

RECOGNIZING ALLISON DICKSON
FOR HER BATTLE AGAINST MUS-
CULAR DYSTROPHY

HON. CHET EDWARDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 7, 1997

Mr. EDWARDS. Mr. Speaker, today I wish to recognize a brave and bright young lady from my Texas congressional district. Allison Dickson, a Temple High senior, is at the top 3 percent of her class academically and has served as a class officer. Recently, Allison was selected as the 1997 Temple High School Football Sweetheart.

Allison has accomplished this and so much more despite the debilitating effects of muscular dystrophy. The disease has taken her mobility, but she has kept her heart and soul. I want to enter into the RECORD some special thoughts written by this exceptional young lady:

(By Allison Dickson)

He asked me a simple question. I'm sure he has no recollection of this day or of how much it meant to me. I often think back and remind myself of the five words that made me realize something very important about who I am.

Two rows over in my freshmen U.S. history class sat a boy with a quick smile and calm manner. I had only known him for a few weeks, but we often discussed sports and school like friends normally do. One day, with the innocence of a young child, he asked, "Allison, do you play soccer?" Just for a moment I didn't know what to say. I quickly glanced down, smiled at him, and shook my head no. He had given me the greatest compliment I could ever receive. I realized he didn't see me as a person in a wheelchair. To him, I was his friend Allison who could do anything.

I have muscular dystrophy. This disease has taken away my ability to walk but nothing more. Everyone has a weakness, but determination, hard work and a strong faith makes nothing impossible. My achievements, both academically and in leadership roles, have helped me truly believe this.

Of course, I have heard the random rude comments people say. I have felt the effects of prejudice first hand. All of this has made me a stronger and more compassionate person.

I am different from others, but different is not always bad. This boy's trivial question helped me understand that I am not so unlike most people. He had looked past my disability and saw the real me.

Jim Valvano, a former basketball coach and sports announcer, had been diagnosed with cancer. In a speech, he told people cancer could not touch his mind, it could not touch his heart, and it could not touch his soul. He then said that those three things would carry on forever.

Look into my eyes and you will see a mind yearning for knowledge and truth. Look into my heart and you will see a burning passion for life and love for others. Look into my soul and you will see an enduring spirit that touches the lives of others and will carry on forever.

TRIBUTE TO JIM LAMOTTE

HON. JERRY WELLER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 7, 1997

Mr. WELLER. Mr. Speaker, I rise today to honor Mr. Jim LaMotte who is retiring from the Momence Fire Department after 39 years of service including 21 years as fire chief. The Momence Fire District is staffed by volunteers. Mr. LaMotte is the fourth chief to serve Momence since the district was formed in 1949.

During his role as fire chief, Mr. LaMotte achieved many goals. One was to relocate the department to a new facility which was done at a low cost to the taxpayers. Another of Mr. LaMotte's priorities was to maintain and upgrade the equipment such as the breathing apparatus which was recently purchased.

Mr. LaMotte and his wife of 35 years live in Momence, IL. They have three daughters and six grandchildren with one more grandchild on the way. He is the cofounder and vice president of Custom Farm Seed. Mr. LaMotte is also chairman of the board for Good Shepherd Manor, chairman of the 9-1-1 emergency telephone system board, and a member of the Kankakee county board.

Mr. LaMotte is a credit to his community. I am sure his knowledge, professionalism, and skill will be missed by the Momence Fire Department. I urge this body to identify and recognize other citizens in their communities whose actions have clearly made a difference to their community's well being and safety.

BUCHEIT INTERNATIONAL
LIMITED

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 7, 1997

Mr. TRAFICANT. Mr. Speaker, Bucheit International Ltd., a family-owned company in my 17th Congressional District of Ohio, has experienced difficulties in its business dealings with Burgan Bank, S.A.K. of Kuwait.

Bucheit is a shareholder of the Gulf Global Petroleum Establishment, which has maintained a \$3 million fixed deposit account with Burgan Bank since August 17, 1980. Over the following decade, the \$3 million account was used as a guarantee on Gulf Global's oil trade agreements.

Prior to Saddam Hussein's invasion of Kuwait in 1990, Gulf Global continued to maintain this fixed deposit account, plus accrued interest, in order to continue its oil trading business. During the Iraqi occupation of Kuwait in 1990 and the gulf war in 1991, Gulf Global's account at Burgan Bank was frozen.

Following the gulf war, Burgan Bank was taken over by the Kuwaiti Government. When Gulf Global tried to resume its operations following the war, Burgan Bank first denied that Gulf Global's account ever existed, even though company has bank receipts to prove it. Then Burgan officials said that they had found Gulf Global's account, but there was no money in it.

It should also be noted that all legal and statutory rights of the company have been

held by Mr. Said Al Sabawi, a Canadian citizen. Mr. Sabawi can certify that the account did indeed exist in 1990 and that he has never authorized the removal of the funds from the account, as Burgan Bank must have his signature for any withdrawal from the account.

