Whereas infant mortality can be substantially reduced through community-based services such as outreach, home visitation, case management, health education, and interconceptional care;

Whereas support for community-based programs to reduce infant mortality can result in lower future spending on medical interventions, special education, and other social services that may be needed for infants and children who are born with a low birth weight;

Whereas the Department of Health and Human Services, through the Office of Minority Health, has implemented the “A Healthy Baby Begins With You” campaign;

Whereas the Maternal and Child Health Bureau of the Health Resources and Services Administration has provided national leadership on the issue of infant mortality;
