### § 13.106 Requirement to hold an MMC.

An applicant for any endorsement in this part must also meet the requirements for the MMC on which the endorsement would appear. These requirements are set out in part 10 of this subchapter.

[USCG-2006-24371, 74 FR 11259, Mar. 16, 2009, as amended by USCG-2004-17914, 78 FR 77988, Dec. 24, 2013]

### § 13.107 Tankerman endorsement: General.

(a) If an applicant meets the requirements of subpart B of this part, the Coast Guard may endorse his or her MMC as tankerman-PIC with the appropriate cargo classification or classifications. A person holding this endorsement and meeting the other requirements of 33 CFR 155.710(a) may act as a PIC of a transfer of fuel oil, of a transfer of liquid cargo in bulk, or of cargo-tank cleaning on any tank vessel. That person may also act as a tankerman-engineer, provided that he or she also holds an engineer license or engineer endorsement.

(b) If an applicant meets the requirements of subpart C of this part, the Coast Guard may endorse his or her MMC as tankerman-PIC (barge) with the appropriate cargo classification or classifications. A person holding this endorsement and meeting the other requirements of 33 CFR 155.710(b) may act as a PIC of a transfer of liquid cargo in bulk only on a tank barge.

(c) If an applicant meets the requirements of subpart D of this part, the Coast Guard may endorse his or her MMC as tankerman-assistant with the appropriate cargo classification or classifications. No person holding this endorsement may act as a PIC of any transfer of fuel oil, of any transfer of liquid cargo in bulk, or of cargo-tank cleaning unless he or she also holds an

endorsement authorizing service as PIC. He or she may, however, without being directly supervised by the PIC, perform duties relative to cargo and cargo-handling equipment assigned by the PIC of transfers of fuel oil, of transfers of liquid cargo in bulk, or of cargo-tank cleaning. When performing these duties, he or she shall maintain continuous two-way voice communications with the PIC.

(d) If an applicant meets the requirements of subpart E of this part, the Coast Guard may endorse his or her MMC as tankerman-engineer. No person holding this endorsement may act as a PIC or tankerman-assistant of any transfer of liquid cargo in bulk, or of cargo-tank cleaning unless he or she also holds an endorsement authorizing such service. A person holding this endorsement and acting in this capacity has the primary responsibility, on his or her self-propelled tank vessel carrying dangerous liquid (DL) or liquefied gas (LG), for maintaining both the cargo systems and equipment for transfer of liquid cargo in bulk. No person licensed or credentialed under part 11 of this chapter may serve as a chief engineer, first assistant engineer, or cargo engineer aboard an inspected self-propelled tank vessel when liquid cargo in bulk or cargo residue is carried unless he or she holds an endorsement as tankerman-engineer or equivalent.

(e) If an applicant meets the requirements of § 13.111 of this subpart, the Coast Guard may place on his or her MMC an endorsement as a tankerman-PIC restricted according to the definitions of “restricted tankerman endorsement” in § 10.107 of this subchapter.

(f) This section does not apply to any person solely by reason of his or her involvement in bunkering or fueling.

### § 13.111

### 46 CFR Ch. I (10–1–23 Edition)

the holder's service under it to transfers involving one or both of the following cargo classifications:

- (1) Dangerous liquid (DL).
- (2) Liquefied gas (LG).

(b) No tankerman endorsement is necessary to transfer the liquid cargoes in bulk listed in table 2 of part 153 of this chapter when those cargoes are carried on barges not certified for ocean service.

#### § 13.111 Restricted tankerman endorsement.

(a) An applicant may apply for a tankerman endorsement restricted to specific cargoes, specific vessels, or groups of vessels (such as uninspected towing vessels and Oil Spill Response Vessels), specific facilities, and/or specific employers. The Coast Guard will evaluate each application and may modify the applicable requirements for the endorsement, allowing for special circumstances and for whichever restrictions the endorsement will state.

(2) Two of the transfers described in §13.303(b) of this part must have occurred within the past 5 years.

(d) To qualify for a restricted tankerman-PIC (barge) endorsement restricted to a tank-cleaning and gas-freeing facility, an applicant must—

- (1) Be at least 18 years old;

(2) Apply on a form provided by the Coast Guard;

(3) Present evidence of passing a physical and medical examination according to §13.125 of this part;

(4) Present evidence in the form of a letter, which must be dated within the 5 years prior to the application for the credential, on company letterhead from the operator of the facility stating that OSHA considers the applicant a “competent person (as designated under 29 CFR 1915.7)” for the facility and that the applicant has the knowledge necessary to supervise tank-cleaning and gas-freeing; and

(5) Be capable of speaking and understanding, in English, all instructions needed to commence, conduct, and complete a transfer of cargo, and of reading and understanding the English found in the Declaration of Inspection, vessel response plans, and Cargo Information Cards.

(e) The restricted tankerman-PIC (barge) endorsement restricted to a tank-cleaning and gas-freeing facility is valid only while the applicant is employed by the operator of the facility that provided the letter of service required by paragraph (d)(4) of this section, and this and any other appropriate restrictions will appear in the endorsement.

