H. R. 5586

To promote the domestic development and deployment of clean energy technologies required for the 21st century.

IN THE HOUSE OF REPRESENTATIVES

APRIL 23, 2018

A BILL

To promote the domestic development and deployment of clean energy technologies required for the 21st century.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 This Act may be cited as the “Clean Energy Victory
5 Bond Act of 2018”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

1 (1) There is enormous potential for increasing
2 renewable energy production and energy efficiency
3 installation in the United States.

4 (2) In order to expand renewable energy and
5 energy efficiency technologies in the United States,
6 and maintain United States leadership, the United
7 States must invest in research and development of
8 these technologies. The Office of Energy Efficiency
9 and Renewable Energy of the Department of Energy
10 (EERE) estimates that taxpayer investment of \$12
11 billion into EERE research and development port-
12 folio has already yielded an estimated net economic
13 benefit to the United States of more than \$230 bil-
14 lion, with an overall annual return on investment of
15 more than 20 percent.

16 (3) Other nations, including China and Ger-
17 many are ahead of the United States in manufac-
18 turing and deploying various clean energy tech-
19 nologies, even though the United States invented
20 many of these technologies.

21 (4) Investments in renewable energy and energy
22 efficiency projects in the United States create green
23 jobs for United States citizens across the United
24 States. Hundreds of thousands of jobs could be cre-

1 ated through expanded government support for clean
2 energy and energy efficiency.

3 (5) As Americans choose energy efficiency and
4 clean energy and transportation, it reduces our de-
5 pendence on foreign oil and improves our energy se-
6 curity.

7 (6) Bonds are a low-cost method for encour-
8 aging clean energy, not requiring direct budget allo-
9 cations or expenditures. The projects supported
10 through Clean Energy Victory Bonds will create jobs
11 and business revenues that will increase Federal tax
12 revenues, while simultaneously reducing health and
13 environmental costs incurred by the Federal Govern-
14 ment nationwide.

15 (7) In World War II, over 80 percent of Amer-
16 ican households purchased Victory Bonds to support
17 the war effort, raising over \$185 billion, or over \$2
18 trillion in today's dollars.
