## A BILL

To ensure that older adults and individuals with disabilities are prepared for disasters, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Real Emergency Ac-  
5 cess for Aging and Disability Inclusion for Disasters Act”  
6 or the “REAADI for Disasters Act”.

1 **SEC. 2. FINDINGS AND SENSE OF CONGRESS.**

2 (a) FINDINGS.—Congress makes the following find-  
3 ings:

4 (1) In the United States, according to the Cen-  
5 ters for Disease Control and Prevention, there are  
6 more than 70,000,000 adults who are individuals  
7 with disabilities and, according to the Bureau of the  
8 Census, there are more than 54,000,000 adults age  
9 65 or older.

10 (2) There have been nearly 400 emergencies de-  
11 clared under section 501 of the Robert T. Stafford  
12 Disaster Relief and Emergency Assistance Act (42  
13 U.S.C. 5191) related to hurricanes and tropical cy-  
14 clones during the period beginning January 2000  
15 and ending December 2024. These declared emer-  
16 gencies have directly resulted in at least 1,442  
17 deaths in the United States.

18 (3) The National Oceanic and Atmospheric Ad-  
19 ministration estimates that—

20 (A) the cumulative damage from weather-  
21 and climate-related disasters in 2022 cost the  
22 United States over \$182,700,000,000; and

23 (B) 27 of the disasters in 2024 cost over  
24 \$1,000,000,000 each.

1           (4) Individuals with disabilities and older adults  
2 have been found to die at higher rates, compared to  
3 the general population, during disasters.

4           (5) According to the Federal Emergency Man-  
5 agement Agency, in 2024, the United States experi-  
6 enced a total of 108 major disaster and emergency  
7 declarations under sections 401 and 501, respec-  
8 tively, of the Robert T. Stafford Disaster Relief and  
9 Emergency Assistance Act (42 U.S.C. 5170, 5191),  
10 which resulted in more than 4,000,000 individuals  
11 applying for assistance through the Agency.

12           (6) According to the Federal Emergency Man-  
13 agement Agency, in 2022, the United States experi-  
14 enced 90 major disasters declared under section 401  
15 of the Robert T. Stafford Disaster Relief and Emer-  
16 gency Assistance Act (42 U.S.C. 5170) affecting  
17 more than 54,000,000 people, and more than  
18 16,000,000 of those people were adults with disabil-  
19 ities.

20           (7) Failure to provide accessibility for, or plan  
21 for accommodating, individuals with physical or sen-  
22 sory disabilities, chronic illness, or mental disabilities  
23 decreases the ability of those individuals to evacuate  
24 prior to or during a disaster.

1           (8) Households of individuals with disabilities  
2           are more likely to need assistance and are less likely  
3           to be able to evacuate in advance of disasters.

4           (9) Less than a third of individuals with intel-  
5           lectual disabilities and individuals needing personal  
6           care attendants have planned with their personal  
7           care providers what to do in a disaster.

8           (10) Evacuation information, including orders,  
9           is not uniformly communicated in ways and via  
10          media that are accessible to individuals with disabili-  
11          ties, including being communicated in ways that  
12          lack use of American Sign Language, captions, and  
13          plain language on websites, instructional materials,  
14          and television and radio announcements.

15          (11) Displaced individuals with disabilities  
16          served in general population shelters have better ac-  
17          cess to information and material resources than indi-  
18          viduals with disabilities in specially designed shel-  
19          ters.

20          (12) Despite the better access to information  
21          and resources provided at general population shel-  
22          ters, personnel in general population shelters often  
23          do not have the resources or training to address the  
24          needs of individuals with disabilities and older  
25          adults.

1           (13) Public shelters often do not have dis-  
2           ability-related accommodations, often forcing individ-  
3           uals with disabilities and older adults to be seg-  
4           regated, sometimes apart from their families and  
5           natural supports during disasters.

6           (14) Households with individuals with disabil-  
7           ities sustain more costly property damage from dis-  
8           asters than households without individuals with dis-  
9           abilities.

10          (15) Historically, disaster-related recommenda-  
11          tions for individuals with disabilities and older  
12          adults have been typically aimed at caregivers and  
13          service providers, not individuals with disabilities  
14          and older adults themselves.

