§ 27.98 Value of grade where no sale; determination.

As provided in § 27.96, whenever no sale of a particular grade of cotton shall have been made on a given day in a particular spot market, the value of such grade in the market on that day will be determined as follows:

(a) If on such given day there shall have been in such market both a sale of any higher grade and a sale of any lower grade, the average of the declines, or advances, or decline and advance, as the case may be, of the next higher grade and the next lower grade so sold shall be deducted from, or added to, as the case may be, the value, on the last preceding business day, of the grade the value of which on such given day is sought to be ascertained.

(b) If on such given day there shall have been in such market a sale of either a higher or a lower grade, but not sales of both, the decline or advance of the next higher or the next lower grade so sold shall be deducted from, or added to, as the case may be, the value on the last preceding business day of the grade the value of which on such given day is sought to be ascertained.

(c) If on such given day there shall have been in such market no sale of spot cotton of any grade, the value of each grade shall be deemed to be the same as its value therein on the last preceding business day, unless in the meantime there shall have been bona fide bids and offers, or sales of hedged cotton, or other sales of cotton, or changes in prices of futures contracts made subject to the act, which in the usual course of business would clearly establish a rise or fall in the value of spot cotton in such market, in which case such rise or fall may be calculated and added to or deducted from the value on the preceding business day of cotton of all grades affected thereby.

§ 27.99 Values; expression.

For the purpose of this subpart values shall be expressed in terms of cents and hundredths of a cent. A fraction of a hundredth, when equal to, or greater than, the half thereof, shall be treated as a hundredth, and when less than a half of a hundredth shall be disregarded.

AUTHORITY: Sections 28.20 to 28.24 issued under sec. 2, Pub. Res. 72-73, 47 Stat. 1621 (7 U.S.C. 51b); sec. 3c, Pub. L. 75-28, 50 Stat. 62 (7 U.S.C. 473c).

SOURCE: Sections 28.20 through 28.24 appear at 42 FR 24711, May 16, 1977, unless otherwise noted.

§ 28.20 When license is required.

Samples for Form A determination shall be accepted under this subpart from licensed warehousemen only. Samples for classification pursuant to §§ 28.901 through 28.917 shall be accepted from licensed gins or warehouses. No license is required to sample cotton for Form C or Form D determination.

§ 28.21 Eligibility and application.

Any cotton warehouse or gin which may desire to submit samples for determination or classification for which a license is required under § 28.20 shall be eligible for a license. Application for licenses to draw and submit samples shall be submitted by warehouses and gins on forms furnished by the Division.

§ 28.22 Authority granted by license.

Licenses issued by the Division shall authorize the warehouse to draw and submit samples from cotton stored in the warehouse for Form A determination or for classification pursuant to §§ 28.901 through 28.917. Licenses issued by the Division shall authorize gins to draw and submit samples from cotton ginned at the gin for classification pursuant to §§ 28.901 through 28.917. Licenses shall be valid for a period of five years.

§ 28.23 Suspension or revocation of license.

(a) Any license issued to a warehouse or gin to sample cotton may be suspended or revoked, following notice and opportunity for hearing, if the li-

censee has knowingly or carelessly sampled cotton improperly, or has submitted improper samples for classification, or has violated any provision of the Act or the regulations, or has used the license, or allowed it to be used, for any improper purpose.

(b) *Procedure.* (1) All cases arising under this paragraph shall be conducted under the Uniform Rules of Practice, 7 CFR 1.130 *et seq.*, and instituted upon a complaint filed by the Administrator.

(2) In all cases except those involving willfulness, or in which the public health, interest, or safety otherwise requires, prior to the institution of a formal proceeding, the Administrator shall give written notice to the licensee of facts or conduct which appear to warrant institution of such a proceeding and shall afford the licensee the opportunity, within a reasonable time, to demonstrate or achieve compliance with the Act and regulations.

(c) *Suspension pending adjudication.* In any situation where the integrity of sampling procedures would be seriously jeopardized if a license remained valid pending formal adjudication, the Administrator may temporarily suspend the license effective on or after the third day after mailing notice thereof to the licensee's last known address. Notice of temporary suspension may be made at or after the filing of a complaint and shall contain the reasons for the action.

