

113TH CONGRESS
1ST SESSION

S. 380

To amend the Public Health Service Act to reauthorize and update the National Child Traumatic Stress Initiative for grants to address the problems of individuals who experience trauma and violence related stress.

IN THE SENATE OF THE UNITED STATES

FEBRUARY 26, 2013

Mrs. MURRAY introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

A BILL

To amend the Public Health Service Act to reauthorize and update the National Child Traumatic Stress Initiative for grants to address the problems of individuals who experience trauma and violence related stress.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Children’s Recovery
5 from Trauma Act”.

6 **SEC. 2. FINDINGS.**

7 Congress makes the following findings:

1 (1) According to a 2002 Government Account-
2 ability Office report (GAO-02-813), large numbers
3 of children experience trauma-related mental health
4 problems, while at the same time facing barriers to
5 receiving appropriate mental health care.

6 (2) According to the National Institute of Men-
7 tal Health, only 36 percent of youth with any mental
8 disorder received services, and only half of these
9 youth who were severely impaired by their mental
10 disorder received any professional mental health
11 treatment. Of those with anxiety disorders (including
12 post traumatic stress disorder), only 18 percent re-
13 ceived services. Half of all lifetime cases of mental
14 illness begin by age 14, and that despite effective
15 treatments that have been developed, there are long
16 delays, sometimes decades, between first onset of
17 symptoms and when treatment is obtained.

18 (3) Findings from the Adverse Childhood Expe-
19 riences Study have shown that adverse childhood ex-
20 periences predispose children towards negative tra-
21 jectories from infancy to adulthood.

22 (4) The Great Smoky Mountains Study, a rep-
23 resentative longitudinal study of children, found that
24 by age 16, more than 67 percent of the children had
25 been exposed to one or more traumatic events, such

1 as child maltreatment, domestic violence, or sexual
2 assault (Copeland et al, 2007).

3 (5) According to the National Institute of Men-
4 tal Health, the lifetime prevalence of post-traumatic
5 stress disorder for 13 to 18 year olds is 4 to 6 per-
6 cent (NIMH, 2010). In 2007, the National Institute
7 of Mental Health reported that adults who were
8 abused or neglected as children have increased risk
9 of major depression, often beginning in childhood
10 with long-lasting effects.

11 (6) According to the Department of Defense,
12 more than 700,000 children have experienced one or
13 more parental deployments. Children's reactions to a
14 parent's deployment vary by a child's developmental
15 stage, age, and presence of any preexisting psycho-
16 logical or behavioral problems. The mental health of
17 the parent is often a key factor affecting the child's
18 distress level. Parents reporting clinically significant
19 stress are more likely to have children identified as
20 high risk for psychological and behavioral problems.

21 (7) The National Intimate Partner and Sexual
22 Violence Survey revealed that nearly 1 in 5 women
23 reported having been the victim of a rape at some
24 time during their lives. Forty-two percent experi-
25 enced their first rape before the age of 18.

1 (8) The National Child Traumatic Stress Net-
2 work collected data on 14,088 children and adoles-
3 cents served by 56 Network service centers across
4 the country from 2004 to 2010, examining the prev-
5 alence of exposure to a wide range of trauma types,
6 access to services, and child outcomes outcome.
7 Nearly 80 percent of children referred for screening
8 and evaluation reported experiencing at least one
9 type of traumatic event. Of the 11,104 children and
10 adolescents who reported trauma exposure, 77 per-
11 cent had experienced more than one type of trauma
12 and 31 percent had experienced five or more types.

13 (9) The children served by the National Child
14 Traumatic Stress Network are involved with many
15 different kinds of child-serving systems. Of those re-
16 ceiving service, 65 percent had received social serv-
17 ices and 35 percent had received school-based serv-
18 ices. After treatment, significant improvements were
19 made in trauma symptoms, mental health diagnoses,
20 and behavioral problems.

