

## Wage and Hour Division, Labor

## § 541.104

### § 541.102 Management.

Generally, “management” includes, but is not limited to, activities such as interviewing, selecting, and training of employees; setting and adjusting their rates of pay and hours of work; directing the work of employees; maintaining production or sales records for use in supervision or control; appraising employees’ productivity and efficiency for the purpose of recommending promotions or other changes in status; handling employee complaints and grievances; disciplining employees; planning the work; determining the techniques to be used; apportioning the work among the employees; determining the type of materials, supplies, machinery, equipment or tools to be used or merchandise to be bought, stocked and sold; controlling the flow and distribution of materials or merchandise and supplies; providing for the safety and security of the employees or the property; planning and controlling the budget; and monitoring or implementing legal compliance measures.

### § 541.103 Department or subdivision.

(a) The phrase “a customarily recognized department or subdivision” is intended to distinguish between a mere collection of employees assigned from time to time to a specific job or series of jobs and a unit with permanent status and function. A customarily recognized department or subdivision must have a permanent status and a continuing function. For example, a large employer’s human resources department might have subdivisions for labor relations, pensions and other benefits, equal employment opportunity, and personnel management, each of which has a permanent status and function.

(b) When an enterprise has more than one establishment, the employee in charge of each establishment may be considered in charge of a recognized subdivision of the enterprise.

(c) A recognized department or subdivision need not be physically within the employer’s establishment and may move from place to place. The mere fact that the employee works in more than one location does not invalidate the exemption if other factors show that the employee is actually in charge

of a recognized unit with a continuing function in the organization.

(d) Continuity of the same subordinate personnel is not essential to the existence of a recognized unit with a continuing function. An otherwise exempt employee will not lose the exemption merely because the employee draws and supervises workers from a pool or supervises a team of workers drawn from other recognized units, if other factors are present that indicate that the employee is in charge of a recognized unit with a continuing function.

### § 541.104 Two or more other employees.

(a) To qualify as an exempt executive under § 541.100, the employee must customarily and regularly direct the work of two or more other employees. The phrase “two or more other employees” means two full-time employees or their equivalent. One full-time and two half-time employees, for example, are equivalent to two full-time employees. Four half-time employees are also equivalent.

(b) The supervision can be distributed among two, three or more employees, but each such employee must customarily and regularly direct the work of two or more other full-time employees or the equivalent. Thus, for example, a department with five full-time non-exempt workers may have up to two exempt supervisors if each such supervisor customarily and regularly directs the work of two of those workers.

(c) An employee who merely assists the manager of a particular department and supervises two or more employees only in the actual manager’s absence does not meet this requirement.

(d) Hours worked by an employee cannot be credited more than once for different executives. Thus, a shared responsibility for the supervision of the same two employees in the same department does not satisfy this requirement. However, a full-time employee who works four hours for one supervisor and four hours for a different supervisor, for example, can be credited as a half-time employee for both supervisors.