(d) *Conditional suspension.* (1) The Administrator may temporarily suspend a license, without hearing, for a correctable cause. Such suspension, after appropriate corrective action is taken, will terminate.

(2) Written notice shall be given to the licensee in advance of a temporary suspension if practicable, or within 2 days of oral notice, stating the reasons and grounds for temporary suspension.

(3) A licensee may request a formal hearing procedure following receipt of oral or written notice of temporary suspension.

(e) During any period in which the cotton sampling license of a warehouse or gin is suspended or revoked, the Division will not accept any samples

§ 28.24

from the licensee for Form A determination, or for classification pursuant to §§ 28.901 through 28.917.

§ 28.24 Surrender of license certificate.

In the event of suspension or revocation of a license, the licensee shall promptly surrender the license to the Division.

DRAWING, SUBMISSION AND DISPOSITION OF SAMPLES

§ 28.25 Samples for Form A determination.

Samples for Form A determination shall be drawn, handled, identified, and shipped by a licensed warehouse according to the methods and procedures specified in this section. Any samples or set of samples which do not meet these specified requirements may be rejected by the Area Director.

(a) Samples shall be freshly drawn.

(b) Each sample shall consist of two portions, one drawn from each side of the bale. Each portion shall be at least six (6) inches wide and approximately twelve (12) inches long and shall weigh at least three (3) ounces.

(c) Where it is necessary to draw two sets of samples, a single cut should be made in each side of the bale, and the portion of cotton removed from each cut should be broken in half across the layers to provide two complete samples. In those cases where this method would result in samples of insufficient length, it will be acceptable to split the sample lengthwise along the layers provided the outside portion from each side is submitted for the official classification.

(d) Dressing, trimming, or discarding part of the sample is prohibited. No part of the cotton or pieces of bagging, leaf, grass, dirt, sand, or any other material shall be removed from either side of the sample.

(e) A coupon showing the correct warehouse bale number and name and address of warehouse shall be placed between the two portions of each sample.

(f) Samples shall be identified and sacked immediately after they are cut without further handling prior to shipment to the Classing Office.

7 CFR Ch. I (1-1-24 Edition)

(g) Samples shall be addressed to and mailed, shipped, or delivered direct to the Classing Office serving the territory in which the warehouse is located. Samples shall in no case be consigned or routed through the owner or custodian of the cotton. Samples mailed or shipped shall be prepaid.

(h) The Area Director may require that any licensed warehouse shall provide the crop year, gin name and gin bale number for each sample submitted whenever the Area Director deems that such information is necessary in order to assure that each sample is properly identified with the correct bale of cotton.

(i) The licensed warehouse shall cooperate with employees of the Division making inspections of sampling procedures, and shall draw or permit the drawing of such additional samples, without charge as may be deemed necessary to appraise sampling procedures.

§ 28.36 Order of classification.

All samples for which classification requests are pending shall be classified, as far as practicable, in the order in which the samples are delivered for classification. When in the opinion of the Area Director or Quality Assurance Director there is a need to deviate from this order of classification, the director shall designate which samples will be given priority in classification.

§ 28.39 [Reserved]

§ 28.40 Terms defined; cotton classification.

For the purposes of classification of any cotton or of its comparison with a type or other samples, the following terms shall be construed, respectively, to mean:

(a) *Fire-damaged cotton*. In those cases where it is certain that the cotton is fire damaged, the classification record shall be marked Code 97 (Fire-Damaged Upland Cotton saw ginned) and no official color grade assigned to the sample.

(b) *Micronaire (mike) reading*. The measurement of the fiber fineness and maturity, in combination, of cotton as determined by an airflow instrument. For any cotton that has a micronaire reading of 2.6 or lower, the Classing Office will enter the micronaire reading on all classification memoranda issued for such cotton.

