

116TH CONGRESS  
1ST SESSION

# H. R. 2170

To support research, development, and other activities to develop innovative vehicle technologies, and for other purposes.

---

## IN THE HOUSE OF REPRESENTATIVES

APRIL 9, 2019

Mrs. DINGELL (for herself and Ms. STEVENS) introduced the following bill; which was referred to the Committee on Science, Space, and Technology, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

---

## A BILL

To support research, development, and other activities to develop innovative vehicle technologies, and for other purposes.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Vehicle Innovation Act  
5       of 2019”.

6       **SEC. 2. DEFINITIONS.**

7       In this Act:

1                             (1) DEPARTMENT.—The term “Department”  
2     means the Department of Energy.

3                             (2) SECRETARY.—The term “Secretary” means  
4     the Secretary of Energy.

5 **SEC. 3. OBJECTIVES.**

6     The objectives of this Act are—

7                             (1) to establish a consistent and consolidated  
8     authority for the vehicle technology program at the  
9     Department;

10                          (2) to develop United States technologies and  
11     practices that—

12                          (A) improve the fuel efficiency and emis-  
13     sions of all vehicles produced in the United  
14     States; and

15                          (B) reduce vehicle reliance on petroleum-  
16     based fuels;

17                          (3) to support domestic research, development,  
18     engineering, demonstration, and commercial applica-  
19     tion and manufacturing of advanced vehicles, en-  
20     gines, and components;

21                          (4) to enable vehicles to move larger volumes of  
22     goods and more passengers with less energy and  
23     emissions;

24                          (5) to develop cost-effective advanced tech-  
25     nologies for wide-scale utilization throughout the

1 passenger, commercial, government, and transit ve-  
2 hicle sectors;

3 (6) to allow for greater consumer choice of vehi-  
4 cle technologies and fuels;

5 (7) shorten technology development and inte-  
6 gration cycles in the vehicle industry;

7 (8) to ensure a proper balance and diversity of  
8 Federal investment in vehicle technologies; and

9 (9) to strengthen partnerships between Federal  
10 and State governmental agencies and the private  
11 and academic sectors.

**12 SEC. 4. COORDINATION AND NONDUPLICATION.**

13 The Secretary shall ensure, to the maximum extent  
14 practicable, that the activities authorized by this Act do  
15 not duplicate those of other programs within the Depart-  
16 ment or other relevant research agencies.

**17 SEC. 5. AUTHORIZATION OF APPROPRIATIONS.**

18 There are authorized to be appropriated to the Sec-  
19 retary for research, development, engineering, demonstra-  
20 tion, and commercial application of vehicles and related  
21 technologies in the United States, including activities au-  
22 thorized under this Act—

- 23 (1) for fiscal year 2020, \$313,567,000;  
24 (2) for fiscal year 2021, \$326,109,000;  
25 (3) for fiscal year 2022, \$339,154,000;

- 1                   (4) for fiscal year 2023, \$352,720,000; and  
2                   (5) for fiscal year 2024, \$366,829,000.

3 **SEC. 6. REPORTING.**

4                 (a) TECHNOLOGIES DEVELOPED.—Not later than 18  
5 months after the date of enactment of this Act and annually thereafter through 2024, the Secretary shall submit  
6 to Congress a report regarding the technologies developed  
7 as a result of the activities authorized by this Act, with  
8 a particular emphasis on whether the technologies were  
9 successfully adopted for commercial applications, and if  
10 so, whether products relying on those technologies are  
11 manufactured in the United States.

13                 (b) ADDITIONAL MATTERS.—At the end of each fiscal  
14 year through 2024, the Secretary shall submit to the  
15 relevant Congressional committees of jurisdiction an annual report describing activities undertaken in the previous year under this Act, active industry participants, the status of public-private partnerships, progress of the program in meeting goals and timelines, and a strategic plan for funding of activities across agencies.

