Proclamation 7745—Wright Brothers Day, 2003

December 17, 2003

By the President of the United States of America

A Proclamation

A spirit of exploration and discovery has been a part of the American character since our founding days. Orville and Wilbur Wright exemplified this spirit when they made the dream of human flight a reality on December 17, 1903. On Wright Brothers Day, we honor the vision of these bicycle mechanics from Dayton, Ohio, and celebrate the centennial of manned, powered flight.

One hundred years ago, the Wright brothers changed our world with their 12-second, 120-foot flight in North Carolina. Their achievement inspired other aviation pioneers and marked the beginning of a new era of freedom. Since that first flight, aviation and aerospace technology has advanced at a remarkable pace, allowing us to fly across oceans, break the sound barrier, orbit the Earth, land on the moon, and study our universe in a way our ancestors could not have imagined. Each new generation of engineers and other inventors, following in the Wright Brothers' footsteps, continues to move the technology of flight further.

Today, air transportation touches the lives of people throughout the United States, and helps unite the American people. Air transportation brings families and friends together, delivers aid to those in need, and facilitates industry and commerce.

As we look to the future, we remember the extraordinary accomplishments of the Wright Brothers. Their determination and innovation continue to inspire us as we embark on the second century of flight.

The Congress, by a joint resolution approved December 17, 1963 (77 Stat. 402; 36 U.S.C. 143) as amended, has designated December 17 of each year as "Wright Brothers Day" and has authorized and requested the

President to issue annually a proclamation inviting the people of the United States to observe that day with appropriate ceremonies and activities.

Now, Therefore, I, George W. Bush, President of the United States of America, do hereby proclaim December 17, 2003, as Wright Brothers Day.

In Witness Whereof, I have hereunto set my hand this seventeenth day of December, in the year of our Lord two thousand three, and of the Independence of the United States of America the two hundred and twenty-eighth.

George W. Bush

**Directive on Critical Infrastructure
Identification, Prioritization, and
Protection**

December 17, 2003

Homeland Security Presidential Directive/
HSPD-7

Subject: Critical Infrastructure
Identification, Prioritization, and Protection

Purpose

(1) This directive establishes a national policy for Federal departments and agencies to identify and prioritize United States critical infrastructure and key resources and to protect them from terrorist attacks.

Background

(2) Terrorists seek to destroy, incapacitate, or exploit critical infrastructure and key resources across the United States to threaten national security, cause mass casualties, weaken our economy, and damage public morale and confidence.

(3) America's open and technologically complex society includes a wide array of critical infrastructure and key resources that are potential terrorist targets. The majority of these are owned and operated by the private sector and State or local governments. These critical infrastructures and key resources are both physical and cyber-based and span all sectors of the economy.

(4) Critical infrastructure and key resources provide the essential services that underpin American society. The Nation possesses numerous key resources, whose exploitation or destruction by terrorists could cause catastrophic health effects or mass casualties comparable to those from the use of a weapon of mass destruction, or could profoundly affect our national prestige and morale. In addition, there is critical infrastructure so vital that its incapacitation, exploitation, or destruction, through terrorist attack, could have a debilitating effect on security and economic well-being.

(5) While it is not possible to protect or eliminate the vulnerability of all critical infrastructure and key resources throughout the country, strategic improvements in security can make it more difficult for attacks to succeed and can lessen the impact of attacks that may occur. In addition to strategic security enhancements, tactical security improvements can be rapidly implemented to deter, mitigate, or neutralize potential attacks.