(f) A restricted tankerman-PIC endorsement limited to operation on vessels inside the boundary line is not valid where STCW certification is required.

[USCG–2004–17914, 78 FR 77988, Dec. 24, 2013]

An applicant for an original tankerman endorsement in subpart B, C, D, or E of this part must have obtained at least 25 percent of the qualifying service and, if the endorsement requires transfers, at least two of the qualifying transfers, within 5 years of the date of application.

[CGD 79–116, 60 FR 17142, Apr. 4, 1995, as amended by USCG–2004–17914, 78 FR 77994, Dec. 24, 2013]

**§ 13.127 Service: General.**

(a) A service letter must be signed by the owner, operator, master, or chief engineer of the vessel and must specify the following:

(1) The name of the vessel, official number for the vessel, and date of service for each vessel.

(2) For endorsements as tankerman-PIC, tankerman-PIC (barge), and tankerman-assistant, the classification of cargo (DL, LG, or, for a restricted endorsement, a specific product) handled while the applicant accumulated the service.

(3) The dates, the numbers and kinds of transfers the applicants have participated in, the ports or terminals, if applicable, and the number of transfers that involved commencement or completion of loading or discharge.

(4) For endorsements as tankerman-PIC or tankerman-PIC (barge), that the applicant has demonstrated to the satisfaction of the signer that he or she is fully capable of supervising transfers of liquid cargo, including—

- (i) Pre-transfer inspection;
- (ii) Pre-transfer conference and execution of the Declaration of Inspection;
- (iii) Connection of cargo hoses or loading-arms;
- (iv) Line-up of the cargo system for loading and discharge;
- (v) Start of liquid flow during loading;
- (vi) Start of cargo pump and increase of pressure to normal discharge pressure;
- (vii) Calculation of loading-rates;
- (viii) Monitoring;
- (ix) Topping-off of cargo tanks during loading;
- (x) Stripping of cargo tanks;
- (xi) Ballasting and deballasting, if appropriate;
- (xii) Disconnection of the cargo hoses or loading-arms; and
- (xiii) Securing of cargo systems.

(5) For endorsements as tankerman-engineer, that the applicant has demonstrated to the satisfaction of the signer that he or she is fully capable of supervising transfers of fuel oil, including—

- (i) Pre-transfer inspection;
- (ii) Pre-transfer conference and execution of the Declaration of Inspection;
- (iii) Connection of hoses or loading-arms;
- (iv) Line-up of the piping system for loading and transfer of fuel oil;
- (v) Start of liquid flow during loading;
- (vi) Calculation of loading rates;
- (vii) Monitoring;
- (viii) Topping-off of tanks during loading;
- (ix) Disconnection of the hoses or loading arms; and
- (x) Securing of fuel oil systems.

(b) In determining the numbers and kinds of transfers that the applicant has participated in under paragraph (a)(3) of this section, the following rules apply:

(1) A transfer must involve the loading or discharge from at least one of the vessel's cargo tanks to or from a shore facility or another vessel. A shift

**§ 13.127**

**46 CFR Ch. I (10–1–23 Edition)**

of cargo from one tank to another tank is not a transfer for this purpose.

(2) Regardless of how long the transfer lasts beyond 4 hours, it counts as only one transfer.

(3) A transfer must include both a commencement and a completion.

(4) Regardless of how many tanks or products are being loaded or discharged at the same time, a person may receive credit for only one transfer, one loading, and one discharge conducted during each watch.

(5) Credit for a transfer during a watch of less than 4 hours accrues only if the watch includes either the connection and the commencement of transfer or the completion of transfer and the disconnection.

(6) Credit for a commencement of loading accrues only if the applicant participates in the pre-transfer inspection, the pre-transfer conference including execution of the Declaration of Inspection, the connection of hoses or loading-arms, the line-up of the system for the loading, the start of liquid flow, and the calculation of loading-rates, where applicable.

(7) Credit for a commencement of discharge accrues only if the applicant participates in the pre-transfer inspection, the pre-transfer conference including execution of the Declaration of Inspection, the connection of hoses or loading-arms, the line-up of the cargo

system for the discharge, the start of the pump or pumps and increase of pressure to normal pressure for discharge, and the monitoring of discharge rates.

(8) Credit for a completion of transfer, whether loading or discharge, accrues only if the applicant participates in the topping-off at the loading port, or in the stripping of cargo tanks and the commencement of ballasting, if required by the vessel's transfer procedures, at the discharge port.

(9) Personnel desiring credit for transfers during off-duty hours may satisfy requirements of competence through incremental training periods that include segments of transfers. The cumulative number of transfers must equal the minimum specified in §§13.203(b) or 13.303(b) of this subchapter.

(c) Service on Articulated Tug Barges (ATBs). Service on ATBs with an aggregate tonnage of 1,600 GRT or more will be creditable on a case-by-case basis and with prior authorization by the Coast Guard, provided the ATB equipment is comparable to tank vessel equipment. The Coast Guard may issue blanket authorizations for classes of ATBs.
