

§ 600.1600

50 CFR Ch. VI (10–1–22 Edition)

(1) All eligibility and process requirements specified by NMFS are met as described in NMFS Policy Directive 06–102; and

(2) The replacement type-approved EMTU/EMTU-C is installed on the vessel, and reporting to NMFS Office of Law Enforcement; and

(3) The type-approval for the previously installed EMTU/EMTU-C has been revoked by NMFS; or

(4) NMFS requires the vessel owner to purchase a new EMTU/EMTU-C prior to the end of an existing unit's service life.

(b) The cap for individual reimbursement payments is subject to change. If this occurs, NMFS Office of Law Enforcement will publish a notice in the FEDERAL REGISTER announcing the change.

Subpart R—Standardized Bycatch Reporting Methodology

SOURCE: 82 FR 6337, Jan. 19, 2017, unless otherwise noted.

§ 600.1600 Purpose and scope.

Section 303(a)(11) of the Magnuson-Stevens Act requires that any fishery management plan (FMP) with respect to any fishery shall establish a standardized reporting methodology to assess the amount and type of bycatch occurring in the fishery. 16 U.S.C. 1853(a)(11). The purpose of a standardized reporting methodology is to collect, record, and report bycatch data in a fishery that, in conjunction with other relevant sources of information, are used to assess the amount and type of bycatch occurring in the fishery and inform the development of conservation and management measures that, to the extent practicable, minimize bycatch and bycatch mortality. This subpart sets forth requirements for and guidance on establishing and reviewing a standardized reporting methodology.

§ 600.1605 Definitions and word usage.

(a) *Definitions.* In addition to the definitions in the Magnuson-Stevens Act and § 600.10, *standardized reporting methodology* means an established, consistent procedure or procedures used to collect, record, and report bycatch data in a fishery, which may vary from one

fishery to another. Bycatch assessment is not part of the standardized reporting methodology, but must be considered as described in § 600.1610(a)(2)(iv).

(b) *Word usage.* The terms “bycatch” and “fishery” are used in the same manner as in 16 U.S.C. 1802. The terms “must”, “should”, “may”, “will”, “could”, and “can” are used in the same manner as in § 600.305(c). The term “Council” is used in the same manner as in § 600.305(d)(10), and includes the regional fishery management Councils and the Secretary of Commerce, as appropriate (16 U.S.C. 1854(c) and (g)).

§ 600.1610 Establishing and reviewing standardized bycatch reporting methodologies in fishery management plans.

(a) *Establishing a standardized reporting methodology*—(1) *Fishery management plan contents.* An FMP must identify the required procedure or procedures that constitute the standardized reporting methodology for the fishery. The required procedures may include, but are not limited to, one or more of the following: Observer programs, electronic monitoring and reporting technologies, and self-reported mechanisms (*e.g.*, recreational sampling, industry-reported catch and discard data). The FMP, or a fishery research plan authorized under 16 U.S.C. 1862, must explain how the standardized reporting methodology meets the purpose described in § 600.1600, based on an analysis of the requirements under § 600.1610(a)(2). The FMP, or fishery research plan authorized under 16 U.S.C. 1862, may reference analyses and information in other FMPs, FMP amendments, Stock Assessment and Fishery Evaluation (SAFE) reports, or other documents. Councils should work together and collaborate on standardized reporting methodologies for fisheries that operate across multiple jurisdictions, as appropriate. In addition to proposing regulations necessary to implement the standardized reporting methodology, a Council should also provide in its FMP, or a fishery research plan authorized under 16 U.S.C. 1862, guidance to NMFS on how to adjust implementation of a standardized reporting methodology consistent with
