

other applicable Federal statutes or regulations. To be reinstated, the veterinarian must complete the necessary supplemental training units for the appropriate category and submit an application for renewal of veterinary accreditation to APHIS. A veterinarian who allows his or her accredited status to expire must have completed the required number of supplemental training units within 3 years of his or her application for renewal in order to be approved for renewal. Supplemental training units completed since the veterinarian's last renewal but more than 3 years before the veterinarian's application for renewal will not count towards fulfilling his or her training requirement.

(d) Veterinarians who are accredited as of February 1, 2010, may continue to perform accredited duties between February 1, 2010, and the date of their first renewal. APHIS will provide notice for 3 months to accredited veterinarians who are accredited as of February 1, 2010, to notify them that they must elect to participate in the NVAP as a Category I or Category II veterinarian. Veterinarians must elect to continue to participate by October 1, 2011, or their accredited status will expire. When APHIS receives notice from an accredited veterinarian that he or she elects to participate, APHIS will notify the accredited veterinarian of his or her date for first renewal. The accredited veterinarian must then complete all the training requirements for renewal, as described in this section, by his or her first renewal date.

[74 FR 65011, Dec. 9, 2009, as amended at 76 FR 52549, Aug. 23, 2011]

§ 161.4 Standards for accredited veterinarian duties.

An accredited veterinarian shall perform the functions of an accredited veterinarian only in a State in which the accredited veterinarian is licensed or legally able to practice veterinary medicine. An accredited veterinarian shall perform the functions of an accredited veterinarian and carry out all responsibilities under applicable Federal programs and cooperative programs subject to direction provided by

the Veterinary Official and in accordance with any regulations and instructions issued to the accredited veterinarian by the Veterinary Official, and shall observe the following specific standards:

(a) An accredited veterinarian shall not issue a certificate, form, record or report which reflects the results of any inspection, test, vaccination or treatment performed by him or her with respect to any animal, other than those in regular health maintenance programs, unless he or she has personally inspected that animal within 10 days prior to issuance. Inspections under this paragraph must be conducted in a location that allows the accredited veterinarian sufficient space to observe the animal in such a manner as to detect abnormalities related to areas such as, but not limited to, locomotion, body excretion, respiration, and skin conditions. An accredited veterinarian shall examine such an animal showing abnormalities, in order to determine whether or not there is clinical evidence compatible with the presence or absence of a communicable disease.

(1) Following the first two inspections of a herd or flock as part of a regular health maintenance program, an accredited veterinarian shall not issue a certificate, form, record or report which reflects the results of any inspection, test, vaccination or treatment performed by him or her with respect to any animal in that program, unless he or she has personally inspected that animal within 10 days prior to issuance.

(2) Following the third and subsequent inspections of a herd or flock in a regular health maintenance program, an accredited veterinarian shall not issue a certificate, form, record or report which reflects the results of any inspection, test, vaccination or treatment performed by him or her with respect to any animal in that program, unless he or she has personally inspected that animal within 30 days prior to issuance.

(b) An accredited veterinarian shall not issue, or allow to be used, any certificate, form, record or report, until, and unless, it has been accurately and fully completed, clearly identifying the

animals to which it applies, and showing the dates and results of any inspection, test, vaccination, or treatment the accredited veterinarian has conducted, except as provided in paragraph (c) of this section, and the dates of issuance and expiration of the document. Certificates, forms, records, and reports shall be valid for 30 days following the date of inspection of the animal identified on the document, except that origin health certificates may be valid for a longer period of time as provided in §91.3(a) of this chapter. The accredited veterinarian must distribute copies of certificates, forms, records, and reports according to instructions issued to him or her by the Veterinary Official.

(c) An accredited veterinarian shall not issue any certificate, form, record, or report which reflects the results of any inspection, test, vaccination, or treatment performed by another accredited veterinarian, unless:

(1) The signing accredited veterinarian has exercised reasonable care, that is, a standard of care that a reasonably prudent person would use under the circumstances in the course of performing professional duties, to determine that the certificate, form, or report is accurate;

(2) The certificate, form, or report indicates that the inspection, test, vaccination, or treatment was performed by the other accredited veterinarian; identifies the other accredited veterinarian by name; and includes the date and the place where such inspection, test, or vaccination was performed; and,

(3) For a certificate, form, or report indicating results of a laboratory test, the signing accredited veterinarian shall keep a copy of the certificate, form, or report and shall attach to it either a copy of the test results issued by the laboratory, or a written record (including date and participants' names) of a conversation between the signing accredited veterinarian and the laboratory confirming the test results.