15          (16) Thousands of individuals with disabilities  
16          have been denied their civil rights because they do  
17          not receive accessible notice during disasters—

18                 (A) of spoken instructions via phone or  
19                 video; or

20                 (B) of instructions regarding evacuations,  
21                 sheltering, and other procedures during disas-  
22                 ters.

23          (17) Disaster shelters and services do not rou-  
24          tinely have American Sign Language interpreters

1 nor procedures written or presented in plain lan-  
2 guage.

3 (18) Individuals with disabilities and older  
4 adults are more at risk for loss of life, loss of inde-  
5 pendence, or violation of civil rights than the general  
6 population during times of disasters, response, and  
7 recovery.

8 (b) SENSE OF CONGRESS.—It is the sense of Con-  
9 gress that—

10 (1) individuals with disabilities and older adults  
11 should be supported during times of disasters, and  
12 during disaster preparedness, response, recovery,  
13 and mitigation, in order to—

14 (A) ensure maintenance of and access to  
15 services and supports; and

16 (B) enable those individuals and adults to  
17 return to their communities in a timely manner  
18 as compared with the general population;

19 (2) during the recovery and mitigation phases  
20 of disaster response, all buildings and services  
21 should be designed, and constructed or recon-  
22 structed, according to principles of universal design  
23 and to the standards established by the Architec-  
24 tural and Transportation Barriers Compliance

1 Board in order to ensure access for individuals with  
2 disabilities, older adults, and all individuals;

3 (3) individuals with disabilities and older adults  
4 should have access to shelters and other services  
5 during disasters in the same locations and settings  
6 as the general population;

7 (4) individuals with disabilities and older adults  
8 should receive information about preparation for, re-  
9 sponse to, recovery from, and mitigation of disasters  
10 in formats accessible to them, including in American  
11 Sign Language, Braille, and plain language, as well  
12 as captioned video messages;

13 (5) individuals with disabilities and older adults  
14 must be included as key speakers, essential stake-  
15 holders, and decisionmakers in the preparation (in-  
16 cluding planning), response, recovery, and mitigation  
17 phases of disasters;

18 (6) local, State (including territorial), Tribal,  
19 and Federal disaster planning must include robust  
20 representation of individuals with disabilities and  
21 older adults; and

22 (7) individuals with disabilities and older adults  
23 must be included in the evaluation of governmental,  
24 VOAD, and other nongovernmental preparation (in-

1 including planning), response, recovery, and mitigation  
2 of disasters.

3 **SEC. 3. PURPOSES.**

4 The purposes of this Act are to—

5 (1) improve the inclusion of individuals with  
6 disabilities and older adults in the preparation for,  
7 response to, recovery from, and mitigation of disas-

10 older adults with disabilities are free from discrimi-

13 in, all phases of disaster preparation, response, re-  
14 covery, and mitigation;

15 (3) ensure compliance with the Americans with  
16 Disabilities Act of 1990, the Rehabilitation Act of  
17 1973, and other disability laws during preparation  
18 for, response to, recovery from, and mitigation of  
19 disasters;

20 (4) improve coordination among the commu-  
21 nities of individuals with disabilities and older  
22 adults, including multiply marginalized BIPOC and  
23 LGBTQ+ communities, government agencies, cen-  
24 ters for independent living, VOADs, and other non-  
25 governmental organizations, including organizations

1 that represent and are comprised of covered individ-  
2 uals, in preparing (including planning) for, respond-  
3 ing to, recovery from, and mitigation of disasters;

4 (5) improve outcomes for all individuals, includ-  
5 ing individuals with disabilities and older adults, who  
6 are affected by disasters, and increase community  
7 resilience in responding to disasters;

8 (6) establish dedicated Federal funding for ca-  
9 pacity-building and rapid response to support Fed-  
10 eral, State (including territorial), Tribal, and local  
11 entities, and public and private human services enti-  
12 ties, to support activities to address the needs of at-  
13 risk individuals before, during, and after a disaster;  
14 and

15 (7) enact into Federal law standards of care  
16 and standards for protection of civil rights, for older