21 **SEC. 3. GRANTS TO ADDRESS THE PROBLEMS OF INDIVID-**
22 **UALS WHO EXPERIENCE TRAUMA AND VIO-**
23 **LENCE RELATED STRESS.**

24 Section 582 of the Public Health Service Act (42
25 U.S.C. 290hh-1) is amended to read as follows:

1 **“SEC. 582. GRANTS TO ADDRESS THE PROBLEMS OF INDI-**
2 **VIDUALS WHO EXPERIENCE TRAUMA AND VI-**
3 **OLENCE RELATED STRESS.**

4 “(a) IN GENERAL.—The Secretary shall award
5 grants, contracts or cooperative agreements to public and
6 nonprofit private entities, as well as to Indian tribes and
7 tribal organizations, for the purpose of developing and
8 maintaining programs that provide for—

9 “(1) the continued operation of the National
10 Child Traumatic Stress Initiative (referred to in this
11 section as the ‘NCTSI’) that focus on the mental,
12 behavioral, and biological aspects of psychological
13 trauma response; and

14 “(2) the development of knowledge with regard
15 to evidence-based practices for identifying and treat-
16 ing mental, behavioral, and biological disorders of
17 children and youth resulting from witnessing or ex-
18 perencing a traumatic event.

19 “(b) PRIORITIES.—In awarding grants, contracts or
20 cooperative agreements under subsection (a)(2) (related to
21 the development of knowledge on evidence-based practices
22 for treating mental, behavioral, and biological disorders
23 associated with psychological trauma), the Secretary shall
24 give priority to universities, hospitals, mental health agen-
25 cies, and other community-based child-serving programs

1 that have established clinical and research experience in
2 the field of trauma-related mental disorders.

3 “(c) CHILD OUTCOME DATA.—The NCTSI coordi-
4 nating center shall collect, analyze, and report NCTSI-
5 wide child outcome and process data for the purpose of
6 establishing the effectiveness, implementation, and clinical
7 utility of early identification and delivery of evidence-based
8 treatment and services delivered to children and families
9 served by the NCTSI grantees.

10 “(d) TRAINING.—The NCTSI coordinating center
11 shall oversee the continuum of interprofessional training
12 initiatives in evidence-based and trauma-informed treat-
13 ments, interventions, and practices offered to NCTSI
14 grantees and providers in all child-serving systems.

15 “(e) DISSEMINATION.—The NCTSI coordinating
16 center shall collaborate with the Secretary in the dissemi-
17 nation of evidence-based and trauma-informed interven-
18 tions, treatments, products, and other resources to all
19 child-serving systems and policymakers.

20 “(f) REVIEW.—The Secretary shall establish con-
21 sensus-driven, in-person or teleconference review of
22 NCTSI applications by child trauma experts and review
23 criteria related to expertise and experience related to child
24 trauma and evidence-based practices.

1 “(g) GEOGRAPHICAL DISTRIBUTION.—The Secretary
2 shall ensure that grants, contracts or cooperative agree-
3 ments under subsection (a) are distributed equitably
4 among the regions of the United States and among urban
5 and rural areas. Notwithstanding the previous sentence,
6 expertise and experience in the field of trauma-related dis-
7 orders shall be prioritized in the awarding of such grants
8 are required under subsection (b).

9 “(h) EVALUATION.—The Secretary, as part of the
10 application process, shall require that each applicant for
11 a grant, contract or cooperative agreement under sub-
12 section (a) submit a plan for the rigorous evaluation of
13 the activities funded under the grant, contract or agree-
14 ment, including both process and outcome evaluation, and
15 the submission of an evaluation at the end of the project
16 period.

17 “(i) DURATION OF AWARDS.—With respect to a
18 grant, contract or cooperative agreement under subsection
19 (a), the period during which payments under such an
20 award will be made to the recipient shall be 6 years. Such
21 grants, contracts or agreements may be renewed. Exper-
22 tise and experience in the field of trauma-related disorders
23 shall be a priority for new and continuing awards.

24 “(j) AUTHORIZATION OF APPROPRIATIONS.—There
25 is authorized to be appropriated to carry out this section,

1 \$100,000,000 for fiscal year 2014, and such sums as may
2 be necessary for each of fiscal years 2015 through 2024.”.

○
