

§ 275.8 Review coverage.

(a) During each review period, State agencies shall review the national target areas of program operation specified by FNS. FNS will notify State agencies of the minimum program areas to be reviewed at least 90 days before the beginning of each annual review period, which is the Federal fiscal year. FNS may add additional areas during the review period if deemed necessary. The FNS headquarters office will add national target areas during the review period only for deficiencies of national scope. State agencies have 60 days in which to establish a plan schedule for such reviews.

(b) State agencies shall be responsible for reviewing each national target area or other program requirement based upon the provisions of the regulations governing SNAP and the FNS-approved Plan of Operation. If FNS approves a State agency's request for a waiver from a program requirement, any different policy approved by FNS would also be reviewed. When, in the course of a review, a project area is found to be out of compliance with a given program requirement, the State agency shall identify the specifics of the problem including: the extent of the deficiency, the cause of the deficiency, and, as applicable, the specific procedural requirements the project area is misapplying.

§ 275.9 Review process.

(a) *Review procedures.* State agencies shall review the program requirements specified for review in § 275.8 of this part using procedures that are adequate to identify problems and the causes of those problems. As each project area's operational structure will differ, State agencies shall review each program requirement applicable to the project area in a manner which will best measure the project area's compliance with each program requirement.

(b) *ME review plan.* (1) State agencies shall develop a review plan prior to each ME review. This review plan shall specify whether each project area is

large, medium, or small and shall contain:

(i) Identification of the project area to be reviewed, program areas to be reviewed, the dates the review will be conducted, and the period of time that the review will cover;

(ii) Information secured from the project area regarding its caseload and organization;

(iii) Identification of the sub-units selected for review and the techniques used to select them;

(iv) At State agency option it may also indicate whether the State agency is using the ME review process to perform non-discrimination reviews; and

(v) A description of the review method(s) the State agency plans to use for each program area being reviewed.

(2) ME review plans shall be maintained in an orderly fashion and be made available to FNS upon request.

(c) *Review methods.* (1) State agencies shall determine the method of reviewing the program requirements associated with each program area. For some areas of program operation it may be necessary to use more than one method of review to determine if the project area is in compliance with program requirements. The procedures used shall be adequate to identify any problems and the causes of those problems.

(2) State agencies shall ensure that the method used to review a program requirement does not bias the review findings. Bias can be introduced through leading questions, incomplete reviews, incorrect sampling techniques, etc.

(d) *Review worksheet.* (1) State agencies shall use a review worksheet to record all review findings. For each sub-unit reviewed the State agency shall, on the worksheet, identify:

(i) The sub-unit being reviewed;

(ii) Each program requirement reviewed in the sub-unit;

(iii) The method used to review each program requirement;

(iv) A description of any deficiency detected;

(v) The cause(s) of any deficiency detected, if known;

(vi) The number of casefiles and/or program records selected and examined within the sub-unit, identification of those selected (record case number,

Food and Nutrition Service, USDA

§ 275.11

household name, etc.), the proportion which were not subject to review, as well as the method used to select the sample;

(vii) Where applicable, the numerical extent of any deficiency detected through examination of program records; and

(viii) Any pertinent comments concerning the sub-unit's operation.

(2) State agencies shall promptly forward review findings to the appropriate State office for analysis, evaluation, and corrective action planning. Review worksheets shall be retained in an orderly fashion and made available to FNS upon request.

Subpart C—Quality Control (QC) Reviews

§ 275.10 Scope and purpose.

(a) As part of the Performance Reporting System, each State agency is responsible for conducting quality control reviews. For SNAP quality control reviews, a sample of households shall be selected from two different categories: Households which are participating in SNAP (called active cases) and households for which participation was denied, suspended or terminated (called negative cases). Reviews shall be conducted on active cases to determine if households are eligible and receiving the correct allotment of SNAP benefits. The determination of whether the household received the correct allotment will be made by comparing the eligibility data gathered during the review against the amount authorized on the master issuance file. Reviews of negative cases shall be conducted to determine whether the State agency's decision to deny, suspend or terminate the household, as of the review date, was correct. Quality control reviews measure the validity of SNAP cases at a given time (the review date) by reviewing against SNAP standards established in the Food and Nutrition Act of 2008 and the Regulations, taking into account any FNS authorized waivers to deviate from specific regulatory provisions. FNS and the State agency shall

analyze findings of the reviews to determine the incidence and dollar amounts of errors, which will determine the State agency's liability for payment errors in accordance with the Food and Nutrition Act of 2008, as amended, and to plan corrective action to reduce excessive levels of errors for any State agency.

(b) The objectives of quality control reviews are to provide:

(1) A systematic method of measuring the validity of the SNAP caseload;

(2) A basis for determining error rates;

(3) A timely continuous flow of information on which to base corrective action at all levels of administration; and

(4) A basis for establishing State agency liability for errors that exceed the National performance measure.

(c) The review process is the activity necessary to complete reviews and document findings of all cases selected in the sample for quality control reviews. The review process shall consist of:

(1) Case assignment and completion monitoring;

(2) Case reviews;

(3) Supervisory review of completed worksheets and schedules; and

(4) Transmission of completed worksheets and schedules to the State agency for centralized data compilation and analysis.

§ 275.11 Sampling.

(a) *Sampling plan.* Each State agency shall develop a quality control sampling plan which demonstrates the integrity of its sampling procedures.

(1) *Content.* The sampling plan shall include a complete description of the frame, the method of sample selection, and methods for estimating characteristics of the population and their sampling errors. The description of the sample frames shall include: source, availability, accuracy, completeness, components, location, form, frequency
