THE OCEANS ACT OF 1997

SNOWE (AND HOLLINGS) AMENDMENT NO. 1639

Mr. NICKLES (for Ms. SNOWE, for herself and Mr. HOLLINGS) proposed an amendment to the bill (S. 1213) to establish a National Ocean Council, a Commission on Ocean Policy, and for other purposes; as follows:

Strike out all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the “Oceans Act of 1997”.

SEC. 2. CONGRESSIONAL FINDINGS; PURPOSE AND OBJECTIVES.

(a) FINDINGS.—The Congress makes the following findings:

(1) Covering more than two-thirds of the Earth's surface, the oceans and Great Lakes play a critical role in the global water cycle and in regulating climate, sustain a large part of Earth's biodiversity, provide an important source of food and a wealth of other natural products, act as a frontier to scientific exploration, are critical to national security, and provide a vital means of transportation. The coasts, transition between land and open ocean, are regions of remarkably high biological productivity, contribute more than 30 percent of the Gross Domestic Product, and are of considerable importance for recreation, waste disposal, and mineral exploration.

(2) Ocean and coastal resources are susceptible to change as a direct and indirect result of human activities, and such changes can significantly impact the ability of the oceans and Great Lakes to provide the benefits upon which the Nation depends. Changes in ocean and coastal processes could affect global climate patterns, marine productivity and biodiversity, environmental quality, national security, economic competitiveness, availability of energy, vulnerability to natural hazards, and transportation safety and efficiency.

(3) Ocean and coastal resources are not infinite, and human pressure on them is increasing. One half of the Nation's population lives within 50 miles of the coast, ocean and coastal resources once considered inexhaustible are now threatened with depletion, and if population trends continue as expected, pressure on and conflicting demands for ocean and coastal resources will increase further as will vulnerability to coastal hazards.

(4) Marine transportation is key to United States participation in the global economy and to the wide range of activities carried out in ocean and coastal regions. Inland waterway and ports are the link between marine activities in ocean and coastal regions and the supporting transportation infrastructure ashore. International trade is expected to triple by 2020. The increase has the potential to outgrow—

(A) the capabilities of the marine transportation system to ensure safety; and

(B) the existing capacity of ports and waterways.

(5) Marine technologies hold tremendous promise for expanding the range and increasing the utility of products from the oceans and Great Lakes, improving the stewardship of ocean and coastal resources, and contributing to business and manufacturing innovations and the creation of new jobs.

(6) Research has uncovered the link between oceanic and atmospheric processes and improved understanding of world climate patterns and forecasts. Important new advances, including availability of military technology, have made feasible the exploration of large areas of the ocean which were inaccessible several years ago. In designating 1998 as “The Year of the Ocean”, the United Nations highlights the value of increasing our knowledge of the oceans.

(7) It has been 30 years since the Commission on Marine Science, Engineering, and Resources (known as the Stratton Commission) conducted a comprehensive examination of

ocean and coastal activities that led to enactment of major legislation and the establishment of key oceanic and atmospheric institutions.

(8) A review of existing activities is essential to respond to the changes that have occurred over the past three decades and to develop an effective new policy for the twenty-first century to conserve and use, in a sustainable manner, ocean and coastal resources, protect the marine environment, explore ocean frontiers, protect human safety, and create marine technologies and economic opportunities.

(9) Changes in United States laws and policies since the Stratton Commission, such as the enactment of the Coastal Zone Management Act, have increased the role of the States in the management of ocean and coastal resources.

(10) While significant Federal and State ocean and coastal programs are underway, those Federal programs would benefit from a coherent national ocean and coastal policy that reflects the need for cost-effective allocation of fiscal resources, improved inter-agency coordination, and strengthened partnerships with State, private, and international entities engaged in ocean and coastal activities.

(b) **PURPOSE AND OBJECTIVES.**—The purpose of this Act is to develop and maintain, consistent with the obligations of the United States under international law, a coordinated, comprehensive, and long-range national policy with respect to ocean and coastal activities that will assist the Nation in meeting the following objectives:

(1) The protection of life and property against natural and manmade hazards.

(2) Responsible stewardship, including use, of fishery resources and other ocean and coastal resources.

(3) The protection of the marine environment and prevention of marine pollution.

(4) The enhancement of marine-related commerce and transportation, the resolution of conflicts among users of the marine environment, and the engagement of the private sector in innovative approaches for sustainable use of marine resources.

