IN THE HOUSE OF REPRESENTATIVES

MARCH 20, 2013

Ms. SLAUGHTER (for herself, Ms. ROYBAL-ALLARD, Mr. GRIJALVA, Mr. NADLER, Mr. HASTINGS of Florida, Ms. LEE of California, Mr. CUMMINGS, Ms. WILSON of Florida, and Mr. CICILLINE) introduced the following bill; which was referred to the Committee on Financial Services

A BILL

To reduce housing-related health hazards, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Lead Hazard Title
5 X Amendments Act”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) Poor housing conditions contribute to a
9 wide range of health conditions, including uninten-
10 tional injuries, respiratory illness, asthma, and can-

1 cer, which disproportionately impact susceptible and
2 vulnerable populations, such as children, the poor,
3 minorities, and people with chronic medical condi-
4 tions. For example—

5 (A) according to the Department of Hous-
6 ing and Urban Development, nearly 6,000,000
7 housing units in the United States had mod-
8 erate to severe physical infrastructure problems
9 other than problems with lead in 2007;

10 (B) the Centers for Disease Control and
11 Prevention found that about 23,000,000 hous-
12 ing units, most of them built before 1960, have
13 1 or more lead-based paint hazards, where
14 young children under age 6 are endangered by
15 chipping or peeling lead paint or excessive
16 amounts of lead-contaminated dust. Of these
17 homes, about 1,100,000 housed low-income
18 families with 1 or more children under age 6;

19 (C) low-level lead poisoning is widespread
20 among children in the United States, afflicting
21 hundreds of thousands of children under age 6,
22 with minority and low-income communities af-
23 fected disproportionately;

24 (D) costs for asthma due to dampness and
25 mold were estimated at \$3,500,000,000 in

1 2004, according to the International Journal of
2 Environment and Health;

3 (E) the Journal of Allergy and Clinical Im-
4 munology found that about 17,000,000 homes
5 have elevated levels of 4 or more allergens, a
6 condition that is associated with symptoms
7 among residents with allergic asthma;

8 (F) the Environmental Protection Agency
9 found that more than 6,800,000 housing units
10 have radon exposures above the current Envi-
11 ronmental Protection Agency radon action level;
12 and

13 (G) the National Institutes of Health esti-
14 mates that radon exposures result in 21,000
15 radon-induced lung cancer deaths per year,
16 which cost \$2,300,000,000 per year.

17 (2) The Federal Government must continue its
18 leadership in demonstrating and implementing
19 projects that assess and correct health hazards in
20 the home environment to support the national goal
21 of providing decent, safe, and sanitary housing to
22 every family in the United States.