Burgan Bank's official story is that the \$3 million on deposit was withdrawn in 1980. Who's kidding whom? If the money was withdrawn in 1980, how did Burgan guarantee, in writing, Gulf Global's oil purchases? If the money was withdrawn in 1980, how could Burgan issue bank statements showing the \$3 million was in the account?

The fact is, the \$3 million didn't vanish into thin air. I guarantee it's lining the pockets of the Kuwaiti royal family, who seized control of Burgan Bank in 1991. It's time the United States State Department gets tough with Kuwait, and demands the prompt return of Gulf Global's \$3 million, in full.

COLLINS AND AIKMAN
FLOORCOVERINGS: A COMPANY
MAKING STRIDES IN ENVIRON-
MENT, EDUCATION

HON. NATHAN DEAL

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 7, 1997

Mr. DEAL of Georgia. Mr. Speaker, as a member of both the Commerce Subcommittee on Health and Environment well as the House Education and the Workforce Committee, I am particularly interested in programs and achievements in education and the environment. Preserving our environment and educating our work force are challenges our Government cannot meet alone. It is important for those of us concerned about these issues to develop partnerships to help meet our responsibilities to society. This past summer, I had the opportunity to tour Collins and Aikman Floorcoverings in my ninth district of Georgia. Located in Dalton, the company manufactures commercial carpets and tiles.

Collins and Aikman is an example of a company that has discovered solutions to preserve the environment by being the first to recycle carpeting. Using 100 percent of the used carpet that it reclaims, Collins and Aikman produces the only high-performance carpet that contains a significant amount of recycled content. The product has the same performance characteristics and warranties as new carpet and sells for the same price. Further, the recycled content carpet is itself 100 percent recyclable, creating the opportunity for an infinite cycle of use.

These achievements signify that manufacturers can produce successful recycled products without compromising design, quality, or price as well as preserve the environment. Companies that go beyond compliance to achieve new benchmarks in resource and energy conservation should be commended. This holistic approach to environmental responsibility and accountability protect our resources for future generations.

This technological breakthrough involved the ingenuity and dedication of all Collins and Aikman employees. Through trial and error testing and development, this product became a reality. Special training and education programs are the key. The innovative Collins and

Aikman Pacesetters program is designed to orient new employees—from hourly wage earners to top level management—in the company. The outdoor adventure program builds team work, respect, and problemsolving skills. During my tour, I learned that this program broke down barriers for employees, making them feel part of a team and company right away.

A second educational effort within Collins and Aikman is its continuous, internal GED program. The company decided that instead of sending employees out to classes, it would bring the classes to the employees. Like Pacesetters, this program has helped develop an empowered, creative work force. Teachers conduct classes in a room set on the factory floor. Classes are held 2 days a week in 2-hour shifts, and participants go to class on the clock during work hours.

Since the company started this program 5 years ago, 115 employees—25 percent of the Collins and Aikman hourly work force—have earned high school equivalences. They have become part of the central core of trained employees who manage high-technology equipment and make daily, critical decisions that companies depend upon to stay competitive. Going back to school has been made easier for employees, and the resulting self-esteem and pride are immeasurable. Productivity and quality of work have improved yearly, and the trained work force has been instrumental in breakthrough discoveries such as the closed loop carpet recycling program.

As testament to these successes, Collins and Aikman Floorcoverings has recently been awarded the Success Track Outstanding Employer Award from the Georgia Department of Labor. I am pleased to bring these innovative examples in corporate leadership to your attention. Such environmental and educational practices help prepare our country for the challenges of the 21st century.

CONGRATULATING THE TIMES NEWSPAPER

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 7, 1997

Mr. VISCLOSKY. Mr. Speaker, it is my distinct pleasure to congratulate The Times newspaper as it celebrates its receipt of two first-place and two third-place honors in the Hoosier Press Association's 1996-97 Ad Award Contest. The Times has also been named the Hoosier State Press Association's "Blue Ribbon Newspaper of the Year" for 4 consecutive years.

In the highly competitive field of newspaper advertising, garnering two first-place and two third-place honors serves as a testament to the outstanding quality of The Times, its close-knit relationship to the community, and the high caliber of its staff. The award winning Times staff includes: Betty Durochik, Lisa Tatina, Dan Lavin, Kathy Campbell, Mary Alexander, Cindy Carstenson, and Mike Scamihorn. Betty Durochik and Lisa Tatina took first-place honors in the miscellaneous category of the Hoosier Press Association's contest for their work on the "Home for the Holidays" advertisement section. Dan Lavin and Kathy Campbell received first-place hon-

ors in the Special Projects, Promotion or Special Sections that have one common theme category for "Calumet City's Retail Dining Directory." Cindy Carstenson and Mike Scamihorn received third-place honors for "Taste of Chocolate" Recipe Cards in the best Non-Inserted Promotion category. Betty Durochik, Lisa Tatina, and Mary Alexander placed third for "Welcome to Schererville" in the Downtown Council, Shopping Center or Community-wide Group of Merchants category. The Times was judged in the division for newspapers with a circulation of greater than 10,000 by members of the Ohio Newspaper Advertising Executives Association.

