2 are linked together through a national program of-
3 fice have the ability to lead cost-effective projects
4 and programs that are responsive to community
5 needs and essential to improving the local environ-
6 ment, economy, and quality of life;

7 (2) local community involvement with how land
8 is being used is an essential component to the eco-
9 nomic success of a neighborhood;

10 (3) underutilized and neglected vacant lands
11 significantly erode nearby property values and bur-
12 den municipal tax bases;

15 creases negative stigma and generates civic pride,

17 licit activities typically associated with idle lands;

18 (5) cleaning, landscaping, and tree planting
19 within vacant and abandoned land and brownfields
20 adds economic value to a community through in-
21 creased occupancy rates, and improved sales appeal
22 of nearby residential and commercial real estate; and
