

and Doris and Ken's service to our community.

First, were we truly men of courage * * * Second, were we truly men of judgement * * * Third, were we truly men of integrity * * * Finally were we truly men of dedication?

The answers to these questions is indeed, yes.

Mr. Speaker, I ask you and my distinguished colleagues to join me in paying tribute to this outstanding couple, Doris and Ken Rufener. It is an honor to congratulate the Rufeners as recipients of the coveted Civitas Award.

AIR QUALITY REGULATIONS

HON. BOB SCHAFFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 4, 1997

Mr. BOB SCHAFFER of Colorado. Mr. Speaker, on November 27, 1996, the Environmental Protection Agency [EPA] proposed new air quality regulations that will have an enormous impact on Colorado. These new standards increase the regulation of ozone and airborne particulate levels and are backed by dubious science which will carry enormous costs for businesses and taxpayers.

The new standards will be difficult and perhaps impossible to meet in many areas. The ozone standards will change from .12 to .08 parts per million. That means there will be less than one ozone molecule in every 10 million air molecules. The EPA rule for particulate matter size—essentially soot—poses additional problems. These new standards will set levels for particles of a size down to 2.5 microns. In comparison, the width of a human hair is 70 microns—28 times as wide.

EPA's focus in the development of these rules appears to have been on the Midwest and the Eastern United States. For example, when EPA last revised the particulate matter standards, they relied upon health effects studies primarily conducted in the Eastern United States. However, upon implementation the vast majority of the nonattainment areas were in the West. When impacts on the West are not appropriately addressed early in the process, the end result has been an unfair regulatory burden on the West.

Everyone wants cleaner air. However, there is no scientific foundation for these extreme regulations. Very little is actually known about the health effects of such low levels of ozone and particulates or whether there are any health effects at all. At first, the EPA claimed the new standards would save 20,000 lives a year. The agency then revised the figure to 15,000. EPA, however, has refused to release the data on which those estimates are based. Independent researchers say they cannot substantiate EPA's health claims on currently available data.

The costs are easier to establish. These standards will radically alter the way we live. The EPA has estimated that as much as half of the U.S. population will have to limit the use of automobiles, lawnmowers, wood-burning stoves, fireplaces, and even barbecue grills. These regulations will suppress economic growth and job creation throughout Colorado. The President's own Council of Economic Ad-

visers has estimated the costs of the new regulations to be between \$11.6 and \$60 billion per year, compared to benefits totaling between \$200 million and \$1 billion per year. Even the EPA's own calculations—which only estimate partial costs—show that the regulations' cost outweigh their benefit.

Air quality is improving nationwide even without new regulations. All six air pollutants tracked by EPA have shown dramatic improvements since 1975. Air particulates are down 24 percent, sulfur dioxide down 50 percent, carbon monoxide down 53 percent, ozone down 25 percent, nitrogen dioxide down 24 percent, and lead down 94 percent. In recent testimony before the House Commerce Committee, EPA Administrator Carol Browner stated that air quality will continue to improve substantially even without the new regulations. Full implementation of the regulations should be delayed until more of our questions can be answered.

TRIBUTE TO THE GRAAFSCHAP CHRISTIAN REFORMED CHURCH

HON. PETER HOEKSTRA

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 4, 1997

Mr. HOEKSTRA. Mr. Speaker, I rise today to recognize the congregation of the Graafschap Christian Reformed Church of Graafschap, MI, as they celebrate 150 years of service to God, family, and community.

On April 4, 1847, 104 pioneers left Rotterdam, the Netherlands with the hope of finding religious freedom and economic opportunity in America. They arrived in New York harbor on May 23, and settled on the south shore of Macatawa Beach in Holland, MI on June 20. The settlers soon founded the Graafschap Christian Reformed Church, dedicating their log church in 1848. The early church faced many challenges and difficulties, but the congregation responded with prayer and hard work. By 1862, the church had grown significantly and the current colonial church building was constructed.

As Graafschap Christian Reformed Church grew in numbers and strengthened her spiritual roots, its vision expanded beyond its own congregation and extended to the community. In the past 150 years, the church has been a strong supporter of Christian education. As a leader in community ministry, the congregation has supported and participated in mission projects around the world.

The past and present members of the Graafschap Christian Reformed Church have had a profound impact on the Holland, MI area. Now with more than 500 members, the church is dedicated to continuing its spiritual mission far into the future. I would like to extend my thanks to Graafschap Christian Reformed Church for 150 years of service and commitment to God and the community, and offer my congratulations on the celebration of their anniversary. May God continue to bless the congregation and their work in the years to come.

