

§ 600.513

MMPA, the ESA, or any other applicable law. The Regional Administrator or Director will include text in the Letter of Acknowledgment informing the applicant that such permits may be required and should be obtained from the agency prior to embarking on the activity. If the Regional Administrator or Director, after review of a research plan, determines that it does not constitute scientific research activity but rather fishing, the Regional Administrator or Director will inform the applicant as soon as practicable and in writing. In making this determination, the Regional Administrator, Director, or designee shall consider: the merits of the individual proposal and the institution(s) involved; whether the proposed activity meets the definition of scientific research activity; and whether the vessel meets all the requirements for a scientific research vessel. Foreign vessels that qualify as scientific research vessels and which are engaged in a scientific research activity may only engage in compensation fishing during the scientific research cruise and in accordance with the applicable scientific research plan. The Regional Administrator or Director may also make recommendations to revise the research plan to ensure the activity will be considered to be a scientific research activity. The Regional Administrator or Director may designate a Science and Research Director, or the Assistant Regional Administrator for Sustainable Fisheries, to receive scientific research plans and issue Letters of Acknowledgment. In order to facilitate identification of the activity as scientific research, persons conducting scientific research activities are advised to carry a copy of the scientific research plan and the Letter of Acknowledgment on board the scientific research vessel and to make it available for inspection upon the request of any authorized officer. It is recommended that for any scientific research activity, any fish, or parts thereof, retained pursuant to such activity be accompanied, during any ex-vessel activities, by a copy of the Letter of Acknowledgment. Activities conducted in accordance with a scientific research plan acknowledged by such a Letter of Acknowledgment are pre-

50 CFR Ch. VI (10–1–23 Edition)

sumed to be scientific research activities. An authorized officer may overcome this presumption by showing that an activity does not fit the definition of scientific research activity or is outside the scope of the scientific research plan.

(b) *Reports.* Persons conducting scientific research are requested to submit a copy of any cruise report or other publication created as a result of the cruise, including the amount, composition, and disposition of their catch, to the appropriate Science and Research Director.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 74 FR 42793, Aug. 25, 2009]

§ 600.513 Recreational fishing.

(a) Foreign vessels conducting recreational fishing must comply only with this section, and §§ 600.10, 600.504(a)(1), and 600.505 (as applicable). Such vessels may conduct recreational fishing within the EEZ and within the boundaries of a state. Any fish caught may not be sold, bartered, or traded.

(b) The owners or operator and any other person aboard any foreign vessel conducting recreational fishing must comply with any Federal laws or regulations applicable to the domestic fishery while in the EEZ, and any state laws or regulations applicable while in state waters.

§ 600.514 Relation to other laws.

(a) Persons affected by these regulations should be aware that other Federal and state statutes may apply to their activities.

(b) Fishing vessel operators must exercise due care in the conduct of fishing activities near submarine cables. Damage to submarine cables resulting from intentional acts or from the failure to exercise due care in the conduct of fishing operations subjects the fishing vessel operator to enforcement action under the International Convention for the Protection of Submarine Cables, and to the criminal penalties prescribed by the Submarine Cable Act (47 U.S.C. 21) and other laws that implement that Convention. Fishing vessel operators also should be aware that the Submarine Cable Act prohibits fishing operations at a distance of less

Fishery Conservation and Management

§ 600.518

than 1 nautical mile (1.85 km) from a vessel engaged in laying or repairing a submarine cable; or at a distance of less than 0.25 nautical mile (0.46 km) from a buoy or buoys intended to mark the position of a cable when being laid, or when out of order, or broken.

§ 600.515 Interpretation of 16 U.S.C. 1857(4).

Section 307(4) of the Magnuson-Stevens Act prohibits any fishing vessel other than a vessel of the United States (foreign fishing vessel) from operating in the EEZ if all of the fishing gear on board the vessel is not stowed in compliance with that section “unless such vessel is authorized to engage in fishing in the area in which the vessel is operating.” If such a vessel has a permit authorization that is limited to fishing activities other than catching, taking or harvesting (such as support, scouting or processing activities), it must have all of its fishing gear stowed at all times while it is in the EEZ. If such a vessel has a permit authorization to engage in catching, taking or harvesting activities, but such authorization is limited to a specific area within the EEZ, and/or to a specific period of time, the vessel must have all of its fishing gear stowed while it is in the EEZ, except when it is in the specific area authorized, and/or during the specific period of time authorized.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.516 Total allowable level of foreign fishing (TALFF).

(a) The TALFF, if any, with respect to any fishery subject to the exclusive fishery management authority of the United States, is that portion of the OY of such fishery, which cannot or will not be harvested by vessels of the United States. Allocations of TALFF are discretionary, except that the total allowable level shall be zero for fisheries determined by the Secretary to have adequate or excess domestic harvest capacity.

(b) Each specification of OY and each assessment of the anticipated U.S. harvest will be reviewed during each fishing season. Adjustments to TALFF's will be made based on updated information relating to status of stocks, esti-

mated and actual performance of domestic and foreign fleets, and other relevant factors.

(c) Specifications of OY and the initial estimates of U.S. harvests and TALFF's at the beginning of the relevant fishing year will be published in the FEDERAL REGISTER. Adjustments to those numbers will be published in the FEDERAL REGISTER upon occasion or as directed by regulations implementing FMPs. For current apportionments, contact the appropriate Regional Administrator or the Director.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 73 FR 67811, Nov. 17, 2008]

§ 600.517 Allocations.

The Secretary of State, in cooperation with the Secretary, determines the allocation among foreign nations of fish species and species groups. The Secretary of State officially notifies each foreign nation of its allocation. The burden of ascertaining and accurately transmitting current allocations and status of harvest of an applicable allocation to fishing vessels is upon the foreign nation and the owner or operator of the FFV.

§ 600.518 Fee schedule for foreign fishing.

(a) *Permit application fees.* Each vessel permit application submitted under § 600.501 must be accompanied by a fee. The amount of the fee will be determined in accordance with the procedures for determining administrative costs of each special product or service contained in the NOAA Finance Handbook, which is available upon request from the Office of International Affairs (see address at § 600.501(d)(1)). The fee is specified with the application form. At the time the application is submitted, a check for the fees, drawn on a U.S. bank, payable to the order of “Department of Commerce, NOAA,” must be sent to the Assistant Administrator. The permit fee payment must be accompanied by a list of the vessels for which the payment is made. In the case of applications for permits authorizing activity code 10, the permit application fee will be waived if the applicant provides satisfactory documentary proof to the Assistant Administrator that
