

114TH CONGRESS
2D SESSION

H. RES. 703

Expressing support for designation of November 2016, as “National Bladder Health Month”.

IN THE HOUSE OF REPRESENTATIVES

APRIL 26, 2016

Mr. ENGEL submitted the following resolution; which was referred to the Committee on Oversight and Government Reform

RESOLUTION

Expressing support for designation of November 2016, as
“National Bladder Health Month”.

Whereas tens of millions of people in the United States are affected by bladder diseases and conditions including urinary incontinence, overactive bladder, underactive bladder, interstitial cystitis, nocturia, urinary tract infections, bladder cancer, urotrauma, and neurogenic bladder;

Whereas bladder diseases and conditions have a significant impact on health and quality of life, contributing to decreased physical activity (which can increase obesity levels and risk of diabetes and cardiovascular disease), depression, social isolation, falls, sexual dysfunction, loss of self-esteem, hospitalizations, nursing home admissions, and even death;

Whereas bladder diseases and conditions result in costs to the United States economy estimated at more than \$70,000,000,000 annually;

Whereas bladder problems are highly stigmatized, and open dialogue generated by Bladder Health Month can reduce stigma and empower providers and patients to have much-needed conversations about bladder health;

Whereas medical and behavioral research to better understand and maintain bladder health and treat bladder diseases is critically needed, yet poorly recognized;

Whereas bladder diseases and conditions are common in military veterans;

Whereas more than 1 in 10 military servicemembers injured in Afghanistan and Iraq have “urotrauma” injuries (damage to the urinary tract or reproductive organs);

Whereas 1 in 3 younger women veterans report overactive bladder, stress urinary incontinence, and painful bladder symptoms;

Whereas more than $\frac{3}{4}$ of veterans with spinal cord injury suffer from neurogenic bladder;

Whereas bladder cancer is the fourth most commonly diagnosed cancer among Veterans Affairs (VA) Health System patients;

Whereas preventative campaigns and measures for diseases and conditions this extensive and expensive are routine and accepted in common medical, societal, and public health practice, yet none exists in a large, systematic fashion for bladder health; and

Whereas November 2016 would be an appropriate month to designate as “National Bladder Health Month” since

bladder health awareness has been promoted in November for more than 20 years: Now, therefore, be it

- 1 *Resolved*, That the House of Representatives supports
- 2 the designation of “National Bladder Health Month”.
