

and thereby preserve the new increased grazing fee formula in S. 1459.

The Bumpers amendment would create two grazing fee formulas. The first would apply to permittee who "control livestock less than 2,000 animal unit months [AUM]" on public lands during a grazing year. This fee is intended to apply to small ranching operations, and would increase each year for the next 3 years. The second fee created by this amendment is targeted to larger ranching operations, which are comprised of more than 2,000 AUM's. This fee would be set according to higher amount of either the average grazing fee charged by the respective State, or, by increasing the aforementioned small ranch fee by 25 percent.

The Bumpers amendment would increase the grazing fee each year for the next 3 years for smaller ranchers, and implement a substantial increase for larger ranchers. While the Bumpers amendment attempts to require larger—and therefore presumably better off ranching operations to pay more, I ultimately decided that the BUMPERS proposal would have too injurious an impact on modest, family-run ranching operations in Arizona.

I strongly believe in the longstanding principle of managing Federal lands for the multiple use of the public. This means that the many legitimate uses of public lands—recreation, wildlife preservation, grazing, hunting, and economic purposes—must be carefully balanced with each other. Our precious Federal lands must be properly managed so that they can be enjoyed by Americans both today, and in the future.

When public lands are used for economic purposes, such as timber, mining, and cattle grazing, there clearly should be a fair return to taxpayers for the economic benefits gained from the land, and for the cost of administering these uses. In light of the massive Federal debt our Nation has piled up, the Congress must be especially vigilant in ensuring that fees imposed on individuals who are using public lands for commercial purposes, must be equitably set. With an astounding \$5 trillion debt growing larger every day, I think it is appropriate for grazing fees and mining fees to be adjusted.

I strongly oppose, however, drastic hikes in such fees that would bankrupt hard-working ranching families. Nationwide, ranchers who graze cattle on public lands have an annual income of only \$30,000 a year. These families do not have a huge profit margin that is being gained at the expense of the public. Indeed, the taxes they pay and the economic benefits they generate are extremely important to small towns in Arizona and throughout the West.

The grazing reform bill I am supporting, S. 1459—Public Rangelands Management Act—would increase the existing grazing fee by 37 percent. In my view, that is a pretty reasonable attempt to address legitimate concerns of the public about what return the

Treasury is getting from the lease of Federal rangelands. If we could reform Federal fees or reduce Federal spending pertaining to corporate entities which are similarly subsidized by taxpayers, our budget problems would be in a lot better shape. Ranchers will pay their fair share under S. 1459.

The new, higher grazing fee in S. 1459 will afford greater stability to ranchers in my State who need to plan ahead for their family business. The fee in S. 1459 is based upon a 3-year rolling average of the gross value of beef production in the United States, along with interest rates from Treasury bills. This new formula will fluctuate according to market conditions, which I think is appropriate.

While the sponsors of the Bumpers amendment state that it is targeted at large, corporate-owned ranching operations, I am deeply concerned that its higher, corporate fee hike could come down squarely on many family ranchers in the Southwest. It would have potentially crippling effects on family ranchers in States such as Arizona and New Mexico, especially.

The reason the Bumpers amendment would hurt many Southwestern ranchers is that its formula would significantly impact ranchers whose grazing permits are comprised primarily of Federal lands, and on ranchers who graze cattle year round. Both of these factors apply to southwestern ranchers, due to large amount of land that is owned by the Federal Government. The Bumpers amendment's formula would apply its higher fee to ranching operations with more than 176 head of cattle, which is not a large, corporate operation by the standards of my State.

Furthermore, the Bumpers amendment's higher fee was partly based on higher State land standards, which are not always readily comparable to Federal lands. Federal rangelands do not offer the same exclusivity of use to permittees as do State lands, and ranchers on Federal lands also bear higher costs for range improvements than do holders of private grazing permits.

I find no evidence that that new fee will not cover the Federal cost of the program.

Due to these factors, I opposed the Bumpers amendment, and voted to preserve the reasonable fee increase which is in the underlying bill. I commend Senator Bumpers for his objectives, however, and share his concerns that taxpayers must be fairly compensated for the economic use of public lands. I will continue my efforts to vigorously weed out unfair and unsustainable corporate subsidies. If S. 1459 becomes law, the Congress should continue to evaluate the grazing revenues it produces. I will be open at that time to considering whether further adjustments for corporate ranching operations are warranted.●

TRIBUTE TO COL. FRED E. KISHLER, JR.

