

113TH CONGRESS

H. R. 4010

To provide for enhanced treatment, support, services, and research for individuals with autism spectrum disorders and their families.

IN THE HOUSE OF REPRESENTATIVES

FEBRUARY 6, 2014

Mr. CARTWRIGHT introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To provide for enhanced treatment, support, services, and research for individuals with autism spectrum disorders and their families.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) SHORT TITLE.—This Act may be cited as the
5 “Autism Services and Workforce Acceleration Act of
6 2014”.

7 (b) TABLE OF CONTENTS.—The table of contents for
8 this Act is as follows:

- Sec. 1. Short title; table of contents.
- Sec. 2. Findings.
- Sec. 3. Parental rights rule of construction.

Sec. 4. Definitions; technical amendment to the Public Health Service Act.
Sec. 5. Autism Care Programs Demonstration Project.
Sec. 6. Planning and demonstration grants for services for transitioning youth and adults.
Sec. 7. Multimedia campaign.
Sec. 8. National training initiatives on autism spectrum disorders.
Sec. 9. Authorization of appropriations.

1 **SEC. 2. FINDINGS.**

2 Congress makes the following findings:

3 (1) Autism (sometimes called “classical autism”)
4 is the most common condition in a group of
5 developmental disorders known as autism spectrum
6 disorders.

7 (2) Autism spectrum disorders include autism
8 as well as Asperger syndrome, Rett syndrome,
9 childhood disintegrative disorder, and pervasive developmental disorder not otherwise specified (usually
10 referred to as PDD–NOS), as well as other related
11 developmental disorders.

13 (3) Individuals with autism spectrum disorders
14 have the same rights as other individuals to exert
15 control and choice over their own lives, to live independently, and to participate fully in, and contribute
16 to, their communities and society through full integration and inclusion in the economic, political, social, cultural, and educational mainstream of society.
19 Individuals with autism spectrum disorders have the
20 right to a life with dignity and purpose.

1 (4) While there is no uniform prevalence or se-
2 verity of symptoms associated with autism spectrum
3 disorders, the National Institutes of Health has de-
4 termined that autism spectrum disorders are charac-
5 terized by 3 distinctive behaviors: impaired social
6 interaction, problems with verbal and nonverbal
7 communication, and unusual, repetitive, or severely
8 limited activities and interests.

9 (5) Both children and adults with autism spec-
10 trum disorders can show difficulties in verbal and
11 nonverbal communication, social interactions, and
12 sensory processing. Individuals with autism spec-
13 trum disorders exhibit different symptoms or behav-
14 iors, which may range from mild to significant, and
15 require varying degrees of support from friends,
16 families, service providers, and communities.

17 (6) Individuals with autism spectrum disorders
18 often need assistance in the areas of comprehensive
19 early intervention, health, recreation, job training,
20 employment, housing, transportation, and early, pri-
21 mary, and secondary education. Greater coordination
22 and streamlining within the service delivery system
23 will enable individuals with autism spectrum dis-
24 orders and their families to access assistance from
25 all sectors throughout an individual's lifespan.

1 (7) A 2009 report from the Centers for Disease
2 Control and Prevention found that the prevalence of
3 autism spectrum disorders is estimated to be 1 in
4 110 people in the United States.

5 (8) The Harvard School of Public Health re-
6 ported that the cost of caring for and treating indi-
7 viduals with autism spectrum disorders in the
8 United States is more than \$35,000,000,000 annu-
9 ally (an estimated \$3,200,000 over an individual's
10 lifetime).

11 (9) Although the overall incidence of autism is
12 consistent around the globe, researchers with the
13 Journal of Paediatrics and Child Health have found
14 that males are 4 times more likely to develop an au-
15 tism spectrum disorder than females. Autism spec-
16 trum disorders know no racial, ethnic, or social
17 boundaries, nor differences in family income, life-
18 style, or educational levels, and can affect any child.

19 (10) Individuals with autism spectrum disorders
20 from low-income, rural, and minority communities
21 often face significant obstacles to accurate diagnosis
22 and necessary specialized services, supports, and
23 education.

24 (11) There is strong consensus within the re-
25 search community that intensive treatment as soon

1 as possible following diagnosis not only can reduce
2 the cost of lifelong care by two-thirds, but also yields
3 the most positive life outcomes for children with au-
4 tism spectrum disorders.

5 (12) Individuals with autism spectrum disorders
6 and their families experience a wide range of medical
7 issues. Few common standards exist for the diag-
8 nosis and management of many aspects of clinical
9 care. Behavioral difficulties may be attributed to the
10 overarching disorder rather than to the pain and dis-
11 comfort of a medical condition, which may go unde-
12 tected and untreated. The health care and other
13 treatments available in different communities can
14 vary widely. Many families, lacking access to com-
15 prehensive and coordinated health care, must fend
16 for themselves to find the best health care, treat-
17 ments, and services in a complex clinical world.

18 (13) Effective health care, treatment, and serv-
19 ices for individuals with autism spectrum disorders
20 depends upon a continuous exchange among re-
21 searchers and caregivers. Evidence-based and prom-
22 ising autism practices should move quickly into com-
23 munities, allowing individuals with autism spectrum
24 disorders and their families to benefit from the new-
25 est research and enabling researchers to learn from

1 the life experiences of the people whom their work
2 most directly affects.

3 (14) There is a critical shortage of appro-
4 priately trained personnel across numerous impor-
5 tant disciplines who can assess, diagnose, treat, and
6 support children and adults with autism spectrum
7 disorders and their families. Practicing professionals,
8 as well as those in training to become professionals,
9 need the most up-to-date practices informed by the
10 most current research findings.

11 (15) The appropriate goals of the Nation re-
12 garding individuals with autism spectrum disorder
13 are the same as the appropriate goals of the Nation
14 regarding individuals with disabilities in general, as
15 established in the Americans with Disabilities Act of
16 1990 (42 U.S.C. 12101 et seq.): to assure equality
17 of opportunity, full participation, independent living,
18 and economic self-sufficiency for such individuals.

19 (16) Finally, individuals with autism spectrum
20 disorders are often denied health care benefits solely
21 because of their diagnosis, even though proven, ef-
22 fective treatments for autism spectrum disorders do
23 exist.

1 **SEC. 3. PARENTAL RIGHTS RULE OF CONSTRUCTION.**

2 Nothing in this Act shall be construed to modify the
3 legal rights of parents or legal guardians under Federal,
4 State, or local law regarding the care of their children.

5 **SEC. 4. DEFINITIONS; TECHNICAL AMENDMENT TO THE**
6 **PUBLIC HEALTH SERVICE ACT.**