TRIBUTE TO THE EMPLOYEES, FAMILIES, AND FRIENDS OF THE LONG BEACH NAVAL SHIPYARD

HON. STEPHEN HORN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 4, 1997

Mr. HORN. Mr. Speaker, I rise today to pay tribute to the employees, families, and friends of the Long Beach Naval Shipyard, which will close in a few days after decades of service. In addition to playing an integral role in America's national defense, the shipyard has been a cornerstone of the Long Beach community.

A half century of history, with all of the success and adversity that history can bring to bear, has forged strong bonds between the Long Beach Naval Shipyard and the city of Long Beach and its surrounding region. In the best sense, we have been one community where military and civilians have pulled together for the good of all.

Our relationship was born in the early, frightening months of the Second World War, when the shipyard was added to an already considerable Navy presence in the area. The relationship grew and prospered as America's Armed Forces produced the victories of 1945 and the hope of lasting peace. Instead of a lasting peace, we faced the long, bitter, and tense years of Korea, Vietnam, and the cold war. The shipyard took on the task of keeping the Navy ready for actual and potential conflicts at any time or place. Our Nation, the shipyard, and its exceptional employees passed the tests of efficiency and effectiveness with flying colors and played a vital part in the ultimate victory that brought down the Berlin Wall and ended the threat of Communism.

Those events and the job well done by thousands of talented men and women are what we will remember. And what we all should value, as we now bring to a close this long and highly successful partnership. For the past five decades, the Long Beach Naval Shipyard has played a vital role in our national defense and it has been a crucial part of our local economy. Those who have served at Long Beach's shipyard displayed superb skill, uncommon commitment, and an unyielding dedication. Their service, and the shipyard itself, will long be remembered as a source of pride for the U.S. Navy and for the city of Long Beach.

THE IMATION CORP. RECEIVES THE EPA 1997 PRESIDENTIAL GREEN CHEMISTRY CHALLENGE AWARD

HON. BILL LUTHER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 4, 1997

Mr. LUTHER. Mr. Speaker, I rise today to congratulate the Imation Corp. of Oakdale, MN, for receiving the 1997 Presidential Green Chemistry Challenge Award from the U.S. Environmental Protection Agency [EPA]. Imation is a new imaging and information company located in my district, that was once part of 3M.

Imation has developed a new way to process x rays and other diagnostic medical images. Developing these images through the

use of traditional film developing processes creates a great deal of waste through the use of wet chemistry. The new technology developed by Imaton does away with this wet chemistry and replaces it with a process that uses heat and laser imaging to develop images. The company estimates that this new process has already reduced the production of contaminated wastewater by 54.5 million gallons annually.

It is for this reason that the EPA has singled out Imaton for this award. Minnesota has a long and proud tradition of finding ways to improve our way of life while protecting and nurturing our natural surroundings. It is terrific to see a high-technology company like Imaton developing products that reduce pollution while still getting the job done for the American people. I am very pleased to bring their success to the attention of the House and to congratulate them on their achievement.

NATIONAL FARMERS' MARKET MONTH

HON. BRAD SHERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 4, 1997

Mr. SHERMAN. Mr. Speaker, I rise today to commemorate August as the U.S. Department of Agriculture's National Farmers' Market Month. I would like to take this time to recognize the successes of Southern California's farmers' markets, particularly the Southland Farmers' Market.

Each year more than a million and a half people visit Southland Farmers' Markets to purchase the finest and freshest produce in town. At these markets the consumer buys directly from the farmer, purchasing the freshest food at competitive prices. These farmers also help people select the juiciest and ripest produce while offering tips on preparation and cooking—services not available in most grocery stores.

In addition to offering spectacular services, these markets are extraordinarily important to both farmers and citizens in our community. The majority of participants are small farmers who desperately need access to public markets in order to survive. They therefore rely upon selling their products at these markets and would find it difficult to market their crops if they could no longer participate in farmers' markets.

Besides helping farmers, these markets also benefit citizens in our community. They provide an opportunity for farmers to supply surplus produce for the hungry and have helped to revitalize downtown communities in our area. The success of these markets would not be possible without the backing of the Department of Agriculture and citizens of our community.

Mr. Speaker, I ask you and my colleagues to join me in commemorating August as National Farmers' Market Month. I wish great success for all farmers' markets here in our community and throughout the United States.

25TH ANNIVERSARY OF HELP LINE

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 4, 1997

Mr. KANJORSKI. Mr. Speaker, I rise today, to celebrate the 25th anniversary of the founding of Help Line, a nonprofit, informational, advocacy, and crisis intervention agency serving the Wyoming Valley area of my congressional district in Pennsylvania.