21 **SEC. 7. VEHICLE RESEARCH AND DEVELOPMENT.**

22                 (a) PROGRAM.—

23                 (1) ACTIVITIES.—The Secretary shall conduct a program of basic and applied research, development, engineering, demonstration, and commercial applica-

1       tion activities on materials, technologies, and proc-  
2       esses with the potential to substantially reduce or  
3       eliminate petroleum use and the emissions of the  
4       passenger and commercial vehicles of the United  
5       States, including activities in the areas of—  
6               (A) electrification of vehicle systems;  
7               (B) batteries, ultracapacitors, and other  
8               energy storage devices;  
9               (C) power electronics;  
10              (D) vehicle, component, and subsystem  
11              manufacturing technologies and processes;  
12              (E) engine efficiency and combustion opti-  
13              mization;  
14              (F) waste heat recovery;  
15              (G) transmission and drivetrains;  
16              (H) hydrogen vehicle technologies, includ-  
17              ing fuel cells and internal combustion engines,  
18              and hydrogen infrastructure, including hydro-  
19              gen energy storage to enable renewables and  
20              provide hydrogen for fuel and power;  
21              (I) natural gas vehicle technologies;  
22              (J) aerodynamics, rolling resistance (in-  
23              cluding tires and wheel assemblies), and acces-  
24              sory power loads of vehicles and associated  
25              equipment;

- (K) vehicle weight reduction, including lightweighting materials and the development of manufacturing processes to fabricate, assemble, and use dissimilar materials;
- (L) friction and wear reduction;
- (M) engine and component durability;
- (N) innovative propulsion systems;
- (O) advanced boosting systems;
- (P) hydraulic hybrid technologies;
- (Q) engine compatibility with and optimization for a variety of transportation fuels including natural gas and other liquid and gaseous fuels;
- (R) predictive engineering, modeling, and simulation of vehicle and transportation systems;
- (S) refueling and charging infrastructure for alternative fueled and electric or plug-in electric hybrid vehicles, including the unique challenges facing rural areas;
- (T) gaseous fuels storage systems and system integration and optimization;
- (U) sensing, communications, and actuation technologies for vehicle, electrical grid, and infrastructure;

(V) efficient use, substitution, and recycling of potentially critical materials in vehicles, including rare earth elements and precious metals, at risk of supply disruption;

5 (W) aftertreatment technologies;

(X) thermal management of battery systems;

(Y) retrofitting advanced vehicle technologies to existing vehicles;

(Z) development of common standards, specifications, and architectures for both transportation and stationary battery applications;

(AA) advanced internal combustion engines;

15 (BB) mild hybrid;

16 (CC) engine down speeding;

(DD) vehicle-to-vehicle, vehicle-to-pedestrian, and vehicle-to-infrastructure technologies; and

(EE) other research areas as determined by the Secretary.

1       tivities and maintains competency in mid- to long-  
2       term transformational vehicle technologies with po-  
3       tential to achieve reductions in emissions, including  
4       activities in the areas of—

5                 (A) hydrogen vehicle technologies, includ-  
6                 ing fuel cells, hydrogen storage, infrastructure,  
7                 and activities in hydrogen technology validation  
8                 and safety codes and standards;

9                 (B) multiple battery chemistries and novel  
10          energy storage devices, including nonchemical  
11          batteries and electromechanical storage tech-  
12          nologies such as hydraulics, flywheels, and com-  
13          pressed air storage;

14                 (C) communication and connectivity among  
15          vehicles, infrastructure, and the electrical grid;  
16          and

17                 (D) other innovative technologies research  
18          and development, as determined by the Sec-  
19          retary.

20       (3) INDUSTRY PARTICIPATION.—

21                 (A) IN GENERAL.—To the maximum ex-  
22          tent practicable, activities under this Act shall  
23          be carried out in partnership or collaboration  
24          with automotive manufacturers, heavy commer-  
25          cial, vocational, and transit vehicle manufactur-

1           ers, qualified plug-in electric vehicle manufac-  
2           turers, compressed natural gas vehicle manufac-  
3           turers, vehicle and engine equipment and com-  
4           ponent manufacturers, manufacturing equip-  
5           ment manufacturers, advanced vehicle service  
6           providers, fuel producers and energy suppliers,  
7           electric utilities, universities, national labora-  
8           tories, and independent research laboratories.

