

I have read a fiery gospel writ in burnished
rows of steel:
"As ye deal with My contempters, so with
you My grace shall deal";
Let the Hero born of woman crush the ser-
pent with His heel,
Since my God is marching on.
He has sounded forth the trumpet that shall
never call retreat;
He is sifting out the hearts of men before His
judgement seat;
Oh, be swift, my soul, to answer Him! Be ju-
bilant my feet!
Our God is marching on.
Glory, glory hallelujah!
Glory, glory hallelujah!
Oh! Glory, glory hallelujah!
His truth is marching on.

CONGRATULATIONS TO SKIP ENTERTAINMENT

HON. ROBERT A UNDERWOOD

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 17, 1996

Mr. UNDERWOOD. Mr. Speaker, I would like to take this occasion to commend the SKIP Entertainment Co. Based on Guam and comprised of local talents, this dance group recently won the 1996 International Choreographic Award at the 6th Annual Jazz Dance World Congress.

The annual event includes workshops conducted by world renowned dance artists and was presented by Gus Giordano and the Kennedy Center. Out of the 79 groups from around the world that auditioned, 17 were selected to perform and compete at the Kennedy Center event. Five judges representing different countries selected SKIP over groups from Japan, Russia, and the United States.

As a result these kids from Guam will start appearing in national media campaigns for Leo's Dancewear. In addition, SKIP will once again perform at the 1997 Jazz World Congress to be held next year at Weisbaden, Germany. Having been present during their performance, I have to admit that these kids are outstanding artists and entertainers. They truly deserve the honors bestowed upon them.

This was truly a team effort. Terri Knapp, the costume designer, and Ray Leeper, the choreographer, deserve a special commendation for having made all this possible. In the same respect, we must make mention of the SKIP kids who performed that night. The incredible talents of Jason Anderson, Justina Caguioa, Kimberly Davis, Karina Dolorin, Renee Eucogo, Kimberlee Gogue, John Hetzel, Lesley Hongyee, Chad Knapp, Tara Leon Guerrero, Michael Lommeka, Kristan McCauley, Dolores Perez, Tristan Rebanal, Francine Saymo, and Matthew Wolff are good examples of what Guam has to offer.

Through their exceptional talents and notable achievements, the SKIP kids have brought recognition upon themselves and the island of Guam. On behalf of the people of Guam, I would like to commend everyone who played a part in the success of this most recent venture of the SKIP kids. I wish them continued success and the best of luck as they represent Guam at the Starpower National Dance finals to be held at Ocean City, MD.

CONGRATULATIONS TO SARAH BRACHMAN

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 17, 1996

Mr. FROST. Mr. Speaker, I would like to take this opportunity to bring to the attention of my colleagues a very special day for Sarah Brachman of Fort Worth, TX. On August 24, 1996, 13-year-old Sarah will have her Bat Mitzvah.

A Bat Mitzvah is a milestone event for every Jewish child at the age of 13. It marks the passage from childhood to adulthood according to the Jewish religion. During a Bat Mitzvah, the child will lead her congregation in services and will read from the Torah.

While the occasion of a Bar or Bat Mitzvah is always significant, this one carries extra weight and meaning. Sarah is a child with Down syndrome who, with the support of her family and community, has studied for years in order to be able to lead her congregation's services on this momentous day.

This Bat Mitzvah is a tribute to the will and perseverance of a loving child who has overcome significant handicaps to accomplish wonderful things.

TRIBUTE TO PHILANTHROPIST ALEX MANOOGIAN

HON. GEORGE P. RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 17, 1996

Mr. RADANOVICH. Mr. Speaker, I rise today to honor the memory of Armenian philanthropist Alex Manoogian. After a long and prosperous life, Mr. Manoogian passed away July 10, at the age of 95.

Mr. Manoogian was born in 1901 and came to the United States at the age of 24, after completing his primary and secondary education. Manoogian relocated to Bridgeport, CT, and sought employment in a factory during the day, while he taught Armenian classes during the evenings.

Eventually, Mr. Manoogian made Detroit his home in 1924. He worked in a manufacturing plant, and eventually combined his formal education and his work experience to found his own company which became the MASCO Corp., the first company owned by an Armenian to be listed on the American Stock Exchange. Today his company reports annual sales of over \$3 billion.

In addition to his company, Manoogian was active in many philanthropic and service organizations. He will probably be most remembered for the work he did for the Armenia General Benevolent Union [AGBU]. After joining the organization in the 1930's, he served the AGBU in numerous capacities including the Avak Sbarabed (national commander), as a member of the board of directors, and international president. Manoogian served as international president for 17 years and was voted life president in 1970 and in 1989, was voted as honorary life president when his daughter assumed presidential duties.