(c) *Extraneous matter*. Extraneous matter is any substance appearing in a cotton sample that is not discernible in the official cotton standards. Such material may consist of rough preparation, sand, dust, oil, grass, whole seeds, parts of seeds, motes, spindle twist, bark, stems, cloth and plastic.

(d) *Re-ginned cotton*. Cotton that, after having been ginned and baled, has been subjected to a ginning process and then re-baled. Responsibility for identifying cotton, which has been actually re-ginned, rests with the owner of the cotton or the owner's agent.

(e) *Repacked cotton*. Cotton that is composed of factors', brokers', or other samples, or of loose or miscellaneous lots collected and rebaled, or cotton in a bale which is composed of cotton from two or more smaller bales or parts of bales that are combined after the cotton leaves the gin.

(f) *False packed cotton*. Cotton in a bale (1) containing substances entirely foreign to cotton; (2) containing damaged cotton in the interior with or without any indication of such damage upon the exterior; (3) composed of good cotton upon the exterior and decidedly inferior cotton in the interior, in such

7 CFR Ch. I (1–1–24 Edition)

manner as not to be detected by customary examination; or (4) containing pickings or linters worked into the bale.

(g) *Mixed-packed cotton*. Cotton in a bale which, in the sample taken therefrom, shows a difference of two or more color grades, and/or a difference of two or more color groups, or grade of the other side that is one color grade and one color group higher between the two portions of the sample. White, Light Spotted, Spotted, Tinged, and Yellow Stained shall each constitute a color group. The classification assigned will be that of the portion showing the lower color grade. The classification record for the bale will contain a code 75, to designate mixed quality.

(h) *Water-damaged cotton*. Cotton in a bale that has been penetrated by water during the baling process, causing damage to the fiber, or a bale that through exposure to the weather or by other means, while apparently dry on the exterior, has been damaged by water in the interior. If such condition can be ascertained, the classification record shall be marked Code 98 (Water-Damaged Upland Cotton saw ginned) and no official color grade will be assigned.

§ 28.57 Form C certificate.

When classification has been made of cotton inspected and sampled under supervision of a Division employee there shall be issued a cotton class certificate known as a Form C certificate. Each Form C certificate shall show the true classification of the cotton in the respects specified in the request. Such

certificate, when it has been once reviewed in accordance with § 28.66, shall be deemed to be a final certificate as to the classification shown, within the meaning of section 4 of the Act (42 Stat. 1517; 7 U.S.C. 54), in all cases except when superseded by a certificate or award made as provided in § 28.161.

§ 28.58 New memorandum or certificate; issuance.

Upon the written request of a holder of a cotton class memorandum or certificate issued under this subpart, a new memorandum or certificate shall be issued, without the reclassification of the cotton, to take the place of the former memorandum or certificate for any cotton covered thereby, when necessary on account of the breaking or splitting of a lot or otherwise for the business convenience of such holder. In any case where a new memorandum or certificate is requested in accordance with this section the former memorandum or certificate shall be surrendered for cancellation, and such new memorandum or certificate shall bear a new number and the date of its issuance and the date of original classification and shall otherwise comply with this subpart.

§ 28.59 Lost memorandum or certificate may be replaced by duplicate.

Upon the written request of the last holder of a valid Form A or Form D memorandum, or Form C Certificate and a showing to the satisfaction of the Area Director of the Classing Office which issued such memorandum or certificate that it has been lost or destroyed and, if lost, that diligent effort has been made to find it without success, a new memorandum or certificate shall be issued without the reclassification of the cotton. Such new memorandum or certificate shall bear the same number and date of issuance as the lost or destroyed memorandum or certificate and shall include a statement to the effect that it is a duplicate issued in lieu of the lost or destroyed original, as the case may be.

A new memorandum or certificate complying with this subpart may be issued in substitution therefor. If such memorandum or certificate be not surrendered upon such request, it shall nevertheless be invalid for the purposes of the act and this subpart.

[52 FR 30882, Aug. 18, 1987]

REVIEWS

§ 28.65 Provisions for reviews.

Reviews of classifications or comparisons represented by Form A or D memoranda or Form C certificates shall be governed by § 28.66.

