

115TH CONGRESS  
1ST SESSION

# H. R. 4525

To direct the Administrator of the National Oceanic and Atmospheric Administration to make grants to States and local governments and nongovernmental organizations for purposes of carrying out shoreline stabilization projects utilizing natural materials.

---

## IN THE HOUSE OF REPRESENTATIVES

DECEMBER 1, 2017

Mr. PALLONE introduced the following bill; which was referred to the Committee on Natural Resources

---

## A BILL

To direct the Administrator of the National Oceanic and Atmospheric Administration to make grants to States and local governments and nongovernmental organizations for purposes of carrying out shoreline stabilization projects utilizing natural materials.

1       *Be it enacted by the Senate and House of Representa-  
2 tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Living Shorelines Act  
5 of 2017”.

1     **SEC. 2. LIVING SHORELINE GRANT PROGRAM.**

2         (a) ESTABLISHMENT.—The Administrator of the Na-  
3         tional Oceanic and Atmospheric Administration shall  
4         make grants to eligible entities for purposes of—

5             (1) carrying out large- and small-scale, climate-  
6             resilient living shoreline projects; and

7             (2) encouraging innovation in the use of natural  
8             materials to protect coastal communities.

9         (b) PROJECT AND SELECTION.—

10             (1) IN GENERAL.—To be eligible to receive a  
11             grant under this section, an eligible entity shall sub-  
12             mit to the Administrator a proposed living shoreline  
13             project, including monitoring and data collection  
14             with respect to the project.

15             (2) SELECTION.—

16                 (A) IN GENERAL.—The Administrator  
17             shall select recipients based on criteria to be  
18             prescribed by the Administrator in consultation  
19             with relevant National Oceanic and Atmo-  
20             spheric Administration offices, such as the Office  
21             of Habitat Conservation, the Office for Coastal  
22             Management, and the Restoration Center, and  
23             taking into account the potential of proposed  
24             projects submitted under this subsection to pro-  
25             tect communities and maintain the viability of

1           the environment in areas where such proposed  
2           projects are to be carried out.

3           (B) PRIORITY.—In selecting recipients the  
4           Administrator shall give priority consideration  
5           to a proposed project to be conducted in an  
6           area for which the President has declared, within  
7           the 10-year period preceding the submission  
8           of a proposed project, that a major disaster ex-  
9           ists pursuant to section 401 of the Robert T.  
10          Stafford Disaster Relief and Emergency Assist-  
11          ance Act (42 U.S.C. 5170) due to a hurricane,  
12          tropical storm, coastal storm, or flooding.

13          (3) MINIMUM LEVEL OF PROTECTION.—

14           (A) IN GENERAL.—The Administrator  
15          shall select proposed projects for grants under  
16          this section that—

17               (i) are primarily focused on providing  
18               protection for a coastal community; and  
19               (ii) demonstrate and quantify the abil-  
20               ity of the project to meet a minimal level  
21               of such protection.

22           (B) PROTECTION DEFINED.—In this para-  
23          graph the term “protection” includes—

24               (i) mitigating the effects of erosion;

- (ii) absorbing the impact of coastal storms;
- (iii) mitigating shoreline flooding;
- (iv) mitigating the effects of sea level rise; and
- (v) other forms of protection as determined by the Administrator.

(4) COMMUNITY PROTECTION STANDARDS.—

(A) IN GENERAL.—The Administrator—

(i) shall make the determination under paragraph (3) under standards established by the Administrator in consultation with the Corps of Engineers and relevant National Oceanic and Atmospheric Administration offices, such as the Office of Habitat Conservation, the Office for Coastal Management, and the Restoration Center; and

(ii) in establishing such standards, may consult with relevant interagency councils, such as the Estuary Habitat Restoration Council.

(B) CONSIDERATIONS.—Such standards shall take into account historic flooding and projected flooding, climate change, erosion, the

1           value of properties in the community, and eco-  
2           logical benefits of a proposed project.

3       (c) USE OF FUNDS.—Grants made under this section  
4       may be used by recipients only to—

5           (1) carry out living shoreline projects; and  
6           (2) monitor and collect data on the success and  
7           deficiencies of projects, in accordance with standards  
8           issued by the Administrator under subsection (e)(2).

