

Fishery Conservation and Management

§ 600.508

and their disposition as described in paragraph (g)(3)(iii) of this section.

(5) “SECTION THREE—PRODUCTION” must contain, on a daily basis, for each authorized species or species group received and product produced, that information required in paragraph (e)(5) of this section.

(h) *Daily log maintenance.* The logs required by paragraphs (e) through (g) of this section must be maintained separately for each fishery (see table 2 to § 600.502).

(1) The effort section (all of “SECTION ONE”) of the daily logs must be updated within 2 hours of the hauling or receipt time. The catch or receipt by trawl or set (“SECTION TWO”) must be entered within 12 hours of the hauling or receipt time. The daily and cumulative total catch or receipts (“SECTION TWO”) and the production portion (“SECTION THREE”) of the log must be updated within 12 hours of the end of the day on which the catch was taken. The date of catch is the day and time (GMT) the gear is hauled.

(2) Entries for total daily and cumulative catch or receipt weights (disposition “C” or “M”) must be based on the most accurate method available to the vessel, either scale round weights or factory weights converted to round weights. Entries for daily and cumulative weights of discarded or returned fish (disposition “D” or “R”) must be based on the most accurate method available to the vessel, either actual count, scale round weight, or estimated deck weights. Entries for product weights must be based on the number of production units (pans, boxes, blocks, trays, cans, or bags) and the average weight of the production unit, with reasonable allowances for water added. Allowances for water added cannot exceed 5 percent of the unit weight. Product weights cannot be based on the commercial or arbitrary wholesale weight of the product, but must be based on the total actual weight of the product as determined by representative samples.

(3) The owner or operator must make all entries in indelible ink, with corrections to be accomplished by lining out and rewriting, rather than erasure.

(i) Alternative log formats. As an alternative to the use of the specific for-

mats provided, a Nation may submit a proposed log format for FFV’s of that Nation for a general type of fishery operation in a fishery (i.e., joint venture operations) to the appropriate Regional Administrator and the USCG commander (see tables 1 and 2 to § 600.502). With the agreement of the USCG commander, the Regional Administrator may authorize the use of that log format for vessels of the requesting Nation.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.508 Fishing operations.

(a) *Catching.* Each FFV authorized for activity code 1 may catch fish. An FFV may retain its catch of any species or species group for which there is an unfilled national allocation. All fish caught will be counted against the national allocation, even if the fish are discarded, unless exempted by the regulations of the fishery in which the FFV is engaged. Catching operations may be conducted as specified by the regulations of the fishery in which the FFV is engaged and as modified by the FFV’s permit.

(b) *Scouting.* Each FFV authorized for Activity Codes 1 through 6 may scout for fish. Scouting may be conducted only in the fisheries area authorized by the scouting vessel’s permit and under such other circumstances as may be designated in this subpart or the permit.

(c) *Processing.* Each FFV with Activity Code 1 or 2 may process fish. Processing may only be conducted whenever and wherever catching operations for FFV’s of that Nation are permitted, whenever and wherever joint venture operations are authorized by an FFV’s permit under Activity Code 4, and under such other circumstances as may be designated in this subpart or the permit.

(d) *Support.* Each FFV with Activity Codes 1, 2, 3, 5, or 8 may support other permitted FFV’s. Each FFV with Activity Codes 4 or 6 may support U.S. vessels. Support operations may be conducted only in the fisheries areas authorized by the supporting vessel’s permit, and under such other circumstances as may be designated in this subpart or the permit.

(e) *Joint ventures.* Each FFV with Activity Code 4 in addition to Activity Codes 1 or 2 may also conduct operations with U.S. fishing vessels. These joint venture operations with U.S. fishing vessels may be conducted throughout the EEZ, and under such other circumstances as may be designated in these regulations or the permit. FFV's with activity code 4 may continue operations assisting U.S. fishing vessels, despite closures under § 600.511(a).

(f) *Internal waters.* For FFV's authorized under section 306(c) of the Magnuson-Stevens Act:

(1) Each FFV may engage in fish processing and support of U.S. fishing vessels within the internal waters of that state in compliance with terms and conditions set by the authorizing Governor.

(2) The owner or operator of each FFV must submit weekly reports on the amount of fish received from vessels of the United States and the location(s) where such fish were harvested.

(i) Reports must include:

(A) Vessel identification information for the FFV.

(B) Date of each receipt of fish.

(C) Amount of fish received, by species.

(D) Location(s) from which the fish received were harvested and the name and official number of the vessel of the United States that harvested the fish.

(ii) Owners or operators of FFV's processing fish in internal waters under the provisions of this paragraph (f) must request, from the Regional Administrator, the requirements regarding timing and submission of the reports, at least 15 days prior to the first receipt of fish from a vessel of the United States. The Regional Administrator shall stipulate the timing and submission requirements in writing.

(g) *Transshipping.* Each FFV with Activity Code 1, 2, 3, 4, 5, 6, 7, 8, or 10 may transship in accordance with this subpart and the vessel's permit.

[61 FR 32540, June 24, 1996, as amended at 62 FR 27183, May 19, 1997; 62 FR 34397, June 26, 1997; 64 FR 39020, July 21, 1999]

§ 600.509 Prohibited species.

(a) The owner or operator of each FFV must minimize its catch or receipt of prohibited species.

(b) After allowing for sampling by an observer (if any), the owner or operator of each FFV must sort its catch of fish received as soon as possible and return all prohibited species and species parts to the sea immediately with a minimum of injury, regardless of condition, unless a different procedure is specified by the regulations for the fishery in which the FFV is engaged. All prohibited species must be recorded in the daily fishing log and other fishing logs as specified by the regulations for the fishery in which the FFV is engaged.

(c) All species of fish that an FFV has not been specifically allocated or authorized under this subpart to retain, including fish caught or received in excess of any allocation or authorization, are prohibited species.

(d) It is a rebuttable presumption that any prohibited species or species part found on board an FFV was caught and retained in violation of this section.

§ 600.510 Gear avoidance and disposal.

(a) *Vessel and gear avoidance.* (1) FFV's arriving on fishing grounds where fishing vessels are already fishing or have set their gear for that purpose must ascertain the position and extent of gear already placed in the sea and must not place themselves or their fishing gear so as to interfere with or obstruct fishing operations already in progress. Vessels using mobile gear must avoid fixed fishing gear.

(2) The operator of each FFV must maintain on its bridge a current plot of broadcast fixed-gear locations for the area in which it is fishing, as required by the regulations for the fishery in which the FFV is engaged.

(b) *Gear conflicts.* The operator of each FFV that is involved in a conflict or that retrieves the gear of another vessel must immediately notify the appropriate USCG commander identified in tables 1 and 2 to § 600.502 and request disposal instructions. Each report must include:

(1) The name of the reporting vessel.

(2) A description of the incident and articles retrieved, including the amount, type of gear, condition, and identification markings.

(3) The location of the incident.