§ 28.66 Review procedure.

A review of any Form A, C, or D determination may be requested by the owner or custodian of the cotton from which the sample was drawn within 30 days after the issuance of the original memorandum. Such review shall cover all of the quality factors for which the original determination was made. Requests for reviews of Form A or D determinations may be filed with, and the review made by, the Classing Office which issued such memorandum or the Quality Control System. Requests for reviews of Form C determinations shall be filed with, and the reviews made by, the Quality Control System. Redrawn samples shall be required for reviews of Form A and Form C determinations except in cases where the original samples have remained, identity preserved, in the custody of the Division. When redrawn samples are necessary, they shall be drawn and submitted as prescribed in this subpart. As evidence of a review determination, a Form A or D memorandum or Form C certificate appropriately marked to indicate that it represents a review determination shall be issued to the applicant requesting the review. The applicant may be required by the Classing Office or the Quality Control Section issuing

7 CFR Ch. I (1-1-24 Edition)

such review determination to surrender the original classification memorandum or certificate. In any event the review determination shall supersede and invalidate the original determination.

[52 FR 30882, Aug. 18, 1987]

§ 28.68 Withdrawal of application for review.

Any application for review may be withdrawn by the applicant at any time before the review classification of the cotton covered thereby has been completed, subject to the payment of such fees, if any, as may be prescribed in this subpart.

PRACTICAL FORMS OF COTTON STANDARDS

§ 28.105 Practical forms of cotton standards.

(a) Practical forms of the cotton standards of the United States prepared in physical form, each certified under the seal of the U.S. Department of Agriculture and under the signature of the Administrator, thereto affixed by the Administrator or by some other official or employee of the Department duly authorized by the Administrator, and in the case of the standards for grade accompanied by photographs representing the cotton in such practical forms on the date of certification, are available for sale to any person requesting the same, subject to the other conditions of this section.

(b) Each application for practical forms of the cotton standards shall be upon an application form furnished by the Division, shall be signed by the applicant, and shall incorporate the following conditions:

(1) That no practical form of any of the cotton standards for the grade of American Upland cotton shall be considered or used as representing such standards after the date of its cancellation in accordance with this section or in any event after the expiration of 12 months following the date of its certification: Provided, That sets of practical forms stored, protected, and preserved in accordance with certain agreements for the adoption of universal standards may be used for such periods as may be prescribed in such agreements.

(2) That said practical forms and the photographs accompanying them shall be subject to inspection on any business day, between the hours of 9 a.m. and 4 p.m., by the Administrator or by an officer or agent of the Department authorized by the Administrator for that purpose.

(3) That the signature of the Administrator certifying to any practical form, or any photograph of said practical form accompanying the same, or both, may be cancelled if it be found, upon such inspection, either that copy of said forms for any reason misrepresents the cotton standards or that any such photographs have been altered or mutilated.

[22 FR 10930, Dec. 28, 1975, as amended at 48 FR 37003, Aug. 16, 1983; 52 FR 30883, Aug. 18, 1987]

§ 28.106 Universal cotton standards.

Whenever any of the official cotton standards shall have been adopted as universal standards by an association or exchange located in a country other than the United States, the name of such association or exchange may be shown on the outside of the box or container.

§ 28.107 Original cotton standards and reserve sets.

(a) The containers of the original Universal Standards and other official cotton standards of the United States currently adopted, whenever such official standards are represented by practical forms, shall be marked as prescribed in the order or orders of their establishment, and shall be wrapped and sealed. After being so marked, wrapped and sealed, they shall be held in secure storage in the custody of the U.S. Department of Agriculture. The Director may authorize the temporary removal of such containers from storage and the transporting of the containers to other locations for purposes of Universal Cotton Standards Conferences and other purposes as deemed necessary by the Director. Such containers shall remain in the control and custody of the Director until the original standards contained therein are superseded by new or revised standards.

