

111TH CONGRESS
1ST SESSION

S. 999

To increase the number of well-trained mental health service professionals (including those based in schools) providing clinical mental health care to children and adolescents, and for other purposes.

IN THE SENATE OF THE UNITED STATES

MAY 7, 2009

Mr. BINGAMAN (for himself, Ms. COLLINS, and Ms. STABENOW) introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

A BILL

To increase the number of well-trained mental health service professionals (including those based in schools) providing clinical mental health care to children and adolescents, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Child Health Care Cri-
5 sis Relief Act of 2009”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

1 (1) The Center for Mental Health Services esti-
2 mates that 20 percent or 13,700,000 of the Nation's
3 children and adolescents have a diagnosable mental
4 disorder, and about $\frac{2}{3}$ of these children and adoles-
5 cents do not receive mental health care.

6 (2) According to "Mental Health: A Report of
7 the Surgeon General" in 1999, there are approxi-
8 mately 6,000,000 to 9,000,000 children and adoles-
9 cents in the United States (accounting for 9 to 13
10 percent of all children and adolescents in the United
11 States) who meet the definition for having a serious
12 emotional disturbance.

13 (3) According to the Center for Mental Health
14 Services, approximately 5 to 9 percent of United
15 States children and adolescents meet the definition
16 for extreme functional impairment.

17 (4) According to the Surgeon General's Report,
18 there are particularly acute shortages in the num-
19 bers of mental health service professionals serving
20 children and adolescents with serious emotional dis-
21 orders.

22 (5) According to the National Center for Edu-
23 cation Statistics in the Department of Education,
24 there are approximately 479 students for each school
25 counselor in United States schools, which ratio is al-

1 most double the recommended ratio of 250 students
2 for each school counselor.

3 (6) According to the Bureau of Health Profes-
4 sions in 2000, the demand for the services of child
5 and adolescent psychiatry is projected to increase by
6 100 percent by 2020.

7 (7) The development and application of knowl-
8 edge about the impact of disasters on children, ado-
9 lescents, and their families has been impeded by crit-
10 ical shortages of qualified researchers and practi-
11 tioners specializing in this work.

12 (8) According to the Bureau of the Census, the
13 population of children and adolescents in the United
14 States under the age of 18 is projected to grow by
15 more than 40 percent in the next 50 years from
16 70,000,000 to more than 100,000,000 by 2050.

17 (9) There are approximately 7,000 child and
18 adolescent psychiatrists in the United States. Only
19 300 child and adolescent psychiatrists complete
20 training each year.

21 (10) According to the Department of Health
22 and Human Services, racial and ethnic minority rep-
23 resentation is lacking in the mental health work-
24 force. Although 12 percent of the United States pop-
25 ulation is African-American, only 2 percent of psy-

1 chologists, 2 percent of psychiatrists, and 4 percent
2 of social workers are African-American providers.
3 Moreover, there are only 29 Hispanic mental health
4 professionals for every 100,000 Hispanics in the
5 United States, compared with 173 non-Hispanic
6 White providers per 100,000.

7 (11) According to a 2006 study in the Journal
8 of the American Academy of Child and Adolescent
9 Psychiatry, the national shortage of child and ado-
10 lescent psychiatrists affects poor children and ado-
11 lescents living in rural areas the hardest.

12 (12) According to the Department of Health
13 and Human Services, the “U.S. mental health sys-
14 tem is not well equipped to meet the needs of racial
15 and ethnic minority populations.”. This is quite evi-
16 dent in access to care issues involving racial and eth-
17 nic minority children. Studies have shown that there
18 are striking racial and ethnic differences in the utili-
19 zation of mental health services among children and
20 youth. Overall, mental health services meet the
21 needs of 31 percent of non-minority children, but
22 only 13 percent of minority children.

23 (13) According to the National Center for Men-
24 tal Health and Juvenile Justice, 70 percent of youth
25 involved in State and local juvenile justice systems

1 throughout the country suffer from mental dis-
2 orders, with at least 20 percent experiencing symp-
3 toms so severe that their ability to function is sig-
4 nificantly impaired.

5 (14) The Institute of Medicine, in Improving
6 the Quality of Health Care for Mental and Sub-
7 stance-Use Disorders, Quality Chasm Series (2006)
8 recommended that clinicians and patients commu-
9 nicate effectively and share information to ensure
10 quality care, which is enhanced with education pro-
11 grams that allow families and consumers to share
12 information with mental health providers about the
13 lived experience of mental illness.

14 **SEC. 3. LOAN REPAYMENTS, SCHOLARSHIPS, AND GRANTS**
15 **TO IMPROVE CHILD AND ADOLESCENT MEN-**
16 **TAL HEALTH CARE.**

17 Part E of title VII of the Public Health Service Act
18 (42 U.S.C. 294n et seq.) is amended by adding at the end
19 the following:

1 **“Subpart 3—Child and Adolescent Mental Health**
2 **Care**

3 **“SEC. 775. LOAN REPAYMENTS, SCHOLARSHIPS, AND**
