

## Coast Guard, DHS

## § 117.351

(3) Marine radio communication shall be maintained with mariners near the bridge for the safety of navigation. Visual monitoring of the waterway shall be maintained with the use of cameras and the detection of vessels under the span shall be accomplished with detection sensors.

(4) The span is normally in the fully open position and will display green lights to indicate that the span is fully open.

(5) When a train approaches, the remote tender shall monitor for vessels approaching the bridge. The remote tender shall warn approaching vessels via marine radio, channel 9 VHF of a bridge lowering. The remote tender may also be contacted via telephone at (386) 649-8538.

(6) Provided the sensors do not detect a vessel under the span, the tender shall initiate the span lowering sequence, which includes the sounding of a horn and the displaying of red lights. The span will remain in the down position for a minimum of eight minutes or for the entire time the approach track circuit is occupied.

(7) After the train has cleared the bridge track circuit, the span shall open and the green lights will be displayed.