(b) At each Universal Cotton Standards Conference held for approving key

copies of the Universal Standards there shall be prepared two full sets of practical forms of copies of such standards, which shall be known as "Reserve Sets" and which, upon the certification and recommendation of qualified experts, shall be certified by such experts as true copies of the currently adopted standards as and when established. Such reserve sets shall be enclosed in metal-lined cases and sealed in the presence of a special committee duly authorized by the Director and composed of representatives from the associations attending the conference and the Department. The special committee shall deposit the set designated as the First Reserve Set in a vault in a bank in Memphis, Tenn. The Division shall keep the set designated as the Second Reserve Set in secure storage. This special committee shall witness the opening of the First Reserve Set for display at the conference. The Director shall arrange for removal of the Second Reserve Set from its storage place and for the transport of such set to the site of the conference. If upon examination of the First Reserve Set by representatives at the conference it should appear that such set has undergone any substantial change, the Second Reserve Set shall be opened and used in its stead.

(d) The First Reserve Set of each conference or the Second Reserve Set, if it has been used in place of the First Reserve Set, as provided in paragraph (c) of this section shall be retained by the Division until the currently adopted standards which they represent have been superseded by new or revised standards.

All charges for practical forms of cotton standards and all fees and expenses for services of inspection of bales and supervision of sampling, classification, comparison, or review by a Classing Office shall be paid at the time of filing the request for the service desired, except that in the discretion of the Director bills may be delivered to persons from whom payment or charges or fees may become due. Such bills shall be rendered as soon as practicable after the last day of each month for amounts due and unpaid on such dates. When necessary, in the discretion of the Area Director, any bill may be rendered at an earlier date for any charges or fees then due from the person to whom such bill may be rendered. § 28.116 Amounts of fees for classification; exemption.

(a) For the classification of any cotton or samples, the person requesting the services shall pay a fee, based on the description that follows, subject to the additional fee provided by paragraph (c) of this section.

(1) For each calendar year, AMS will calculate the rate for services per hour per program employee using the following formulas:

(i) *Regular rate.* The total AMS grading or classification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(ii) *Overtime rate.* The total AMS grading or classification program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5 plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If

applicable, travel expenses may also be added to the cost of providing the service.

(iii) *Holiday rate.* The total AMS grading or classification program personnel direct pay divided by direct hours which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(2) For each calendar year, based on historical costs, AMS will calculate the benefits, operating, and allowance for bad debt components of the regular, overtime and holiday rates as follows:

(i) *Benefits rate.* The total AMS grading or classification program direct benefits costs divided by the total hours (regular, overtime, and holiday) worked, which is then multiplied by the next calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan (TSP) retirement basic and matching contributions.

(ii) *Operating rate.* The total AMS grading or classification program operating costs divided by total hours (regular, overtime, and holiday) worked, which is then multiplied by the percentage of inflation.

(iii) *Allowance for bad debt rate.* Total AMS grading or classification program allowance for bad debt divided by total hours (regular, overtime, and holiday) worked.

(3) The calendar year cost of living expenses and percentage of inflation factors used in the formulas in this section are based on the most current Office of Management and Budget's Presidential Economic Assumptions.

(b) When a comparison is requested of any samples with a type or with other samples, the fees prescribed in paragraph (a) of this section shall apply to every sample involved, including each of the samples of which the type is composed.

(c) An additional fee based on current shipping rates shall be assessed for returning samples unless the request for service is so worded that the samples

§ 28.123

become government property immediately after classification.

(d) For any review of classification or comparison of any cotton, the fees prescribed in paragraph (a) of this section shall apply. The additional fee prescribed in paragraph (c) of this section is not applicable to review of classification if made on the same sample as the original class or comparison.

§ 28.119 Fee when request for classification is withdrawn.

When the request for the classification or comparison of any cotton or an application for review shall be withdrawn after the classification of such cotton has been started pursuant thereto, the person filing the same shall pay the prescribed fee as to any such cotton already classified.

§ 28.120 Expenses to be borne by party requesting classification.