(d) An accredited veterinarian shall perform official tests, inspections, treatments, and vaccinations and shall submit specimens to designated laboratories in accordance with Federal and State regulations and instructions

issued to the accredited veterinarian by the Veterinary Official.

(e) An accredited veterinarian shall identify or be physically present to supervise the identification of reactor animals by tagging or such other method as may be prescribed in instructions issued to him or her by the Veterinary Official or by a State Animal Health Official through the Veterinary Official.

(f) An accredited veterinarian shall immediately report to the Veterinary Official and the State Animal Health Official all diagnosed or suspected cases of a communicable animal disease for which a APHIS has a control or eradication program in 9 CFR chapter I, and all diagnosed or suspected cases of any animal disease not known to exist in the United States as provided by §71.3(b) of this chapter.

(g) While performing accredited work, an accredited veterinarian shall take such measures of sanitation as are necessary to prevent the spread of communicable diseases of animals by the accredited veterinarian.

(h) An accredited veterinarian shall keep himself or herself currently informed on Federal and State regulations that are provided to him or her by the Veterinary Official, or by a State official through the Veterinary Official, governing the movement of animals, and on procedures applicable to disease control and eradication programs, including emergency programs.

(i) An accredited veterinarian shall not use or dispense in any manner, any pharmaceutical, chemical, vaccine or serum, or other biological product authorized for use under any Federal regulation or cooperative disease eradication program, in contravention of applicable Federal or State statutes, regulations, and policies.

(j) An accredited veterinarian shall be responsible for the security and proper use of all official certificates, forms, records, and reports; tags, bands, or other identification devices; and approved digital signature capabilities used in his or her work as an accredited veterinarian and shall take reasonable care to prevent the misuse thereof. An accredited veterinarian

§ 161.5

shall immediately report to the Veterinary Official the loss, theft, or deliberate or accidental misuse of any such certificate, form, record, or report; tag, band, or other identification device; or approved digital signature capability.

(k) An accredited veterinarian may issue an origin health certificate for export use pursuant to part 91 of this chapter without including test results from a laboratory, if the Veterinary Official has determined that such action is necessary to save time in order to meet an exportation schedule and agrees to add the test results to the certificate at a later time. In such cases, the accredited veterinarian shall state on a removable attachment to the certificate that such test results are to be added by the Veterinary Official.

§ 161.5 Program certifications.

A program certification recognized by the Administrator may be granted to an accredited veterinarian in Category II upon completion of an additional orientation or training program approved by APHIS that focuses on the specific area for which the veterinarian is seeking program certification. Veterinarians accredited under Category I are not eligible to earn program certifications. Accredited veterinarians may elect to participate in a program certification on a voluntary basis. Participants in these program certifications will be qualified in a particular area or specialty. In addition to Category II training, qualification for a program certification will include additional specialized training, which may include periodic training updates. For certain program certifications, the cost of orientation or training may be borne by the accredited veterinarian. An accredited veterinarian granted a program certification will be referred to as a qualified accredited veterinarian or QAV. A QAV will be authorized to perform those accredited duties related to the program certification he or she has earned; accredited veterinar-

9 CFR Ch. I (1–1–23 Edition)

ians not granted program certifications will not be permitted to perform accredited duties related to that particular program certification. If a QAV allows his or her Category II accreditation to expire, the QAV's program certification expires as well, and the QAV must be qualified for the program certification again in accordance with this section.

[74 FR 65012, Dec. 9, 2009]

§ 161.6 Suspension or revocation of veterinary accreditation and re-accreditation; criminal and civil penalties.

(a) The Administrator is authorized to suspend for a given period of time, or to revoke, the accreditation of a veterinarian when he or she determines that the accredited veterinarian has not complied with the "Standards for Accredited Veterinarian Duties" as set forth in §161.4 of this part or with any of the other regulations in this subchapter, or is otherwise found to be unfit to be accredited. Veterinarians who perform duties that only accredited veterinarians are authorized to perform while their accredited status is suspended or revoked will be subject to such criminal and civil penalties as are provided by the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*) or other applicable Federal statutes or regulations. Performing accredited duties while accreditation status is suspended or revoked will be considered grounds for the Administrator to suspend accreditation, revoke accreditation, or deny application for reaccreditation, as circumstances warrant. A veterinarian whose accreditation has been suspended or revoked or whose application for reaccreditation has been denied may request a hearing under §162.13 to challenge the Administrator's decision.

(b) *Reinstatement after suspension.* A veterinarian whose accreditation has been suspended for less than 6 months (other than a summary suspension that is changed to a revocation as a result of an adjudicatory proceeding) will be automatically reinstated as an accredited veterinarian upon completion of the suspension. A veterinarian whose accreditation has been suspended for 6 months or more must complete a reaccreditation orientation program in