● Mr. GLENN. Mr. President, I rise to pay tribute to Col. Fred E. Kishler, Jr., who died this past January. From August 1994 until his death, Colonel Kishler served as the Director of the General Defense Intelligence Program [GDIP] Staff where he served with great distinction.

Colonel Kishler was a fellow Buckeye—born in Tiffin, OH, and receiving his undergraduate degree at Heidelberg College in Tiffin. In his lengthy and distinguished Air Force career, Colonel Kishler flew dangerous, sensitive missions in the U-2 spy plane and other aircraft, and was responsible for fielding numerous tactical and strategic intelligence systems. His greatest love as a pilot was flying the U-2, spending approximately 15 years in the U-2 program. Colonel Kishler accumulated over 4,800 flying hours—over 2,000 of those hours were spent in the cockpit of a U-2, and he flew 106 combat missions in Southeast Asia. During the Vietnam War, he demonstrated his courage as a flight leader for search and rescue missions, and he supported the Son Tay POW raid.

In 1991, Colonel Kishler came to work for the Defense Intelligence Agency, first serving as the Chief of the Reconnaissance Division for Functional Management. His hard work and effectiveness led to other positions as the Associate Deputy Director of the Programs and Evaluation Division of the National Military Intelligence Collection Center, and ultimately as the Director of the General Defense Intelligence Program Staff—particularly challenging assignments in a period of declining resources where we have had to do more with less. Colonel Kishler's honesty, integrity, and professionalism gained the respect of Congress as well as the Department of Defense.

Among Fred's many decorations and awards were the Distinguished Flying Cross, a Meritorious Service Medal, the Air Medal with thirteen oak leaf clusters, and the Air Force Commendation medal.

Mr. President, I join all of my colleagues on the Senate Select Committee on Intelligence in paying tribute to the memory of Col. Fred E. Kishler, Jr., and pass along our deepest sympathies to Colonel Kishler's mother and father—Fred and Marjorie Kishler; his wife, Susan; and their sons, Mark and Fred. Fred Kishler was a credit to the Air Force and the United States of America, and he will be sorely missed.●

NATIONAL MISSILE DEFENSE ACT OF 1996

● Mr. ABRAHAM. Mr. President, I rise today to join the distinguished majority leader, and my colleagues, in co-sponsoring the National Missile Defense Act of 1996. This legislation builds on the Missile Defense Act of 1995. The 1995 act made significant

progress toward securing the funding necessary for the eventual deployment of a missile defense system capable of protecting the United States. Unfortunately, that act fell short by not explicitly directing that we deploy the missile defense system as soon as possible.

The majority leader, in close cooperation with Congress' National defense leadership, has crafted a proposal that achieves our nation's missile defense through prudent, incremental development of policies and force structures. To begin with, we would produce the system necessary to protect the United States from limited, unauthorized or accidental ballistic missile attacks. We then would augment that capability to defend our Nation against larger and more sophisticated ballistic missile threats. I am especially heartened that this bill allows for the development of the most promising anti-ballistic missile technologies, including sea-based systems such as Navy Upper Tier.

This bill assigns the Secretary of Defense the considerable task of reporting a missile defense development and deployment plan by March 15, 1997. However, I feel confident that Congress will be more than willing to assist him in the formulation of that plan. This can, and should, be a joint endeavor, Congress will fulfil its constitutional responsibility to raise and support our armed forces, while the Executive determines how best to deploy these forces.

At this time, Mr. President, I would like to expand upon section 5 of the act—that section regarding the ABM Treaty. Congress, through the Missile Defense Acts of 1991, 1994, and 1995 has repeatedly stated that the ABM Treaty does not, in any way, hinder the development of theater ballistic missile defenses. It has also called for a renegotiation of the ABM Treaty so as to allow the development of more robust national missile defense systems.

Unfortunately, this country has abandoned the initiatives of the previous administration to cooperatively develop with the Russians a protective global missile defense systems. An insistence on keeping America vulnerable to attack, and a dogmatic faith in the deterrence of nuclear war through mutual assured destruction will no longer prevent missile attacks upon the United States.

Mr. President, the times have changed since the ratification of the ABM Treaty. Our primary threats no longer come from a general nuclear attack by thousands of Soviet weapons—an attack that would probably overwhelm a ballistic missile defense system. Today our immediate threats come from rogue, unintentional, or unauthorized attacks of limited size and duration. The limitations of the ABM Treaty fail to address these new threats, and I believe, are incapable of being modified so as to address them. The administration has steadfastly

stood by the antiquated strategies of the ABM Treaty, and I am afraid it is unwilling to address the threats posed to America by continued reliance on that treaty.

