

## Animal and Plant Health Inspection Service, USDA

## §91.12

list of designated ports of embarkation and are only approved for the time period and shipment conditions specified by APHIS at the time of approval.

(Approved by the Office of Management and Budget under control number 0579-0432)

### §91.10 Export inspection facilities.

(a) Export inspection facilities must be approved by the Administrator before they may be used for any livestock intended for export. The Administrator will approve an export inspection facility upon determining that it meets the requirements in paragraph (b) of this section. This approval remains in effect unless it is revoked in accordance with paragraph (c) of this section, or unless any of the following occur, in which case reapproval must be sought:

- (1) The owner of the facility changes.
- (2) Significant damage to the facility occurs or significant structural changes are made to the facility.

(b)(1) Export inspection facilities must be constructed, equipped, and managed in a manner that prevents transmission of disease to and from livestock in the facilities, provides for the safe and humane handling and restraint of livestock, and provides sufficient offices, space, and lighting for APHIS veterinarians to safely conduct required health inspections of livestock and related business. The Program Handbook contains guidance on ways to meet these requirements. Owners and operators may submit alternative plans for meeting the requirements to APHIS for evaluation and approval; the address to which to submit such alternatives is contained in the Program Handbook. Alternatives must be at least as effective in meeting the requirements as the methods described in the Program Handbook in order to be approved. Alternatives must be approved by APHIS before being used for purposes of this section.

(2) For the purposes of approval or a subsequent audit, APHIS representatives must have access to all areas of the facility during the facility's business hours to evaluate compliance with the requirements of this section.

(3) The application for approval of an export inspection facility must be accompanied by a certification from the authorities having jurisdiction over en-

vironmental affairs in the locality of the facility. The certification must state that the facility complies with any applicable requirements of the State and local governments, and the U.S. Environmental Protection Agency regarding disposal of animal wastes.

(c) The Administrator will deny or revoke approval of an export inspection facility for failure to meet the requirements in paragraph (b) of this section.

(1) APHIS will conduct site inspections of approved export inspection facilities at least once a year for continued compliance with the standards. If a facility fails to pass the inspection, the Administrator may revoke its approval. If the Administrator revokes approval for a facility that serves a designated port of embarkation, the Administrator may also remove that port from the list of designated ports of embarkation.

(2) APHIS will provide written notice of any proposed denial or revocation to the operator of the facility, who will be given an opportunity to present his or her views on the issues before a final decision is made. The notice will list any deficiencies in detail. APHIS will provide notice of pending revocations at least 60 days before the revocation is scheduled to take effect, but may suspend facility operations before that date and before any consideration of objections by the facility operator if the Administrator determines the suspension is necessary to protect animal health or public health, interest, or safety. The operator of any facility whose approval is denied or revoked may request another inspection after remedying the deficiencies.

### §91.11 Export isolation.

If an importing country requires export isolation for livestock, such isolation must occur before the animals may be moved to a port of embarkation, and both the manner in which this isolation occurs and the facility at which it occurs must meet the requirements specified by the importing country.

### §91.12 Ocean vessels.

(a) *Inspection of the ocean vessel*—(1) *Certification to carry livestock.* Ocean vessels must be certified by APHIS