On an International level, Manoogian has also contributed to a wide array of Armenian,

American, Dutch, Latin American, Australian and Lebanese museums, schools, libraries, hospitals, and universities. Although there is an exhaustive list, just a few include: the Marie Manoogian School in Los Angeles, the Armenian Church in Amsterdam, Holland and the Alex Manoogian Center in Zaleh, Lebanon. He is the recipient of honorary doctorate degrees from Wayne University in Detroit, American Armenian International College in La Verne, Lawrence Technological University in Southfield, MI, and Yerev State University in Armenia.

Alex Manoogian possessed the determination, drive, and ingenuity, our forefathers founded this country on, over 200 years ago. I wish today to extend my sympathies to the Manoogian family and the Armenian community worldwide on the passing of a wonderful leader.

EXTENDING BENEFITS TO VETER- ANS EXPOSED TO AGENT OR- ANGE

SPEECH OF

HON. JACK QUINN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 16, 1996

Mr. QUINN. Mr. Speaker, I rise today in support of H.R. 3643 and to commend my fellow members of the House Veterans' Affairs Committee for their hard work this year. I am pleased to be a member of a committee that has put forth many beneficial revisions for our Nation's veterans. I especially want to thank Chairman BOB STUMP for his tenacious advocacy for servicemen and women and his fine ability to expedite veterans' legislation.

H.R. 3643 improves health care delivery to minority groups within our Nation's veterans population such as women veterans and those who served the country in the Persian Gulf war.

The bill also includes provisions which I introduced earlier this year. For one, the bill extends priority healthcare to those service men and women who were stationed in Israel and Turkey during the Persian Gulf war from August 2, 1990 to July 31, 1991.

Currently, veterans of these regions are experiencing undiagnosed medical problems similar to those who served in the theater of operations. Israel experienced repeated SCUD attacks. Military members stationed in Turkey supported aircraft missions into the Persian Gulf, served as a transportation point for returning personnel and equipment and rendered assistance to the Kurds.

Thus, the possibility for contamination or exposure by military members stationed in Turkey and Israel was extremely high. Medical records of many veterans stationed in and around the Persian Gulf fail to accurately identify medications distributed and inoculations administered.

Since no definitive diagnosis has been determined in the cases of Persian Gulf illness, these veterans stationed in Turkey and Israel exhibiting similar medical problems should also be granted health care from the Department of Veterans Affairs.

This provision is a technical correction, since these countries should have been included in the original bill.

The bill also includes a provision to set mammography quality standards. Women make up 5 percent of the veterans' population. While the veterans' population is decreasing, female representation is increasing. As a society, we must quickly adapt to this change and better serve women veterans.

I am pleased to see that we were able to work in a bipartisan fashion to make improvements in women's health care services.

ENCRYPTION

HON. ANNA G. ESHOO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 17, 1996

Ms. ESHOO. Mr. Speaker, yesterday the House of Representatives passed the Omnibus Export Administration Act of 1995 to improve export opportunities for American businesses.

Unfortunately, this legislation did not address the limits placed on overseas sales of encryption products.

Encryption technology can make electronic information indecipherable to anyone lacking the mathematical formula, or key, to unlock the data. It offers companies the promise of protection against hackers, the Government the promise of protection from terrorists, and for e-mail users the promise of privacy against prying eyes.

It also offers the promise of \$60 billion in potential export sales for American high tech companies by the year 2000. But these sales will remain out of reach unless the U.S. Government loosens restrictions on encryption exports to reflect the ready availability of powerful encryption products on the foreign market and through the Internet.

Mr. Speaker, Congress needs to pass the Security and Freedom through Encryption Act. It's a bipartisan, commonsense approach to resolving a trade problem that's costing the high tech industry billions of dollars, and costing American citizens their right to privacy.

AIRCRAFT REPAIR STATION SAFETY ACT OF 1996

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 17, 1996

Mr. BORSKI. Mr. Speaker, today I am introducing the Aircraft Repair Station Safety Act of 1996, a bill designed to ensure that foreign repair stations that perform work on aircraft owned by U.S.-based airlines meet the same or equivalent safety standards as U.S. repair stations.

This legislation is absolutely essential to make sure that, in the interest of the bottom line, U.S. airlines are not tempted to transfer work abroad to repair stations that do not meet the same standards as domestic repair stations.

The bill specifically addresses serious safety concern: The 1988 Federal Aviation Administration regulations, part 145, which eased the rules for certification of foreign aircraft repair facilities. As a result of those regulations, there are repair enterprises around the world

actively seeking to secure the lucrative maintenance work for U.S. aircraft and components.

