#### § 100.2 Average cost of a health insurance policy.

For purposes of determining the amount of compensation under the VICP, section 2115(a)(3)(B) of the PHS Act, 42 U.S.C. 300aa-15(a)(3)(B), provides that certain individuals are entitled to receive an amount reflecting lost earnings, less certain deductions. One of the deductions is the average cost of a health insurance policy, as determined by the Secretary. The Secretary has determined that the average cost of a health insurance policy is \$363.12 for 2006. This figure is calculated periodically (generally on an annual basis) using the most recent Medical Expenditure Panel Survey-Insurance Component (MEPS-IC) data available as the baseline for the average monthly cost of a health insurance policy. This baseline is adjusted by the annual percentage increase/decrease obtained from the most recent annual Kaiser Family Foundation and Health

Research and Educational Trust (KFF/HRET) Employer Health Benefits survey or other authoritative source that may be more accurate or appropriate in the future. The revised amount will be effective upon its delivery by the Secretary to the United States Court of Federal Claims, and the amount will be published as a notice in the FEDERAL REGISTER periodically (generally on an annual basis).