Administered by the Family Services Association, Help Line was created by Anne Vernon in 1972 when the raging flood waters of Hurricane Agnes shut down all communication in the Wyoming Valley. It provided a centralized source of vital information to the victims of the devastation. In 1975, the agency entered into an agreement with area agencies to provide 24 hour crisis services. Soon other agencies signed on to the service and Help Line became the crisis center for all Wyoming Valley social service agencies. The information and referral component of Help Line now lists over 500 agencies in its local data files and over 1,700 total listings.

Throughout its existence, Help Line has responded to special community needs. For example, it assisted in the coordination of the local United Way's Emergency Day Camp Program, establishing services for the speech and hearing impaired, and assembling a list of physicians for people who were unemployed and without health insurance.

Mr. Speaker, the Wyoming Valley has grown to rely on the services of Help Line. Help Line has established the Family Action Network, addressing the problems of teen pregnancy, HIV infection, juvenile delinquency, and substance abuse just to name a few. Under the able leadership of its director, Mr. Michael Zimmerman; assistant director, Mr. Gary F. Smith; family services director, Mr. Dennis Gourley, and its outstanding board of community leaders led by Mr. Tom Bigler, Help Line is one of the most comprehensive 24 hour crisis centers and information and referral centers of its kind in the Commonwealth of Pennsylvania. Its well trained and dedicated staff are on duty to handle crises round the clock.

Mr. Speaker, I am proud to join with the Board of Family Services Association and the entire Wyoming Valley in congratulating the fine management and staff of Help Line for providing quality service for 25 years.

DR. PATRICIA WORTHY OYESHIKU: 1997 WESTERN REGIONAL EXCELLENCE IN TEACHING AWARD

HON. BOB FILNER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 4, 1997

Mr. FILNER. Mr. Speaker, I rise today to pay tribute to Dr. Patricia Worthy Oyeshiku, a distinguished teacher from my home town of San Diego who has made a positive impact on thousands of young lives in our community. I am proud to recognize Dr. Oyeshiku, an outstanding teacher at Morse High School in my congressional district where she has taught since 1971.

Tomorrow, she will receive the 1997 Western Regional Excellence in Teaching Award by the National Council of Negro Women. This Excellence in Teaching Award is designed to raise awareness and involvement of African-American parents, educators, and community leaders in meeting the educational needs of African-American youth.

The award recognizes exceptional public school teachers of African-American students who are living the philosophy and legacy of the National Council of Negro Women. Funded by Shell Oil Co., the award ceremonies tomorrow are an opportunity to generate greater public awareness and appreciation of excellence in teaching.

This is not the first time that Dr. Oyeshiku has been recognized for her outstanding contribution to our young people. She was the California Teacher of the Year in 1981 and also National Teacher of the Year finalist that year. She was honored as the Headliner in Education by the San Diego Press Club in 1981.

She serves on the California Academic Partnership Program Advisory Board, is an evaluation team leader of the California Commission on Teacher Credentialing, has served as past cochairperson for all English department Chairs in the San Diego unified school district, is a member of the Advisory Committee in Reading for the San Diego unified achievement goals program and of the advisory council to an interdisciplinary approach to multicultural education. She has lectured throughout the State of California on issues related to education.

Dr. Oyeshiku has always been an outstanding role model for many years. She served in the Peace Corps in Brazil, and received the John F. Kennedy Award as the outstanding Peace Corps volunteer in 1966. She is a member of the Readathon Advisory Board of the Multiple Sclerosis Society.

Like those before her who have received this high honor, Dr. Oyeshiku has worked tirelessly for the benefit of every student in her classes. Her principal, Dr. Shirley Peterson, told me that she is "honored, on behalf of all of the Morse High School Tigers, to recognize Dr. Oyeshiku for receiving this prestigious award and to commend her and applaud her efforts."

Mr. Speaker, every student deserves the opportunity to succeed, and every student deserves a teacher like Dr. Oyeshiku. I am pleased that her efforts are recognized with the 1997 Western Regional Excellence in Teaching Award.

TRIBUTE TO CATHOLIC SOCIAL SERVICES OF ST. CLAIR COUNTY, 50TH ANNIVERSARY

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 4, 1997

Mr. BONIOR. Mr. Speaker, today, I would like to honor Catholic Social Services of St. Clair County as they celebrate their 50th anniversary on September 14. This group of extraordinary people have dedicated their time, talents, and devotion to God to improve the welfare of people throughout St. Clair County.

In 1947, under the leadership of Edward Cardinal Mooney of the archdiocese of Detroit,