9           (B) REQUIREMENTS.—In carrying out this  
10          Act, the Secretary shall—

11                 (i) determine whether a wide range of  
12          companies that manufacture or assemble  
13          vehicles or components in the United  
14          States are represented in ongoing public-  
15          private partnership activities, including  
16          firms that have not traditionally partici-  
17          pated in federally sponsored research and  
18          development activities, and where possible,  
19          partner with such firms that conduct sig-  
20          nificant and relevant research and develop-  
21          ment activities in the United States;

22                 (ii) leverage the capabilities and re-  
23          sources of, and formalize partnerships  
24          with, industry-led stakeholder organiza-  
25          tions, nonprofit organizations, industry

1 consortia, and trade associations with ex-  
2 pertise in the research and development of,  
3 and education and outreach activities in,  
4 advanced automotive and commercial vehi-  
5 cle technologies;

6 (iii) develop more effective processes  
7 for transferring research findings and tech-  
8 nologies to industry;

9 (iv) support public-private partner-  
10 ships, dedicated to overcoming barriers in  
11 commercial application of transformational  
12 vehicle technologies, that use such indus-  
13 try-led technology development facilities of  
14 entities with demonstrated expertise in  
15 successfully designing and engineering pre-  
16 commercial generations of such trans-  
17 formational technology; and

18 (v) promote efforts to ensure that  
19 technology research, development, engi-  
20 neering, and commercial application activi-  
21 ties funded under this Act are carried out  
22 in the United States.

23 (4) INTERAGENCY AND INTRAGENCY COORDI-  
24 NATION.—To the maximum extent practicable, the  
25 Secretary shall coordinate research, development,

1 demonstration, and commercial application activities  
2 among—

3 (A) relevant programs within the Department,  
4 including—

5 (i) the Office of Energy Efficiency  
6 and Renewable Energy;

7 (ii) the Office of Science;

8 (iii) the Office of Electricity Delivery  
9 and Energy Reliability;

10 (iv) the Office of Fossil Energy;

11 (v) the Advanced Research Projects  
12 Agency—Energy; and

13 (vi) other offices as determined by the  
14 Secretary; and

15 (B) relevant technology research and development programs within other Federal agencies, as determined by the Secretary.

16 (5) FEDERAL DEMONSTRATION OF TECHNOLOGIES.—The Secretary shall make information available to procurement programs of Federal agencies regarding the potential to demonstrate technologies resulting from activities funded through programs under this Act.

17 (6) INTERGOVERNMENTAL COORDINATION.—  
18 The Secretary shall seek opportunities to leverage

1       resources and support initiatives of State and local  
2       governments in developing and promoting advanced  
3       vehicle technologies, manufacturing, and infrastruc-  
4       ture.

5                 (7) CRITERIA.—In awarding grants under the  
6       program under this subsection, the Secretary shall  
7       give priority to those technologies (either individually  
8       or as part of a system) that—

9                         (A) provide the greatest aggregate fuel  
10       savings based on the reasonable projected sales  
11       volumes of the technology; and

12                         (B) provide the greatest increase in United  
13       States employment.

14                 (8) SECONDARY USE APPLICATIONS.—

15                         (A) IN GENERAL.—The Secretary shall  
16       carry out a research, development, and dem-  
17       onstration program that—

18                                 (i) builds on any work carried out  
19       under section 915 of the Energy Policy Act  
20       of 2005 (42 U.S.C. 16195);

21                                 (ii) identifies possible uses of a vehicle  
22       battery after the useful life of the battery  
23       in a vehicle has been exhausted;

24                                 (iii) conducts long-term testing to  
25       verify performance and degradation pre-

1                   dictions and lifetime valuations for sec-  
2                   ondary uses;

3                   (iv) evaluates innovative approaches to  
4                   recycling materials from plug-in electric  
5                   drive vehicles and the batteries used in  
6                   plug-in electric drive vehicles;

7                   (v)(I) assesses the potential for mar-  
8                   kets for uses described in clause (ii) to de-  
9                   velop; and

10                  (II) identifies any barriers to the de-  
11                  velopment of those markets; and

12                  (vi) identifies the potential uses of a  
13                  vehicle battery—

14                  (I) with the most promise for  
15                  market development; and

16                  (II) for which market develop-  
17                  ment would be aided by a demonstra-  
18                  tion project.

