project principally involving the installation of Intelligent Transportation Systems (ITS), eligible project costs shall be reasonably anticipated to equal or exceed $30 million);

(4) Project financing shall be repayable, in whole or in part, from tolls, user fees or other dedicated revenue sources; and

(5) In the case of a project that is undertaken by an entity that is not a State or local government or an agency or instrumentality of a State or local government, the project that the entity is undertaking shall be included in the State transportation plan and an approved State Transportation Improvement Program as provided in paragraph (a)(1) of this section.

(b) With respect to paragraph (a)(3) of this section, for a project located in more than one State, the minimum cost threshold size shall be the lesser of $100 million or 50 percent of the amount of Federal-aid highway funds apportioned for the most recently completed fiscal year to the participating State that receives the least amount of such funds.

(c) With respect to paragraph (a)(4) of this section, the Secretary may accept general obligation pledges or general corporate promissory pledges and will determine the acceptability of other pledges and forms of collateral as dedicated revenue sources on a case-by-case basis. The Secretary shall not accept a pledge of Federal funds, regardless of source, as security for the TIFIA credit instrument.

§ 80.15 Selection criteria.

(a) The Secretary shall assign weights as indicated to the following eight selection criteria in evaluating and selecting among eligible projects to receive credit assistance:

(1) The extent to which the project is nationally or regionally significant, in terms of generating economic benefits, supporting international commerce, or otherwise enhancing the national transportation system (20 percent);

(2) The creditworthiness of the project, including a determination by the Secretary that any financing for the project has appropriate security features, such as a rate covenant, to ensure repayment (12.5 percent);

(3) The extent to which such assistance would foster innovative public-private partnerships and attract private debt or equity investment (20 percent);

(4) The likelihood that such assistance would enable the project to proceed at an earlier date than the project would otherwise be able to proceed (12.5 percent);

(5) The extent to which the project uses new technologies, including Intelligent Transportation Systems (ITS), that enhance the efficiency of the project (5 percent);

(6) The amount of budget authority required to fund the Federal credit instrument made available (5 percent);

(7) The extent to which the project helps maintain or protect the environment (20 percent); and

(8) The extent to which such assistance would reduce the contribution of Federal grant assistance to the project (5 percent).

(b) In addition, 23 U.S.C. 182(b)(2)(B) conditions a project's approval for credit assistance on receipt of a preliminary rating opinion letter indicating that the project's senior debt obligations have the potential to attain an investment-grade rating.

(c) The Secretary may also give preference to applications for loan guarantees rather than other forms of Federal credit assistance. This preference is consistent with Federal policy that, when Federal credit assistance is necessary to meet a Federal objective, loan guarantees should be favored over direct loans, unless attaining the Federal objective requires a subsidy, as defined by the Federal Credit Reform Act of 1990 (2 U.S.C. 661 *et seq.*), deeper than can be provided by a loan guarantee.

[64 FR 29750, June 2, 1999, as amended at 65 FR 44940, July 19, 2000]

§ 80.17 Fees.

(a) The DOT will require a non-refundable application fee for each project applying for credit assistance under the TIFIA. The DOT may also require an additional credit processing fee for projects selected to receive TIFIA assistance. Any required application initiation or credit processing fee must be paid by the project sponsor