For any samples submitted for Form A, Form C, or Form D determinations, the expenses of inspecting and sampling, or supervising the sampling, and

When so provided in the articles, rules, or bylaws of the association or exchange, such determinations may be evidenced by awards. If an award is made which does not state the classification, such board will, upon request of the owner or custodian of the cotton and the payment of a reasonable additional fee, issue a certificate showing in detail the true classification for grade and color of such cotton, based upon a comparison of the samples with the universal standards or with a type or other samples on which the cotton has been sold, as the case may be.

§ 28.162 Procedure.

The manner of procedure in submitting and handling samples, in classification and in instituting and conducting arbitrations and appeals shall be as prescribed in the articles, bylaws, and rules of the association or exchange.

§ 28.177 Request for classification and comparison of cotton.

The applicant shall make a separate request, using an application supplied by the Program, for each lot or mark of cotton that the applicant desires classified or compared separately. All requests for classification or comparison shall be filed with the Quality Assurance Division or the Classing Office designated by the Deputy Administrator of the Cotton and Tobacco Program.

§ 28.178 Submission of cotton samples.

Samples for foreign-growth cotton classification or comparison shall be drawn, handled, identified, and shipped according to the methods and procedures specified in this section. Any samples or set of samples which do not meet these specified requirements may be rejected by the Program.

(a) Samples shall be freshly drawn.

(b) Each sample shall consist of two portions, one drawn from each side of the bale. Each portion shall be at least six (6) inches (15.25 cm) wide and approximately twelve (12) inches (30.5 cm) long and shall weigh at least eight (8) ounces (227 grams).

(c) Dressing, trimming, or discarding part of the sample is prohibited. No part of the cotton or pieces of bagging, leaf, grass, dirt, sand, or any other material shall be removed from either side of the sample.

(d) A barcoded coupon showing the correct location/warehouse code and bale number along with the name and address of owner/owner's agent shall be placed between the two portions of each sample.

through the owner of the cotton or the owner's agent. All expenses related to the sampling and transportation of samples—including but not limited to any fees related to Customs clearance such as fumigation and/or phytosanitary certification—shall be prepaid by the owner of the cotton or the owner's agent.

(g) All foreign-growth cotton samples submitted for classification and/or comparison shall be enclosed in one or more wrappers, which shall be labeled or marked, or both, in such manner as to show the location/warehouse code; name and address of the owner/owner's agent; the number of bales represented by the samples in each wrapper; and such other information as may be necessary in accordance with the instructions of the Deputy Administrator.

[81 FR 7030, Feb. 10, 2016]

§ 28.180 No return of samples.

§ 28.186

§ 28.182 Denial of service.

The Deputy Administrator may for good cause, including the acts or practices set forth in § 28.32(a) or any knowing violation of the regulations in this subpart, deny any person, including the agents, officers, subsidiaries, or affiliates of such person, from any or all benefits of this subpart for a specified period, after notice and opportunity for hearing has been afforded. Procedures outlined, or referred, in part 50 of this chapter (7 CFR 50.1 through 50.12) shall govern proceedings under this section.

[81 FR 7031, Feb. 10, 2016]

§ 28.183 Methods of cotton classification and comparison.

(a) The classification of foreign-growth cotton samples shall be determined by the quality of a sample in accordance with the Universal Cotton Standards (the official cotton standards of the United States) for the color grade and the leaf grade of Upland Cotton, the length of staple, and fiber property measurements such as length uniformity, strength, and micronaire. High Volume Instruments will determine all fiber property measurements except the determination of the presence of extraneous matter, special conditions and remarks. High Volume Instrument colorimeter measurements will be used for determining the official color grade. Cotton classers certified by the Cotton and Tobacco Program will determine the presence of extraneous matter, special conditions and remarks and authorized employees of the Cotton and Tobacco Program will determine all fiber property measurements using High Volume Instruments. The classification record issued by the Quality Assurance Division with respect to any cotton sample shall be deemed to be the classification record of the Department.

(b) Additional procedures and methods pertaining to the classification of foreign-growth cotton samples are outlined in §§ 28.36 through 28.40.

(c) When a comparison of such cotton samples with other actual samples or with a type is requested, the procedure and methods shall be as outlined in §§ 28.45 through 28.47.

