

119TH CONGRESS
2D SESSION

S. 4733

To establish a grant program supporting teacher and school leader induction programs in public schools, and for other purposes.

IN THE SENATE OF THE UNITED STATES

JUNE 10, 2026

Mr. KAINE introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

A BILL

To establish a grant program supporting teacher and school leader induction programs in public schools, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Beginning Educator
5 Mentorship and Retention Act”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) A high rate of teacher turnover, when
9 teachers move to another school or leave the profes-
10 sion altogether, is a primary contributor to teacher

1 shortages at the local, State, and national levels.
2 Moreover, teachers with the fewest years of experi-
3 ence have the highest rates of turnover. In the
4 2020–2021 school year, almost 12 percent of all
5 public school teachers had 3 years or fewer of teach-
6 ing experience. By the next school year, 1 in 5 nov-
7 ice teachers had moved to another school or left the
8 profession entirely. Teacher inexperience and turn-
9 over can—

10 (A) negatively impact student learning;

11 (B) disrupt school stability, negatively im-
12 pacting collegial relationships, collaboration,
13 and the accumulation of institutional knowl-
14 edge; and

15 (C) result in significant financial costs to
16 replace teachers who leave.

17 (2) Studies have shown that beginning teachers
18 who go through 2-year mentoring and induction pro-
19 grams are more effective in improving student learn-
20 ing and achievement, particularly on reading and
21 mathematics assessments. Studies have also found
22 that intensive mentoring and induction is signifi-
23 cantly associated with decreased turnover and im-
24 proved teaching practices.

1 (3) Students of color are more likely to be
2 taught by inexperienced teachers. According to data
3 from the Department of Education’s Civil Rights
4 Data Collection analyzed by the Learning Policy In-
5 stitute, nearly 1 in 6 teachers are just beginning
6 their career at schools with the highest concentra-
7 tions of students of color, compared to 1 in 10
8 teachers in schools serving the greatest proportions
9 of white students.

10 (4) Schools in rural settings often have more
11 beginning teachers, and the challenges they face are
12 often amplified compared to beginning teachers in
13 suburban or urban contexts. Providing strong men-
14 toring and induction in rural settings is also unique-
15 ly challenging, in part because beginning educators
16 in these schools often lack qualified mentors that are
17 matched to their grade or subject, carry high teach-
18 ing loads, and experience a heightened sense of pro-
19 fessional and personal isolation.

20 (5) Induction programs for school leaders have
21 significant positive effects for teacher retention and
22 student outcomes. A panel study in Pennsylvania
23 found that principals’ participation in an induction
24 program was associated with improved teacher re-
25 tention, as well as student achievement and teacher

1 effectiveness in mathematics. The strongest relation-
 2 ships were concentrated among the most economi-
 3 cally and academically disadvantaged schools in the
 4 State and when principals participated during their
 5 first 2 years of principalship.

6 **SEC. 3. DEFINITIONS.**
