IN THE HOUSE OF REPRESENTATIVES

OCTOBER 13, 2011

Mrs. CAPPS (for herself, Ms. MATSUI, Ms. WOOLSEY, Mr. LEWIS of Georgia, Ms. ROYBAL-ALLARD, Mr. GRIJALVA, Mr. HINCHEY, Mr. RANGEL, and Mr. TOWNS) introduced the following bill; which was referred to the Committee on Education and the Workforce, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To direct the Secretary of Education to establish a program to provide grants for cardiopulmonary resuscitation and automated external defibrillator training in public elementary and secondary schools.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Teaching Children to
5 Save Lives Act of 2011”.

1 **SEC. 2. FINDINGS.**

2 Congress finds the following:

3 (1) Heart disease is the leading cause of death
4 in the United States.

5 (2) Sudden cardiac arrest is the leading cause
6 of death in young athletes.

7 (3) Sudden cardiac arrest kills an estimated
8 5,000 to 7,000 children and young people per year—
9 nearly 20 per day.

10 (4) The American Heart Association estimates
11 that the lives of 40,000 cardiac arrest victims could
12 be saved each year through initiating a course of ac-
13 tion known as the chain of survival.

14 (5) The chain of survival includes prompt noti-
15 fication of emergency services and early
16 cardiopulmonary resuscitation (hereinafter referred
17 to as “CPR”), defibrillation, and advanced cardiac
18 life support.

19 (6) Only 36 States have a law or curriculum
20 standard encouraging CPR or automated external
21 defibrillator (hereinafter referred to as “AED”)
22 training in schools.

23 (7) A person experiencing sudden cardiac arrest
24 has a 90 percent chance of survival if CPR and an
25 AED is used within the first minute after collapse.

1 (8) Over 64 percent of young athletes and oth-
2 ers have survived sudden cardiac arrest that oc-
3 curred in a high school with an AED program.

4 (9) An important part of school children's edu-
5 cation is learning healthy behaviors, including proper
6 nutrition and physical activity. This health education
7 should also include basic emergency life-saving skills.

8 (10) Teaching school children to perform the
9 life-saving skill of CPR, identify and respond to
10 choking victims, and recognize the signs of stroke
11 and heart attack can improve their confidence in re-
12 sponding to an emergency and encourage continued
13 efforts to update these skills after graduation, there-
14 by potentially reducing the rate of death from sud-
15 den cardiac arrest, choking, and stroke.

16 **SEC. 3. GRANTS FOR CPR TRAINING IN PUBLIC SCHOOLS.**

17 (a) GRANTS AUTHORIZED.—The Secretary of Edu-
18 cation shall carry out a program under which the Sec-

5 an existing CPR or AED training programs in tar-

9 ing CPR or AED training program by adding train-
10 ing in the use of an AED.

11 (4) Opportunities to encourage and foster part-
12 nerships with and among community organizations,
13 including emergency medical service providers, fire
14 and police departments, nonprofit organizations,
