A BILL

To facilitate efficient investments and financing of infrastruc-

ture projects and new job creation through the establishment of a National Infrastructure Development Bank, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
 2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “National Infrastruc-
 5 ture Development Bank Act of 2015”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) Investment in infrastructure has always cre-
 9 ated jobs and economic growth for the United States
 10 and has been a key component of maintaining a
 11 global competitive edge for the United States.

12 (2) The Erie Canal, the transcontinental rail-
 13 road, the Hoover Dam, rural electrification, and the
 14 interstate highway system are all examples of invest-
 15 ments in infrastructure that created the conditions
 16 for future economic growth.

17 (3) According to the World Economic Forum
 18 Global Competitiveness Report, the United States
 19 ranks 16th overall in infrastructure.

20 (4) According to the American Society of Civil
 21 Engineers, the current condition of the infrastruc-
 22 ture in the United States earns a grade point aver-
 23 age of D+, and an estimated \$3,600,000,000,000

1 investment is needed by 2020 to meet adequate con-
2 ditions.

3 (5) According to the National Surface Trans-
4 portation Policy and Revenue Study Commission,
5 \$225,000,000,000 is needed annually from all
6 sources for the next 50 years to upgrade our surface
7 transportation system to a state of good repair and
8 create a more advanced system.

9 (6) The Environmental Protection Agency
10 projects that—

11 (A) \$334,200,000,000 is needed to invest
12 in infrastructure improvements over 20 years to
13 ensure the provision of safe water; and

14 (B) \$298,100,000,000 is needed for pub-
15 licly owned wastewater systems-related infra-
16 structure needs over 20 years.

17 (7) According to the Edison Electric Institute,
18 the electric power industry will need to invest
19 \$298,000,000,000 in the Nation's transmission sys-
20 tem in the next 20 years in order to maintain reli-
21 able service.

22 (8) According to the Organization for Economic
23 Cooperation and Development (OECD), the United
24 States ranks 7th among OECD nations in wireless

1 broadband and 16th among fixed broadband access
2 per 100 inhabitants.

3 (9) Although grant programs of the Govern-
4 ment must continue to play a central role in financ-
5 ing the transportation, environment, energy, and
6 telecommunications infrastructure needs of the
7 United States, current and foreseeable demands on
8 existing Federal, State, and local funding for infra-
9 structure expansion exceed the resources to support
10 these programs by margins wide enough to prompt
11 serious concerns about the United States ability to
12 sustain long-term economic development, produc-
13 tivity, and international competitiveness.

14 (10) The capital markets, including central
15 banks, pension funds, financial institutions, sov-
16 ereign wealth funds, and insurance companies, have
17 a growing interest in infrastructure investment. The
18 establishment of a United States Government-owned
19 institution that would provide this investment oppor-
20 tunity to finance qualifying infrastructure projects
21 would attract needed capital for United States infra-
22 structure development.