Nonetheless, Mr. President, this Congress continues to be willing to work with the administration to address our missile defense needs. I believe the urging contained in section 5 represent our last, best hope of adequately modifying the ABM Treaty, and protecting America from ballistic missile attack. The Treaty may be fundamentally unable to address the threats we face today. It may be best to renounce it in its totality. Such a clear break with previous policy may not be feasible in this Congress. But it must be clear that this Congress worries that its urging and calls have fallen on deaf ears in the Executive, and that we believe the United States cannot afford to wait much longer. Therefore, I particularly support the provision in this bill that calls for withdrawal from the ABM Treaty if amendments allowing adequate national missile defenses are not agreed to within 1 year. I hope this is sufficient warning as to the extent of congressional frustration.

The majority leader has displayed the foresight and perceptiveness critical for developing effective national security strategies. There can be no doubt that a fully operational and technologically capable ballistic missile defense system is crucial to that strategy. Nor can there be any doubt that antiquated treaties which fail to adapt to vastly different national security threats must be either changed or discarded.

The majority leader's bill constitutes a reasonable and moderate attempt to bridge the broad philosophical gap that exists between Congress and the administration. We should not let this opportunity be lost. If concerns with the ABM Treaty prevent this bill from becoming law, then I believe it may be time to nullify that treaty.●

TRIBUTE TO CARL SIMPSON WHILLOCK

● Mr. PRYOR. Mr. President, I rise today to pay tribute to a true statesman. Carl Simpson Whillock was born on May 7, 1926, in the small town of Scotland, AR. In the nearly 70 years since, he has excelled in the realms of politics, academia, and private business.

Carl's desire to serve the people of Arkansas surfaced at an early age. Just 2 years after receiving both his undergraduate and master's degrees from the University of Arkansas in Fayetteville, Carl began a distinguished career of public service as a member of the Arkansas House of Representatives. He came to Washington in 1955 to serve as the executive assistant to the Honorable J.W. Trimble, U.S. Congressman from the third district of Arkansas.

While working in Representative Trimble's office, Carl Whillock earned

a law degree from George Washington University in 1960. After a 3-year stint in private law practice, he served as prosecuting attorney for the 14th Judicial District of Arkansas before beginning his career in academia at the University of Arkansas.

Carl Whillock was the director for university relations and an assistant to the president during his 7½ years at Arkansas. He also taught part-time in the political science department.

In 1964, Carl Whillock left academics to run my campaign for Governor of Arkansas, and I am happy to say he worked with me in the Governor's office for a short time after my election. But Carl soon returned to his beloved University of Arkansas as the vice president for governmental relations and public affairs.

Carl's many years of work in the academic community were rewarded in 1978 when he was asked to become the president of Arkansas State University in Jonesboro.

For the past 16 years, Carl has been the president of Arkansas Electric Cooperative and Arkansas Electric Cooperatives Inc. As he prepares to retire on the 1st of April, his colleagues remember him as a trusted friend, a revered mentor, and a gentle, gracious boss.

Carl Whillock's management style has been praised throughout his many years in various positions of authority. He believes in hiring good people, and then giving them the space to do their jobs. His employees operate effectively and efficiently because Carl makes them feel comfortable and encourages them to bring their own style to the workplace.

By all accounts, Carl Simpson Whillock is a success. The very mention of his name brings a smile to the faces of those who know him, and the words gentleman and good guy flow from their lips.

After retirement, I am sure Carl will remain active as a member of the University of Arkansas' Board of Trustees. He has never been one to sit still for very long. He is always there to lend a hand. As Dennis Robertson, a longtime friend and employee says, "Carl approaches life in a simple way. He does not get mad. He is warm, caring and above all sincere. We can all learn a lot from him."

Carl Simpson Whillock—a true asset to the State of Arkansas. On behalf of all the people you have touched over these many years, congratulations on your retirement.●

GREEK INDEPENDENCE DAY

Ms. SNOWE. Mr. President, I would like to join with my colleagues, and with so many Americans—both of Greek and non-Greek descent—in celebrating March 25, Greek Independence Day. I am pleased to have been an original cosponsor of Senate Resolution 219, a bipartisan resolution that designated today "Greek Independence