9       (d) COST-SHARING.—An eligible entity that receives  
10      a grant under this section shall provide, from non-Federal  
11      sources, not less than 50 percent of the funds towards the  
12      total cost, including administrative costs, of each living  
13      shoreline project funded by such grant.

14       (e) MONITORING AND REPORT.—

15           (1) IN GENERAL.—The Administrator shall re-  
16           quire each recipient of a grant under this section (or  
17           their representative) to—

18           (A) transmit to the Administrator data col-  
19           lected with the grant;

20           (B) monitor approved projects conducted  
21           with grants under this section and collect data  
22           on the protection provided by such projects and  
23           the success and deficiencies of such projects in  
24           providing such protection;

(C) make such data available to the public through the website of the National Oceanic and Atmospheric Administration; and

(D) by not later than December 31, 2022, publish a report on the effectiveness of the program under this section in increasing protection of coastal communities through living shorelines techniques, including—

(i) descriptions of—

(I) the projects that were awarded grants;

(II) the construction carried out under such projects; and

(III) what techniques and materials were used in such projects; and

(ii) data on the performance of such effects in providing such protection.

## STANDARDS.—

(A) IN GENERAL.—Not later than 90 days after the date of the enactment of this Act the Administrator shall, in consultation with relevant offices of the National Oceanic and Atmospheric Administration and nongovernmental organizations, issue standards for the collection under subsection (c) and this subsection of data

1           regarding the success and deficiencies of  
2           projects conducted with grants under this sec-  
3           tion.

4           (B) REPORTING.—The standards shall re-  
5           quire reporting of such data to the Administra-  
6           tion on a regular basis.

7           (f) DEFINITIONS.—For purposes of this section:

8           (1) ADMINISTRATOR.—The term “Adminis-  
9           trator” means the Administrator of the National  
10           Oceanic and Atmospheric Administration.

11           (2) ELIGIBLE ENTITY.—The term “eligible enti-  
12           ty” means each of the following:

13           (A) A State or a unit of general local gov-  
14           ernment in a State.

15           (B) Nongovernmental organizations that  
16           are described in section 501(c)(3) of the Inter-  
17           nal Revenue Code of 1986 and exempt from tax  
18           under section 501(a) of such Code.

19           (3) LIVING SHORELINE PROJECT.—The term  
20           “living shoreline project”—

21           (A) means a project to mitigate the effects  
22           of erosion caused by shoreline flooding or  
23           inundation, currents, and wave energy,  
24           through project design that stabilizes a shore-  
25           line by using natural materials to create buffers

1 to absorb the impact of coastal storms, flooding,  
2 and wave energy and to prevent or minimize  
3 (or both) shoreline erosion, that—

4 (i) incorporates as many natural elements as possible, such as native wetlands,  
5 submerged aquatic plants, native grasses,  
6 shrubs, or trees;

7 (ii) utilizes techniques that incorporate ecological and coastal engineering  
8 principles in shoreline stabilization; and  
9

10 (iii) to the extent possible, maintains  
11 or restores existing natural slopes and connections between uplands and adjacent  
12 wetlands or surface waters; and  
13

14 (B) may include, but not be limited to, the  
15 use of—  
16

17 (i) natural elements, such as sand,  
18 wetland plants, logs, oysters or other shellfish,  
19 submerged aquatic vegetation, native grasses,  
20 shrubs, trees, or coir fiber logs;  
21 and

22 (ii) structural materials, such as stone, concrete, wood, vinyl, oyster domes,  
23 or other approved engineered structures.  
24

1                             (4) STATE.—The term “State” means each of  
2                             the several States, the Commonwealth of Puerto  
3                             Rico, the United States Virgin Islands, Guam,  
4                             American Samoa, the Commonwealth of the North-  
5                             ern Mariana Islands, and each Federally recognized  
6                             Indian Tribe.

7                             (g) AUTHORIZATION OF APPROPRIATIONS.—There  
8                             are authorized to be appropriated \$20,000,000 to the Ad-  
9                             ministrator for each of fiscal years 2018 through 2023  
10                           for purposes of carrying out this section.