(5) The expansion of human knowledge of the marine environment including the role of the oceans in climate and global environmental change and the advancement of education and training in fields related to ocean and coastal activities.

(6) The continued investment in and development and improvement of the capabilities, performance, use, and efficiency of technologies for use in ocean and coastal activities.

(7) Close cooperation among all government agencies and departments to ensure—

(A) coherent regulation of ocean and coastal activities;

(B) availability and appropriate allocation of Federal funding, personnel, facilities, and equipment for such activities; and

(C) cost-effective and efficient operation of Federal departments, agencies, and programs involved in ocean and coastal activities.

(8) The enhancement of partnerships with State and local governments with respect to oceans and coastal activities, including the management of ocean and coastal resources and identification of appropriate opportunities for policy-making and decision-making at the State and local level.

(9) The preservation of the role of the United States as a leader in ocean and coastal activities, and, when it is in the national interest, the cooperation by the United States with other nations and international organizations in ocean and coastal activities.

ADDITIONAL STATEMENTS

VETERANS DAY 1997

• Mr. KERRY. Mr. President, today I wish to pay deep respect and tribute to the men and women of the United States who have made significant sacrifices in the defense of the freedoms and democratic principles upon which our country was founded and to which we pledge our allegiance today. For every American, Veterans Day holds a special meaning because it is a time to remember those veterans who have died, thank those who are living, and reflect on the honorable contributions that each has made to our country. People of all ages and backgrounds marched in parades across the United States on November 11 honoring veterans whom often they have never met, nor seen, nor heard about—and who too often have received little or no recognition for their unwavering devotion to our country.

As a veteran of the Vietnam war, I share a memory with many others who have served in the U.S. Armed Forces and ascribe a special meaning to this day. We remember the faces of those who served with us and the experiences of those who served beside us. History will remember the cause, but we will remember the people.

I am proud to have served my country and feel blessed that I was lucky enough to return to my family and friends. To those brave men and women who gave their lives for our country or who have survived but paid in human suffering, we collectively owe a great debt and appropriate recognition and respect. We must never forget their service, or their sacrifice, nor must we forget their significance.●

HELP FOR LOCALITIES

• Mr. ABRAHAM. Mr. President, one of the final items to be approved by the Senate for inclusion in the fiscal year 1998 Senate Interior appropriations bill was my amendment to raise the level of funding for the Payment in Lieu of Taxes program, or PILT. I want to thank the Interior appropriations chairman, Senator GORTON, for his assistance and consideration of this im-

portant amendment. I also wish to thank my cosponsors, Senators LEVIN, HATCH, CAMPBELL, SMITH, and Dominici. In particular, I am most appreciative of Senator LEVIN, his hard work and cooperation in securing the support of the subcommittee's ranking member was crucial.

Every year, Mr. President, the Federal Government increases the acreage it owns, particularly in the form of national parks. This provides increased opportunities for Americans to enjoy the great outdoors. At the same time, however, it also increases costs for law enforcement, search and rescue and fire departments for literally thousands of small towns throughout our Nation.

Federal land purchases often permanently remove a critical source of income from local communities. PILT payments, or "Payments in Lieu of Taxes," are made to counties and local communities which contain certain federally owned lands that cannot be taxed or, in many cases, developed by the local governments. PILT moneys are often the only means that counties have to pay for police protection and garbage collection and storage as well as funding for one time capital investments for new schools, hospitals, and jails. They also are vital for offsetting costs incurred by counties for services provided users of public lands.

Unfortunately, Mr. President, and despite the very real benefits local communities provide, every year more Federal lands are taken off of county tax rolls, while PILT payments remain stagnant and well below the level authorized by Congress.

That is why my colleagues and I took action to reverse this trend, and why I am so pleased that the Senate has agreed to raise PILT payments to \$124 million. I believe this increase has significance beyond the amount approved because it demonstrates that the Congress is beginning to understand the dilemma faced by a significant number of our localities, struggling as they are with increasing costs and a shrinking tax base.

During the conference of the House and Senate, Members agreed to a compromise funding level of \$20 million. I suspect that the increased Senate amount was partially responsible for the conferees agreeing to an amount \$7 million above the House level. These extra funds will provide crucial help to local communities strapped for funds as they seek to tend to their own citizens' needs. It has been a long time coming and I applaud the Senate for agreeing to support this critical program.●