The Hoosier Press Association's 1996-97 Ad Award Contest demonstrates a continuation of the proud and outstanding journalistic tradition upon which The Times was founded. The newspaper's maintenance of this strong tradition is especially evident in its receipt of the Hoosier State Press Association's "Blue Ribbon Newspaper of the Year Award" for 4 consecutive years. Earning this award has given The Times the distinction of being one of Indiana's finest newspapers.

Founded in June of 1906, The Times was established by Canadian stock and grain operations industrialist, Sidmon McHie, to serve as a vital source of local information for Northwest Indiana. Originally called the "Lake County Times," the newspaper was based in downtown Hammond on Fayette Street and Hohman Avenue. The paper grew and prospered over the years, and its name was changed to The Hammond Times in 1933. In 1967, with the addition of a bureau in South Lake County, the paper's name was changed to The Times. Ownership of The Times continued in the McHie family trust until May, 1962, when the paper was sold to Robert S. Howard, President and founder of Howard Publication, Inc. Under the direction of Howard Publication, The Times relocated to Munster, IN, in 1989, and currently publishes seven uniquely zoned editions.

Mr. Speaker, I ask that you and my other esteemed colleagues join me in commending The Times on its award winning performance. Through the hard work and dedication of its employees, past and present, The Times has remained true to its mission of being a vital source of information for the communities of Northwest Indiana.

THE TAMPON SAFETY AND RESEARCH ACT OF 1997

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 7, 1997

Mrs. MALONEY of New York. Mr. Speaker, I rise today to introduce an important piece of women's health legislation—The Tampon Safety and Research Act of 1997. The research called for in this bipartisan bill will finally give women the accurate information they need to make informed decisions about their health as it relates to tampon use.

Why is this issue important? Because tampons and other related products often contain additives, synthetic fibers, and dioxin. Dioxin is a toxic byproduct of the paper manufacturing process. Wood pulp, as well as the rayon used in nearly all tampons, undergoes several

production processes; a common method is chlorine bleaching, a process which results in the formation of dioxin and other contaminants. As a result, trace amounts of dioxin is present in most paper products, from toilet paper to tampons.

Dioxins are also found in varying levels throughout the environment, but are women being subjected to additional and potentially avoidable exposures to dioxin through tampon use? Let me put dioxin in perspective, because we only have to consult recent history to know of the potentially disastrous effects of this substance. Dioxin is a member of the organochlorine group, which includes the contaminants found in agent orange, the Vietnam war-era defoliant, and at Love Canal.

But let's consult the experts, too. According to a 1994 report issued by the Environmental Protection Agency, dioxins are a known animal cancer-causing agent as well as a probable human carcinogen. My bill is specifically concerned with the possible links between dioxin in tampons and ovarian, cervical, and breast cancers, as well as other potential hazards.

A 1996 EPA study has also linked dioxin exposure with increased risks for endometriosis, an often painful menstrual-related condition that is a leading cause of infertility. Further, the EPA has concluded that people with high exposure to dioxins may be at risk for other effects that could suppress the immune system, increase the risk of pelvic inflammatory disease, reduce fertility, and possibly interfere with normal fetal and childhood development.

The EPA conclusions regarding dioxin exposure are particularly alarming in light of a 1989 Food and Drug Administration report, which stated that "possible exposures from all other medical device sources would be dwarfed by the potential tampon exposure." Why? Because tampons are used by up to 70 percent of menstruating women in the United States, and the average woman may use as many as 11,400 tampons during her lifetime. If dioxin is putting women at risk, could the long-term use of tampons increase that risk?

What makes these toxic residues in tampons even more disturbing is that they come in direct contact with some of the most absorbent tissue in a woman's body. According to Dr. Phillip Tierno, Jr., director of microbiology and immunology at New York University Medical Center, almost anything placed on this tissue—including dioxin—gets absorbed into the body.

According to researchers, dioxin is stored in fatty tissue—just like that found in the vagina. And the fact is that women have more body fat than men, possibly allowing them to more efficiently store dioxins from all sources, not just tampons. Worse yet, the effects of dioxin are cumulative, and can be measured as much as 20 or 30 years after exposure. This accumulation is cause for particular concern, because a woman may be exposed to dioxin in tampons for approximately 40 years over the course of her reproductive life.

The question, of course, is why it is acceptable to have this toxic substance in tampons—despite the advice of an FDA scientist to the contrary. A 1989 agency document reported that "the most effective risk management strategy would be to assure that tampons, and menstrual pads for good measure, contain no dioxin." And why has there been far more testing on the possible health effects of chlorine-bleached coffee filters than on chlorine-
