and therefore has no per trans-  
9        action cost. For the 2008 general election, the online  
10       voter registration system saved Washington State  
11       \$32,500, and saved consumers \$54,600 in postage  
12       costs, which resulted in total savings to the State  
13       and consumers of over \$87,000.