19                  (B) REPORT.—Not later than 1 year after  
20                  the date of enactment of this Act, the Secretary  
21                  shall submit to the appropriate committees of  
22                  Congress an initial report on the findings of the  
23                  program described in subparagraph (A), includ-  
24                  ing recommendations for stationary energy stor-

1           age and other potential applications for bat-  
2           teries used in plug-in electric drive vehicles.

3           (C) SECONDARY USE DEMONSTRATION.—

4               (i) IN GENERAL.—Based on the re-  
5               sults of the program described in subparagraph  
6               (A), the Secretary shall develop  
7               guidelines for projects that demonstrate  
8               the secondary uses and innovative recycling  
9               of vehicle batteries.

10              (ii) PUBLICATION OF GUIDELINES.—  
11               Not later than 18 months after the date of  
12               enactment of this Act, the Secretary  
13               shall—

14                   (I) publish the guidelines de-  
15               scribed in clause (i); and

16                   (II) solicit applications for fund-  
17               ing for demonstration projects.

18                   (iii) PILOT DEMONSTRATION PRO-  
19               GRAM.—Not later than 21 months after  
20               the date of enactment of this Act, the Sec-  
21               retary shall select proposals for grant  
22               funding under this subsection, based on an  
23               assessment of which proposals are mostly  
24               likely to contribute to the development of  
25               a secondary market for batteries.

1       (b) MANUFACTURING.—The Secretary shall carry out  
2 a research, development, engineering, demonstration, and  
3 commercial application program of advanced vehicle man-  
4 ufacturing technologies and practices, including innovative  
5 processes—

6               (1) to increase the production rate and decrease  
7 the cost of advanced battery and fuel cell manufac-  
8 turing;

9               (2) to vary the capability of individual manufac-  
10 turing facilities to accommodate different battery  
11 chemistries and configurations;

12               (3) to reduce waste streams, emissions, and en-  
13 ergy intensity of vehicle, engine, advanced battery,  
14 and component manufacturing processes;

15               (4) to recycle and remanufacture used batteries  
16 and other vehicle components for reuse in vehicles or  
17 stationary applications;

18               (5) to develop manufacturing processes to effec-  
19 tively fabricate, assemble, and produce cost-effective  
20 lightweight materials such as advanced aluminum  
21 and other metal alloys, polymeric composites, and  
22 carbon fiber for use in vehicles;

23               (6) to produce lightweight high pressure storage  
24 systems for gaseous fuels;

- 1                   (7) to design and manufacture purpose-built hy-
- 2                   drogen fuel cell vehicles and components;
- 3                   (8) to improve the calendar life and cycle life of
- 4                   advanced batteries; and
- 5                   (9) to produce permanent magnets for advanced
- 6                   vehicles.

7 SEC. 8. MEDIUM- AND HEAVY-DUTY COMMERCIAL AND  
8 TRANSIT VEHICLES PROGRAM.

9        The Secretary, in partnership with relevant research  
10 and development programs in other Federal agencies, and  
11 a range of appropriate industry stakeholders, shall carry  
12 out a program of cooperative research, development, dem-  
13 onstration, and commercial application activities on ad-  
14 vanced technologies for medium- to heavy-duty commer-  
15 cial, vocational, recreational, and transit vehicles, includ-  
16 ing activities in the areas of—

17                     (1) engine efficiency and combustion research;

18                     (2) onboard storage technologies for compressed

19                     and liquefied natural gas;

20                     (3) development and integration of engine tech-

21                     nologies designed for natural gas operation of a vari-

22                     ety of vehicle platforms;

23                     (4) waste heat recovery and conversion;

24                     (5) improved aerodynamics and tire rolling re-

25                     sistance;

