

113TH CONGRESS

S. 1978

To increase access to primary care services through training and
accountability improvements.

IN THE SENATE OF THE UNITED STATES

JANUARY 30, 2014

Mr. UDALL of New Mexico introduced the following bill; which was read twice
and referred to the Committee on Finance

A BILL

To increase access to primary care services through training
and accountability improvements.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) **SHORT TITLE.**—This Act may be cited as the
5 “Increasing Primary Care Access Act of 2014”.

6 (b) **TABLE OF CONTENTS.**—The table of contents of
7 this Act is as follows:

Sec. 1. Short title; table of contents.

Sec. 2. Findings.

Sec. 3. Centers of Excellence in Primary Care.

Sec. 4. Medicare Indirect Medical Education (IME) performance adjustment
and primary care training bonus.

Sec. 5. Increasing Medicare graduate medical education transparency.

Sec. 6. Ensuring appropriate representation of primary care physicians on groups making recommendations regarding relative values under the Medicare physician fee schedule.

Sec. 7. Primary care project.

Sec. 8. Regional centers for health workforce analysis.

Sec. 9. Payments for graduate medical education under the Medicaid program.

Sec. 10. National Center for Health Care Workforce Analysis.

Sec. 11. Teaching health center reauthorization.

Sec. 12. GAO studies on graduate medical education.

1 **SEC. 2. FINDINGS.**

2 Congress makes the following findings:

3 (1) A well prepared, effective primary care
4 workforce can reduce health care costs and play a
5 large role in the prevention and management of ill-
6 ness. A one-unit increase in primary care physicians
7 per 10,000 population is associated with improved
8 health outcomes such as all-cause, cancer, heart dis-
9 ease, and stroke mortality, as well as increased life
10 expectancy.

11 (2) Primary care physicians include those
12 trained in family medicine, general internal medi-
13 cine, general pediatrics, and in some cases, gyne-
14 cology. One primary care physician will generate 6
15 to 23 jobs in the community served by such physi-
16 cian, \$900,000 to \$1,200,000 in wages, salaries, and
17 benefits, and nearly \$100,000 in State and local
18 taxes.

19 (3) As of 2011, only 32 percent of the physician
20 workforce is comprised of primary care and only be-
21 tween 16 to 18 percent of graduates of allopathic

1 medical schools are likely to pursue a career in pri-
2 mary care.

3 (4) Primary care supply has a positive effect on
4 the entire population, but the effect is greater in
5 areas with higher income inequality and poverty,
6 such as rural areas. Only about 10 percent of physi-
7 cians in America practice in rural areas while 20
8 percent of the United States population is located in
9 rural areas.

10 (5) Geographic areas with more general and
11 family physicians per population have lower rates of
12 mortality and hospitalization for conditions that
13 should be preventable or detected early, such as dia-
14 betes, congestive heart failure, and hypertension.

15 (6) As of May 2011, there were 6,419 primary
16 care health professional shortage areas, comprised of
17 66,300,000 individuals. It would take 17,636 practi-
18 tioners to meet such individuals' need for primary
19 care providers.

20 **SEC. 3. CENTERS OF EXCELLENCE IN PRIMARY CARE.**

21 Part C of title VII of the Public Health Service Act
22 (42 U.S.C. 293k) is amended by adding at the end the

24 needed skills for modern medical practice, and en-
25 hance affinity of graduates for practice in rural and

1 medically underserved areas (which may include 3-
 2 year undergraduate medical education models, rural
 3 and inner city rotations, and mentoring with rural
 4 physicians);

5 “(4) research whether students completing a
 6 service requirement in a rural or underserved area
 7 as part of the criteria for graduation improves ac-
 8 cess to care in such area;

9 “(5) implement tracking systems that—

10 “(A) assess practice patterns of medical
 11 school graduates and require annual reports on
 12 this information for the duration of the grant
 13 program; and

14 “(B) track all loan repayment and scholar-
 15 ship disbursements to assure that program
 16 goals are being met with regard to recipients
 17 serving in desired locations with expected popu-
 18 lations of need for a minimum required amount
 19 of time; and

20 “(6) having interprofessional primary care
 21 health professions community-based service learning
 22 models for primary care residents, and include clerk-
 23 ships and continuity clinic experiences for medical,
 24 nurse practitioner, and physician assistant students
 25 interested in primary care.”.
