A BILL

To promote the domestic development and deployment of clean energy technologies required for the 21st century.

- 1 *Be it enacted by the Senate and House of Representa-*
- 2 *tives of the United States of America in Congress assembled,*
- 3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS; FINDINGS.**
- 4 (a) SHORT TITLE.—This Act may be cited as the
- 5 “Clean Energy Victory Bond Act of 2012”.
- 6 (b) TABLE OF CONTENTS.—The table of contents for
- 7 this Act is as follows:

Sec. 1. Short title; table of contents; findings.

Sec. 2. Findings.

TITLE I—REVENUE PROVISIONS

Sec. 101. Extension and modification of energy investment tax credit.

Sec. 102. Extension and modification of credit for electricity produced from certain renewable resources.

Sec. 103. Extension and modification of grants for specified energy property in lieu of tax credits.

Sec. 104. Modification of and increased allocation for qualifying advanced energy project credit.

Sec. 105. Extension of credit for nonbusiness energy property.

TITLE II—GRANT PROGRAMS AND LOAN GUARANTEES

Sec. 201. Plug-in electric vehicle grants in lieu of tax credits.

Sec. 202. Plug-in hybrid electric vehicle charging station grant program.

Sec. 203. Extension of renewable energy and electric power transmission loan guarantees.

TITLE III—CLEAN ENERGY VICTORY BONDS

Sec. 301. Clean Energy Victory Bonds.

1 SEC. 2. FINDINGS.

2 Congress finds the following:

3 (1) There is enormous potential for increasing
4 renewable energy production and energy efficiency
5 installation in the United States.

6 (2) A major barrier to rapid expansion of re-
7 newable energy and energy efficiency is upfront cap-
8 ital costs. Government tax incentives and other as-
9 sistance programs have proven beneficial in encour-
10 aging private sector development, manufacturing
11 and installation of renewable energy and energy effi-
12 ciency projects nationwide. However, these govern-
13 ment incentives are not currently meeting demand
14 from the private sector, and we are not taking full
15 advantage of the potential for clean energy and

1 transportation, as well as energy efficiency in the
2 United States.

3 (3) Other nations, including China and Ger-
4 many are ahead of the United States in manufac-
5 turing and deploying various clean energy tech-
6 nologies, even though the United States invented
7 many of these technologies.

8 (4) Investments in renewable energy and energy
9 efficiency projects in the United States create green
10 jobs for U.S. citizens across the United States. Hun-
11 dreds of thousands of jobs could be created through
12 expanded government support for clean energy and
13 energy efficiency.

14 (5) As Americans choose energy efficiency and
15 clean energy and transportation, it reduces our de-
16 pendence on foreign oil and improves our energy se-
17 curity.

18 (6) Bonds are a low-cost method for encour-
19 aging clean energy, not requiring direct budget allo-
20 cations or expenditures. The projects supported
21 through Clean Energy Victory Bonds will create jobs
22 and business revenues that will increase Federal tax
23 revenues, while simultaneously reducing health and
24 environmental costs incurred by the Federal Govern-
25 ment nationwide.

1 (7) In World War II, over 80 percent of Amer-
2 ican households purchased Victory Bonds to support
3 the war effort, raising over \$185 billion, or over \$2
4 trillion in today's dollars.