[81 FR 7031, Feb. 10, 2016]

§ 28.184 Availability of electronic cotton classification data.

As soon as practicable after the classification or comparison of cotton has been completed, electronic cotton classification data for each sample submitted will be made available for the owner or the owner's agent to retrieve. The data record transmitted is representative of only the sample submitted by the owner or the owner's agent rather than any particular cotton bale.

[81 FR 7031, Feb. 10, 2016]

§ 28.185 Issuance of cotton classification memoranda.

Upon request, there shall be issued a cotton classification memorandum which shall embody within its written or printed terms:

(a) The results of the classification or comparison.

(b) The name of the country in which the cotton was produced.

(c) The source from which the samples were received for classification.

(d) A statement that any classification made has been on the basis of the Universal Cotton Standards (the official cotton standards of the United States) at the time of such classification.

(e) A statement that any classification made applies only to the samples as submitted by the owner or the owner's agent and does not purport to represent any particular cotton bales.

(f) The signature of the Director of the facility providing the classification service and the date of issuance of the memorandum.

OFFICIAL COTTON STANDARDS OF THE UNITED STATES FOR FIBER FINENESS AND MATURITY

AUTHORITY: Sections 28.601 to 28.603 issued under secs. 6, 10, 42 Stat. 1518, 1519, sec. 4854, 68A Stat. 580; 7 U.S.C. 56, 61, 26 U.S.C. 4854.

SOURCE: Sections 28.601 through 28.603 appear at 30 FR 7239, May 29, 1965, unless otherwise noted.

§ 28.601 Official cotton standards for fiber fineness and maturity.

The official cotton standards of the United States for fiber fineness and maturity shall be the measure of such qualities, in combination, provided by air flow instrument tests in terms of micronaire readings in accordance with the procedure specified in § 28.603.

§ 28.602 Terms of designations.

The fiber fineness and maturity of any cotton shall be designated by the micronaire reading obtained from an air flow instrument test for a specimen of the cotton as determined under § 28.603, e.g., 4.1, 4.2, 4.3, etc. To simplify recording, the decimal point may be omitted, and the micronaire reading recorded as 41, 42, 43, etc.

§ 28.603 Procedures for air flow tests of micronaire reading.

In determining in terms of micronaire readings, the fiber fineness and maturity, in combination, of cotton, the following procedures shall apply:

(a) Facilities and equipment shall include:

(1) Air flow instrument complete with accessories to measure the fineness and maturity, in combination, of cotton in terms of micronaire reading on the curvilinear scale adopted in September 1950 by the Department of Agriculture, or its equivalent.

Agricultural Marketing Service, USDA

§ 28.901

(2) A suitable supply of compressed air filtered to remove moisture and other impurities.

(3) Balance or scales suitable for accurately weighing the specimens required for the particular instrument.

(4) International Calibration Cotton Standards with established micronaire reading values for calibration of the air flow instrument.

(b) The instrument shall be calibrated each day before routine testing begins, as follows:

(1) The air shall be allowed to flow through the instrument until the indicator stabilizes.

(2) Specimens from at least two of the calibration cottons shall be tested to insure proper calibration of the instrument. The instrument shall be considered in calibration if the values obtained on the test specimens agree with the established values of the calibration cottons within 0.1 micronaire reading.

(c) Testing of the cotton specimen shall be performed as follows:

(1) Approximately the same amount of cotton shall be taken from each side of the sample for a test specimen. The weight of the test specimen shall be that weight prescribed for the air flow instrument being used.

(2) The weighed specimen shall be tested in a properly calibrated instrument.

(3) The specimen shall be inserted into the specimen holder of the instrument so that the mass of fibers is well distributed within the specimen holder.

(4) The air shall then be allowed to flow through the specimen in accordance with the method of operation of the instrument.

(5) The position of the instrument indicator shall be determined to the nearest 0.1 micronaire reading when it becomes stable.