The FAA's 1988 regulations needlessly changed the rules for worldwide maintenance. Previously, U.S. aircraft were required to be repaired in the United States except in emergencies or if the plane was being used solely in international operations. Today, regularly scheduled maintenance is being performed abroad, even if standards for those foreign repair stations are not as high as those for U.S. stations and regardless of the impact on the U.S. work force.

If facilities in countries such as Mexico and Costa Rica succeed in attracting large amounts of work for United States aircraft, I fear that aviation safety standards will erode and high-wage, high-skill United States workers may see their jobs move overseas to take advantage of low wages in Third World nations. This bill will prevent the loss of jobs in the United States to foreign repair stations with lower standards.

This issue is much like the issue of the application of U.S. safety standards to foreign airlines, a matter which I examined intensively as chairman of the Subcommittee on Investigations and Oversight in the 102d and 103d Congresses. I was disappointed at that time by the FAA's slow response to the need of application of U.S. safety standards to foreign airlines, just as I am disappointed today by FAA's failure to respond to the need to revise the 1988 regulations.

With the heightened national attention to aviation safety issues that exists today, this bill focus on the need to ensure that foreign aircraft repair stations meet the highest possible safety standards by operating under the same rules as U.S. domestic facilities.

This bill will promote safe skies, require uniform aircraft repair standards around the world, and shield an important, high wage American job sector from attempts to ship jobs overseas to low-wage countries.

With passage of this legislation, we will ensure that foreign repair facilities do not obtain FAA certification unless they meet the same standards that our Government imposes on U.S. facilities.

The Aircraft Repair Station Safety Act of 1996 consists of three main provisions:

First, the bill nullifies the November, 1988 FAA regulations which made it far too easy for foreign aircraft repair facilities to obtain FAA certification regardless of need;

Second, the bill levels the playing field by requiring foreign facilities to fulfill the same standards as those imposed on domestic repair stations by the FAA; and

Third, the bill requires FAA to take strong action against those who would knowingly employ the use of substandard or uncertificated parts.

These issues are especially important and timely in the wake of the ValuJet tragedy where we discovered a confusing maze of 56 contractors and subcontractors used to handle aircraft maintenance normally performed in-house by the major air carriers. It is clear that there were serious problems with the regulatory system's ability to conduct adequate surveillance of domestic contract operators. At the same time, we cannot ignore the potential regulatory and enforcement problems associated with oversight of foreign facilities.

Unless overturned, the current FAA regulations could inspire U.S. air carriers to send

high-wage mechanics jobs to low-wage countries. FAA-certified facilities in Mexico and Costa Rica, as well as other countries, employ workers who, in comparison to U.S. workers, earn extremely low wages to perform highly specialized, sensitive jobs.

In Tijuana, Mexico, a massive FAA-certified facility is ready to take on aircraft maintenance work even though there is sufficient capacity with thousands of skilled American workers ready to handle this safety-sensitive work. The purpose of the Tijuana facility is clear: to lure lucrative aircraft repair business from the United States at the expense of high-wage American jobs.

Congress and the FAA have the clear responsibility to ensure that the traveling public does not face unnecessary risks caused by the expansion of globalization of air transport to the area of aircraft maintenance. This expansion must not result in the reduction of safety standards.

We also have the duty to discourage the movement of high-skill mechanics jobs overseas and to make sure that any unscrupulous company that would knowingly use bogus parts faces a loss of certification.

The Aircraft Repair Station Safety Act of 1996 brings common sense and equity to the FAA's aircraft repair facility certification program. I urge my colleagues to join me in support of the Aircraft Repair Station Safety Act of 1996.

SOCIAL SECURITY FAIRNESS ACT OF 1996

HON. TIM HOLDEN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 17, 1996

Mr. HOLDEN. Mr. Speaker, I rise today to ask my colleagues to cosponsor the bill I will introduce today, the Social Security Benefits Fairness Act of 1996.

Under current law, no Social Security benefits are paid for the month of death. When a person dies, their family is not entitled to the benefits and must send back the Social Security check—even if they lived for most of the month. This happens to many families in my district.

For example, Mrs. Phyllis Strunk's husband, Royden, died on May 31, 1996, at 7:04 p.m., living the entire month and incurring normal living expenses. His wife was told she would not receive her husband's benefits for May because he did not live 4 hours and 56 minutes longer.

According to his family, Mr. Strunk "lived a quiet life after [serving in] the war—he obeyed the law, paid his taxes, voted, gave to those less fortunate than he, and rarely had an extra dollar after his families needs were met. In many ways, the country [he] had honored and fought for cheated him in life, and now, it has repaid his loyalty by also cheating him in death."

This law is cruel and affects people adversely when they are already saddened and distraught by the death of a family member. I have heard from tearful and outraged widows and widowers, daughters, and sons who have already suffered a great loss—they want to know why they have to send the money back when it is needed to pay utilities, rent, and
