

commercial and recreational sectors; FMP Monitoring Committee composition and process; description and identification of essential fish habitat (and fishing gear management measures that impact EFH); description and identification of habitat areas of particular concern; regional gear restrictions; regional season restrictions (including option to split seasons); restrictions on vessel size (LOA and GRT) or shaft horsepower; operator permits; changes to the SBRM, including the CV-based performance standard, the means by which discard data are collected/obtained, fishery stratification, the process for prioritizing observer sea-day allocations, reports, and/or industry-funded observers or observer set aside programs; any other commercial or recreational management measures; any other management measures currently included in the FMP; and set aside quota for scientific research. Issues that require significant departures from previously contemplated measures or that are otherwise introducing new concepts may require an amendment of the FMP instead of a framework adjustment.

(2) *MAFMC recommendation.* After developing management actions and receiving public testimony, the MAFMC shall make a recommendation to the Regional Administrator. The MAFMC's recommendation must include supporting rationale, if management measures are recommended, an analysis of impacts, and a recommendation to the Regional Administrator on whether to issue the management measures as a final rule. If the MAFMC recommends that the management measures should be issued as a final rule, it must consider at least the following factors and provide support and analysis for each factor considered:

(i) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether the regulations would have to be in place for an entire harvest/fishing season;

(ii) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of recommended management measures;

(iii) Whether there is an immediate need to protect the resource; and

(iv) Whether there will be a continuing evaluation of management measures adopted following their implementation as a final rule.

(3) *NMFS action.* If the MAFMC's recommendation includes adjustments or additions to management measures and, if after reviewing the MAFMC's recommendation and supporting information:

(i) NMFS concurs with the MAFMC's recommended management measures and determines that the recommended management measures should be issued as a final rule based on the factors in paragraph (a)(2) of this section, the measures will be issued as a final rule in the FEDERAL REGISTER.

(ii) If NMFS concurs with the MAFMC's recommended management measures and determines that the recommended management measures should be published first as a proposed rule, the measures will be published as a proposed rule in the FEDERAL REGISTER. After additional public comment, if NMFS concurs with the MAFMC recommendation, the measures will be published as a final rule in the FEDERAL REGISTER.

(iii) If NMFS does not concur, the MAFMC will be notified in writing of the reasons for the non-concurrence.

(4) *Emergency actions.* Nothing in this section is meant to derogate from the authority of the Secretary to take emergency action under section 305(e) of the Magnuson-Stevens Act.

(b) [Reserved]

[76 FR 60630, Sept. 29, 2011, as amended at 76 FR 1849, Dec. 29, 2011; 80 FR 37196, June 30, 2015; 87 FR 68929, Nov. 17, 2022]

#### **§ 648.111 Block Island Sound Transit Area.**

(a) Vessels not issued a summer flounder Federal moratorium or party/charter permit, and recreational fishing participants fishing exclusively in state waters may transit with summer flounder harvested from state waters on board through Federal waters of the EEZ within Block Island Sound, north of a line connecting Montauk Light, Montauk Point, NY, and Block Island Southeast Light, Block Island, RI; and west of a line connecting Point Judith

## § 648.120

Light, Point Judith, RI, and Block Island Southeast Light, Block Island, RI. Within this area, possession of summer flounder is permitted regardless of the minimum or maximum size (as applicable), possession limit, and seasons outlined in §§ 648.104, 648.105, and 648.106, provided no fishing takes place from the vessel while in Federal waters of the EEZ, the vessel complies with state regulations, and is in continuous transit. During such transit through this area, commercial gear must be stowed in accordance with the definition of “not available for immediate use” found at § 648.2, and party/charter vessels and recreational participants must have all bait and hooks removed from fishing rods, and any summer flounder on board must be stored in a cooler or container.

(b) The requirements of this transit zone are not necessary or applicable for recreational fishery participants during years when conservation equivalency has been adopted under § 648.107 conservation equivalency measures and recreational Federal measures are waived.

### Subpart H—Management Measures for the Scup Fishery

SOURCE: 61 FR 43426, Aug. 23, 1996, unless otherwise noted.

## § 648.120 Scup Annual Catch Limit (ACL).

(a) *Annual catch limits.* The Monitoring Committee shall recommend to the MAFMC separate ACLs for the commercial and recreational scup fisheries, the sum total of which shall be equal to the ABC recommended by the SSC.

(1) *Sector allocations.* The commercial and recreational fishing sector ACLs will be based on the allocations defined in the Summer Flounder, Scup, and Black Sea Bass FMP.

(2) *Periodicity.* The scup commercial and recreational sector ACLs may be established on an annual basis for up to 3 years at a time, dependent on whether the SSC provides single or multiple year ABC recommendations.

## 50 CFR Ch. VI (10–1–23 Edition)

(b) *Performance review.* The Monitoring Committee shall conduct a detailed review of fishery performance relative to the sector ACLs at least every 5 years.

(1) If one or both of the sector-specific ACLs is exceeded with a frequency greater than 25 percent (*i.e.*, more than once in 4 years or any 2 consecutive years), the Monitoring Committee will review fishery performance information and consider whether changes to measures are needed.

(2) The MAFMC may specify more frequent or more specific ACL performance review criteria as part of a stock rebuilding plan following a determination that the scup stock has become overfished.

(3) Performance reviews shall not substitute for annual reviews that occur to ascertain if prior year ACLs have been exceeded but may be conducted in conjunction with such reviews.

[76 FR 60631, Sept. 29, 2011, as amended at 87 FR 68930, Nov. 17, 2022; 88 FR 14508, Mar. 9, 2023]

## § 648.121 Scup Annual Catch Target (ACT).

(a) *Annual catch targets.* The Monitoring Committee shall identify and review the relevant sources of management uncertainty to recommend ACTs for the commercial and recreational fishing sectors as part of the scup specification process. The Monitoring Committee recommendations shall identify the specific sources of management uncertainty that were considered, technical approaches to mitigating these sources of uncertainty, and any additional relevant information considered in the ACT recommendation process.

(1) *Sectors.* Commercial and recreational specific ACTs shall be less than or equal to the sector-specific ACLs. The Monitoring Committee shall recommend any reduction in catch necessary to address sector-specific management uncertainty, consistent with this paragraph (a).

(2) *Periodicity.* ACTs may be established on an annual basis for up to 3 years at a time, dependent on whether the SSC provides single or multiple year ABC recommendations.