- (6) energy and space-efficient emissions control systems;
- (7) mild hybrid, heavy hybrid, hybrid hydraulic, plug-in hybrid, and electric platforms, and energy storage technologies;
- (8) drivetrain optimization;
- (9) friction and wear reduction;
- (10) engine idle and parasitic energy loss reduction;
- (11) electrification of accessory loads;
- (12) onboard sensing and communications technologies;
- (13) advanced lightweighting materials and vehicle designs;
- (14) increasing load capacity per vehicle;
- (15) thermal management of battery systems;
- (16) recharging infrastructure;
- (17) compressed natural gas infrastructure;
- (18) advanced internal combustion engines;
- (19) complete vehicle and power pack modeling, simulation, and testing;
- (20) hydrogen vehicle technologies, including fuel cells and internal combustion engines, and hydrogen infrastructure, including hydrogen energy

1 storage to enable renewables and provide hydrogen  
2 for fuel and power;

3 (21) retrofitting advanced technologies onto ex-  
4 isting truck fleets;

5 (22) advanced boosting systems;

6 (23) engine down speeding; and

7 (24) integration of these and other advanced  
8 systems onto a single truck and trailer platform.

9 **SEC. 9. CLASS 8 TRUCK AND TRAILER SYSTEMS DEM-**  
10 **ONSTRATION.**

11 (a) IN GENERAL.—The Secretary shall conduct a  
12 competitive grant program to demonstrate the integration  
13 of multiple advanced technologies on Class 8 truck and  
14 trailer platforms, including a combination of technologies  
15 listed in section 8.

16 (b) APPLICANT TEAMS.—Applicant teams may be  
17 comprised of truck and trailer manufacturers, engine and  
18 component manufacturers, fleet customers, university re-  
19 searchers, and other applicants as appropriate for the de-  
20 velopment and demonstration of integrated Class 8 truck  
21 and trailer systems.

22 **SEC. 10. TECHNOLOGY TESTING AND METRICS.**

23 The Secretary, in coordination with the partners of  
24 the interagency research program described in section 8—

- 1                 (1) shall develop standard testing procedures
- 2                 and technologies for evaluating the performance of
- 3                 advanced heavy vehicle technologies under a range of
- 4                 representative duty cycles and operating conditions,
- 5                 including for heavy hybrid propulsion systems;
- 6                 (2) shall evaluate heavy vehicle performance
- 7                 using work performance-based metrics other than
- 8                 those based on miles per gallon, including those
- 9                 based on units of volume and weight transported for
- 10                freight applications, and appropriate metrics based
- 11                on the work performed by nonroad systems; and
- 12                (3) may construct heavy duty truck and bus
- 13                testing facilities.

14 **SEC. 11. NONROAD SYSTEMS PILOT PROGRAM.**

15               The Secretary shall undertake a pilot program of re-

16               search, development, demonstration, and commercial ap-

17               plications of technologies to improve total machine or sys-

18               tem efficiency for nonroad mobile equipment including ag-

19               ricultural, construction, air, and sea port equipment, and

20               shall seek opportunities to transfer relevant research find-

21               ings and technologies between the nonroad and on-high-

22               way equipment and vehicle sectors.

1   **SEC. 12. REPEAL OF EXISTING AUTHORITIES.**

2       (a) IN GENERAL.—Sections 706, 711, 712, and 933  
3 of the Energy Policy Act of 2005 (42 U.S.C. 16051,  
4 16061, 16062, 16233) are repealed.

5       (b) ENERGY EFFICIENCY.—Section 911 of the En-  
6 ergy Policy Act of 2005 (42 U.S.C. 16191) is amended—

7           (1) in subsection (a)—

8              (A) in paragraph (1)(A), by striking “vehi-  
9              cles, buildings,” and inserting “buildings”; and

10             (B) in paragraph (2)—

11               (i) by striking subparagraph (A); and

12               (ii) by redesignating subparagraphs

13              (B) through (E) as subparagraphs (A)  
14              through (D), respectively; and

15             (2) in subsection (c)—

16               (A) by striking paragraph (3);

17               (B) by redesignating paragraph (4) as  
18              paragraph (3); and

19               (C) in paragraph (3) (as so redesignated),  
20              by striking “(a)(2)(D)” and inserting  
21              “(a)(2)(C)”.

○
