9 effective Federal partnerships with State and local
10 government, nongovernmental organizations, and the
11 private sector.

12 (2) Access to current, accurate, uniform, and
13 standards-based geospatial information, tools, and
14 training to characterize the United States coastal re-
15 gion is critical for public safety and for the environ-
16 ment, infrastructure, and economy of the United
17 States.

18 (3) More than half of all people of the United
19 States (153,000,000) currently live on or near a
20 coast and an additional 12,000,000 are expected in
21 the next decade.

22 (4) Coastal counties in the United States aver-
23 age 300 persons per square mile, compared with the
24 national average of 98.

1 (5) On a typical day, more than 1,540 permits
2 for construction of single-family homes are issued in
3 coastal counties, combined with other commercial,
4 retail, and institutional construction to support this
5 population.

6 (6) Over half of the economic productivity of
7 the United States is located within coastal regions.

8 (7) Highly accurate, high-resolution remote
9 sensing and other geospatial data play an important
10 role in management of the coastal zone and econ-
11 omy, including for—

12 (A) flood and coastal storm surge pre-
13 diction;

14 (B) hazard risk and vulnerability assess-
15 ment;

16 (C) emergency response and recovery plan-
17 ning;

18 (D) community resilience to longer range
19 climate change impacts;

20 (E) permitting and zoning decisionmaking;

21 (F) habitat and ecosystem health assess-
22 ments; and