(d) The accuracy of the instrument shall be checked at least every 2 hours during operation by testing appropriate calibration cottons. If the value obtained on a specimen from the calibration cotton is outside the established limits of 0.1 micronaire reading, or when successive readings show the results to be within the established limits, but consistently high or low,

the instrument and technique shall be thoroughly checked to remedy the discrepancies. Additional tests using calibration cottons shall be made until acceptable results are obtained before routine testing is resumed.

§ 28.904 Market news.

The Director shall cause to be distributed to producers of cotton and to others on request, timely information on prices for various qualities of cotton.

SAMPLING

§ 28.906 Sampling arrangements.

(a) Cotton must be sampled by a gin or warehouse that holds a valid license to sample cotton issued pursuant to §§ 28.20 through 28.22.

(b) The Director, or an authorized representative may direct that sampling be performed by employees of the Department of Agriculture for the purpose of appraising the sampling procedures at cotton gins or warehouses, or for the purpose of providing service to producers in special cases where a licensed gin or warehouse is not available.

§ 28.907 Responsibilities of licensed gins or warehouses.

Each licensee shall be primarily responsible for drawing, identifying, handling, and shipping samples of cotton in accordance with this subpart and with instructions furnished by the Director or an authorized representative from time to time.

§ 28.908 Samples.

(a) *Only one sample to be submitted.* Only one sample from each bale of eligible cotton shall be submitted for classification under this subpart. This does not prohibit the submission of an additional sample from a bale for review classification if the producer so desires.

(b) *Drawing of samples manual.* (1) Each cut sample shall be drawn from the bale after it is tied out following the ginning process, and shall be approximately 6 ounces in weight, not less than 3 ounces of which are to be drawn from each side of the bale: *Provided*, That each sample from a bale of American Pima cotton shall be approximately 10 ounces in weight, not less than 5 ounces of which are to be drawn from each side of the bale.

(2) Where it is necessary to draw two sets of samples, a single cut should be made in each side of the bale, and the portion of cotton removed from each cut should be broken in half across the layers to provide two complete samples. In those cases where this method would result in samples of insufficient length, it will be acceptable to split the sample lengthwise along the layers, provided the outside portion from each side is submitted for the official classification.

(c) *Mechanical sampling.* Samples may be drawn in gins equipped with mechanical samplers approved by the Division and operated according to sampling instructions furnished by the Director or an authorized representative. Such samples shall not be less than 6 ounces in weight.

(d) *Samples must be representative.* Each sample must be representative of the bale from which drawn.

(e) *Handling samples.* Samples shall not be dressed or trimmed and shall be carefully handled in such manner as not to cause loss of leaf, sand, or other material, or otherwise change their representative character. Samples shall be handled only by employees of the licensee prior to shipment or delivery to the cotton classing office of the Division.

(f) *Identifying and shipping samples.* Each sample shall be identified with a tag, supplied or approved by the Division, bearing the gin or warehouse

The packages shall be shipped or delivered direct to the cotton classing office serving the territory in which the cotton is ginned. Samples that were drawn by a mechanical sampler at the gin may be transported with the bales to the warehouse and then shipped or delivered direct to the classing office by the warehouse.

(g) *Request for classification.* Samples received from a licensed gin or warehouse with the identification tag required in § 28.908(f) shall constitute a request for classification service by the producer.

§ 28.909 Costs.

(a) Costs incident to sampling, tagging, and identification of samples and transporting samples to points of shipment shall be assumed by the producer, but tags and containers for the shipment of samples and shipping charges via U.S. Postal Service or duly authorized common carrier will be furnished by the service. After classification the samples shall become the property of the Government. The proceeds of the sale of cotton samples shall be used to defray the costs of providing the services under this subpart.

(b) The cost of High Volume Instrument (HVI) cotton classification service to producers will be based on formulas set forth in § 28.116. The proceeds of the sale of cotton samples shall be used to defray the costs of providing the service under this subpart.

(c) The Division will periodically bill producers or the voluntary agents designated by producers for the cost of classification. A discount of 5 cents per sample will be granted for services provide under this section when billing is made to voluntary agents.
